

**Product:** SONAX Xtreme Metal Polish

**Article Code:** 204 100  
**Formula Code:** 2040 0116

**Product Description:** Abrasive containing care product for aluminium, stainless steel and trim metals such as copper, brass and chrome. Also ideal for household use.  
Cleans quickly and thoroughly, removes oxidation, tarnishing and dull areas. Dissolves dirt contamination and corrosion residues, provides a new shine and protection. Gentle on surfaces without scratching like some aggressive scouring agents. NSF approval for application in food related areas.

**Directions for Use:**

- Apply thinly with a SONAX Polishing cloth or SONAX Application sponge
- Rub in until the desired polishing effect is attained
- Wipe off black residues
- When working on brushed stainless steel make sure that an even application is achieved and work in the direction of the brushing

**Please Note:**

Do not apply on lacquered metallic parts (e.g. aluminium wheels) or on rough surfaces

**Chemical Classification:** Emulsion containing abrasives and care components in aliphatic hydrocarbons

**Specific Data:**

Appearance:	paste
Density:	1.00 g/ml
Viscosity:	20 -- 30 Pas (Brookfield Sp7, 20 rpm)
pH:	undefined

**Packaging:** 150ml PE tube

**Safety Data:** See safety data sheet
