

Product: SONAX Foam Pad soft 200

Article Code: 0493 6410

Formula Code: ----

Product Description: Polishing sponge for polishing machines. Diameter 200 mm. Ultra soft, finely pored sponge for machine polishing paintwork with finishing polishes, such as SONAX Perfect finish, SONAX Nano polish or Nano polish & wax. Especially suitable for polishing sensitive, freshly painted surfaces.

Directions for Use:

- Fasten concentrically onto the Back-Up Plate of the polishing machine.
- Distribute the polish evenly and thinly over the sponge.
- Ensure that the paintwork does not become over heated while polishing (no high rotational speed).

Please Note:

- The durability of the sponge may be prolonged if the sponge avoids contact with edges.
- Never wash out with HP equipment, wash carefully with warm water after the polishing.

Chemical Classification: Soft polyurethane foam with open celled structure.

Specific Data:

bulk density:	27-33 kg/m ³
number of cells:	75-90 c/cm
compression hardness:	2-5 kPa
diameter:	200 mm (7.87 in)

Packaging: PE-bag

Safety Data: ---
