

Product: SONAX Lambswool pad

Article No: 0493 1410

Formula No: ---

Product description: Dense, high quality lambskin for professional polishing with polishing machine. Enhances the cutting efficiency of abrasive polishes, and simultaneously reduces the polishing temperature. Velcro fastening enables rapid pad change.

Application:

- Press lambskin disc centrally onto back-up plate (Art.No. 0493 2000) of the polishing machine.
- Prior to start of polishing moisturize the lambskin slightly.
- Use any SONAX polish with sanding properties, preferably SONAX Abrasive polish to polish away scratches in the paintwork
- Distribute the polish evenly on the surface of the disc
- After polishing let the pad dry and clean with the cleaning brush (Art.No. 0491 3000)
- If the pad is heavily soiled, wash with water and a mild cleaner. Then mount onto the polishing machine and switch on to remove the humidity of the pad. Then leave to dry at a clean place.

Please note:

- Polishing with lambskin pad can cause swirl marks and holograms. A further polishing step with sponge and SONAX Nano polish is recommended especially when polishing dark colors.
- Lifetime of the pad can be significantly increased when the pad is cleaned according our recommendations. Never use a high pressure device!
