INTRODUCTION

It's time to change the shooting style with straight camera sliders. Proaim launches a camera slider with a curve! Curve-120 Curved Camera Slider with Motion Control System is a must-have in your tool box and gives your shot compositions a jump start. Fully featured video slider with heavy-anodized **aluminum construction and super-smooth glide rail** gives you the ability to create high-quality production shots without over-extending your budget. It **attaches directly to a tripod** and may also **use stand-alone** with the included **adjustable & removable feet**. The compact Motion Control system when added to the slider lets you create **dynamic sequences with fluid motorized slides**. Its **Precision motor** produces **smooth incremental movements**, and works with most DSLR, Mirrorless, and digital cinema cameras up to 5kg/11lb.

IN THE BOX

Please inspect the contents of your shipped package to ensure you have received all that is pictured and listed below.

ASSEMBLING YOUR CURVED CAMERA SLIDER

- Loosen the knobs of both end feet and adjust the feet as per your requirement.

- Place the slider rail on end foots and tighten the screw to secure it.

- Mount the camera mounting plate assembly on slider and tighten the knob to secure it.

CONNECTING WIRE WITH MOTOR TO CONTROLLER

- Attach **Female connector** of motor to the one end of 3 mtr wire of **DC male connector**. Attach the other end of 3 mtr wire of (**4 pin hero push pull connector**) to the 4pin controller on controller.

ATTACHING THE MOTOR WITH SLIDER

Caution : While performing this step, make sure that your camera plate is mounted onto the slider.

- Pull the lever to attach the motor with slider as shown in image below .

- Mount your camera onto the fluid head & tighten it to secure it.

NOTE: YOU CAN ALSO USE THE SLIDER WITHOUT MOTOR.
