

Product: **SONAX Car A/C Cleaner AirAid probiotic**

Article Number: **0323 1000**

Formula Number: 3230 0056

Product Description: The humid atmosphere in air conditioners is an ideal breeding ground for unwanted micro organisms. They settle on the vaporizer and condensed water drains so that musty odours may occur and allergic reactions can be induced. SONAX Car A/C Cleaner fights such odours without a visit to the repair shop. The ventilation system and vaporizer are cleansed of odour forming substances, and unpleasant odours are removed. The effect starts fully after approx. 14 days. Regular use is recommended.

Directions for Use: Switch the ignition on. Set A/C to cold, fan speed to the highest level, and select air circulation. Open all cabin blower vents. Push the front seat forward and turn it down.

- Shake can before use. Tear off retaining ring.
- To start the spraying process, hold the spray head away from the body press it downwards and, at the same time, turn it to the right as far as it will go.
- Put the spraying can in rear foot well. Leave the car, close windows and doors. After 5 minutes, open the doors and ventilate car for 10 minutes.

SONAX Tip:
Use preventively in new vehicles. For extreme odours we recommend professional cleaning in the workshop.

PLEASE NOTE: Apply only in the open air. Use at temperatures above +10°C/50°F.

Chemical Classification: Alcohol solution, Probiotic Bacteria, Perfume

Specific Data:

Appearance:	turbid colourless fluid
Density:	0.80 – 0.81 g/ml
Viscosity:	---
pH:	---

Packaging: 100 ml Aerosol can in counter display

Safety Data: See safety data sheet
