

Product: SONAX Orbital Polishing Pad hard 143 DA

Article Code: 0493 4000

Formula Code: ----

Product Description: Polishing sponge for orbital polishing machines. Hard finely pored sponge for the abrasive polishing of scratched and weathered vehicle paintwork. Very good ventilation and special cooling at the hub, through a hole at the centre. No splashing due to the especially high polish absorption capacity. High endurance, very good cost benefit ratio.

Directions for Use:

- Attach centrally onto the back up plate of the polishing machine.
- Distribute the polish evenly and thinly over the sponge.
- When polishing, ensure that the sponge does not overheat and do not exert excessive pressure.

Please Note:

- The service life of the sponge depends heavily on how much pressure is exerted when working.
- Do not wash out with high pressure equipment, allow to dry after the polishing. Afterwards, wash out carefully with warm water and Multi star. For Low Dust polishes, first spray on Paint prepare and squeeze out

Chemical Classification: Reticulated polyurethane foam

Specific Data:

Colour:	red
Number of cells:	approx. 16 c/cm
Compression hardness:	approx. 20 kPa
Diameter:	143 mm

Packaging: PE bag

Safety Data: ---
