

Family Fireworks Category Reference

FOUNTAINS

Lower-level items that emit showers of sparks like a volcano. Max height is 3m/10ft. Effects include whistling, crackling, colour-changes, etc.

WHEELS

Special fireworks that are mounted (by nail) to a fence or post. They rotate quickly, creating spinning fountains and cascading rings of fire.

ROMAN CANDLES

Small or medium diameter tube-type items with no base. These items emit multiple shots of individual flaming stars. Young kids love 'em!

SOUND SHELLS

Although these small, single-shot items contain various visual effects, their real purpose is to create loud screeches & thunderous bangs!

BRAZILIANS

Single-shot mortar tubes that produce comets or floral bursts. These items reach superior heights and often contain very loud bangs!

BARRAGES

Produce rapid-fire bursts of flaming stars. Larger items have secondary effects, e.g. flowers or whistles, and can be used for your finale.

MORTAR SHELLS

Single-shot items that shoot to high altitudes and produce stunning effects, such as giant Star Mines, crackling Comets & colour-change Floral Bursts.

MULTI-SHOT CAKES

These popular fireworks can provide spectacular and long lasting effects from a single ignition. Large Cakes are ideal for your grand finale!

NOVELTIES

Smaller items designed for amusement prior to the main event—or *anytime* on their own. These traditional items create great fun & memories!
