

Product: SONAX Foam Pad medium 160

Art. No.: 0493 0000

Formula No : -----

Product description: Polishing pad for polishing machine. Medium hard and fine-porous sponge with Hook & Loop system for the polishing of weathered or scratched paints. Ideal for the hologram-free polishing with SONAX NP 03/06. Its thinner mesh makes it softer and more flexible. It is suitable for all types of polish, hence the name. The foam has a good balance between abrasive effect and finish.

Application:

- Place pad centrally onto the back-up plate (Art.No. 0493 2000) of the polishing machine to achieve a smooth run.
- Slightly moisten the pad.
- Apply the polish evenly onto the pad and polish

Please note:

- Lifetime of the sponge can be significantly increased when the polish is washed out regularly by hand with warm water. Never use a high pressure device!
- keep the sponge always clean to avoid holograms or scratches

Composition: Medium hard polyurethane foam with open celled structure.

Specific data:

bulk density:	42-50 kg/m ³
number of cells:	16-20 c/cm
compression hardness:	8-11 kPa
diameter:	160 mm (6.3 in)
