Assembly Guide

## Tips and tricks

- To assemble each tray you need a wood glue for extra strength. (We recommend Titebond 2 Wood Glue or Beacon 527)
- Please make sure you assembled each tray correctly before gluing it together.
- Use stationery knife to cut the bits that connect details to the frame.
- Remove the details from the frame with a rotational motion along the axis formed by the bits you just cut.
- Use stationery knife to remove all the remaining connection bits.
- Leave your finished insert overnight to dry completely.
- Use a hairdryer for easier removal of the protective covering from acrylic details. Just heat the acrylic surface a little to remove the covering much easier!

## Assembly Supplies

Wood-glue

Stationery knife

Hammer

Cotton swab

Hairdryer

**IMPORTANT:** Assemble each tray one by one. Please DO NOT take all the parts out of the sheets and mix them. Even though some parts look similar, they are not interchangeable.
