

Product: SONAX Xtreme Plastic restorer gel NanoPro

Article Code: 210 141

Formula Code: 2101 1400

Product Description: Maintains unpainted plastic components on vehicle exteriors. Gives a fresh shine to weathered bumpers or styling strips and intensively rejuvenates colours. Seals the hitherto porous surfaces and provides outstanding conservation. Also ideal for tyres and rubber components.

Directions for Use:

- Wash the vehicle and allow to dry
- To ensure a durable effect, first remove any conserving agent (e.g. with SONAX Stain remover)
- Apply a little of the product onto a soft cloth or sponge and thinly rub into the areas to be treated
- Wipe off excess gel with a cloth

Notice:

- Do not apply onto moist surfaces
- Do not apply too thickly, as this may cause increased dust attraction
- If applied before polishing, the bright polish residue can be easily wiped off plastic and rubber
- Not suitable for quads
- Not for interior use

Chemical Characterisation: Hydrocarbon based care components in solvents. Silicone free
Type of Nanoparticle: Silica
Typical Size: 12 nm

Specific Data:

Appearance:	white paste
Density:	0.85 – 0.86 g/ml
Viscosity:	3 – 6 Pas (Brookfield, Sp.7, 20rpm)

Packaging: 250 ml tube

Safety Data: See safety data sheet
