

Product:	SONAX Clay polishing disc	
Article Code: Formula Code:	<b>450 605</b>	
Product Description:	Rubber disc for polishing machines for removing impurities adhering to the paintwork, such as rust film, tree sap, paint overspray or tar, quickly and with minimal effort. SONAX Clay polishing disc is a modern alternative to the cleaning clay.	
Directions for Use:	<ul> <li>First wash vehicle.</li> <li>Fix the Clay polishing disc to the back-up plate</li> <li>Ideal application is with an orbital polisher, if using with a rotary polishing machine, let it run at the lowest rotational speed (1,000 r.p.m. max.).</li> <li>Before first use, spray the disc with SONAX Clear glass as lubricant, and briefly polish a spot on a car window to activate the disc.</li> <li>Exerting low contact pressure, guide the rubber disc over the paintwork, working crosswise. Always treat part sections of about half a square metre.</li> <li>Run your hand over the paintwork. When it feels smooth, go on to the next part section.</li> <li>Remove dissolved impurities from time to time, by rinsing the rubber disc with Clear glass.</li> </ul>
