

Product: **SONAX Xtreme Polish & Wax 3 Hybrid NPT**

Article Code: **202 100/200**

Formula Code: 2023 1287

Product Description: Highly effective polish for removing weathered paint layers and rejuvenating dull colours. Extremely fine alumina powder smoothens out scratches caused by the carwash, finger nails and other traces of usage. With the innovative Hybrid Net Protection Technology, the paintwork receives an unprecedented brilliant high gloss, combined with a remarkable water run-off effect.

Directions for Use:

- Wash the car with SONAX Gloss shampoo.
- Shake bottle before use.
- Apply the product onto the dry paintwork with a SONAX P-Ball, SONAX Application sponge or a soft cloth and polish immediately, working in a circular motion and exerting some pressure. Always treat part sections (e.g. door or half of a bonnet) in one operation.
- Allow to air dry briefly.
- Wipe off residue with a SONAX Microfibre cloth.
- For extremely weathered paintwork repeat the application.
- To optimize the long term protection, the paintwork should be treated with **SONAX Brilliant wax 1 Hybrid NPT**.

Please Note:

- Do not apply in direct sunlight or on hot paintwork.
- Product can also be applied with a polishing machine.
- Bright stains on unpainted plastic and rubber components can be avoided by pre-treating these parts with SONAX Trim protectant.
- Protect against extreme cold.

Chemical Classification: Blend of silicones, waxes and mild abrasives.

Specific Data:

Appearance:	Blue fluid
Density:	0.98 – 0.99 g/ml
Viscosity:	2 – 4 Pas (Brookfield, Sp. 5, 20 r.p.m.)

Packaging:

250 ml PET-Bottle	(202 100)
500 ml PET-Bottle	(202 200)

Safety Data: See safety data sheet
