Did you know that...

1 in 3 adults aged 65+ falls every year

Which can lead to fatal injuries, incapacitation, and inability to do activities of daily living.

Let us help you do or resume your activities of daily living **with confidence**

One Tool. Many Solutions!

- Maintaining stable posture on indoor and outdoor terrain: home, restaurant, garden, beach, snow
- Assisting with activities of daily living (ADL)
- Getting up from a seated position: couch, recliner, bed, chair, toilet
- Sitting down safely: couch, recliner, bed, chair, toilet
- Moving safely on slippery floors in the shower and bathroom
- Picking up items from the floor
- Getting up after a fall (non-life-threatening)
- Performing in-home physical therapy exercises
- Ease of handling: lightweight, portable, fully assembled, folds and stores easily
- A walker conversion kit is also available

"I broke my tibia and fibula a few weeks ago in a skating accident. This device has been a Godsend. The stability it provides to get in and out of the shower is incredible. I love that the design also allows for it to go right up against bathroom and kitchen cabinets and sofas. This device is a game changer for sure. I have a regular walker as well, but this one is by far my favorite! I have been non-weight bearing for 7 weeks now after ORIF surgery. I really recommend this product. It's different than anything else on the market." - Elly Perez

For my patients, maintaining mobility is a major factor for a more enjoyable life. I feel the Stabilized Steps solution helps them meet those needs. " - Ronald G. Scott, M.D.
