

GREEN FEET SUMMARY REPORT

APRIL 2018

At Stone & Wood, we are committed to taking care of the earth that sustains us (after all, this is the only planet with beer). Our Green Feet program is our approach to sustainability, which encompasses all inputs and outputs to the brewery, as well as thinking about our place in the community as a whole.

FOCUS ON...

B-CORP CERTIFICATION

Our B-Corp certification means we have joined a global movement to use the power of business to create a positive impact on the world. This includes verification of our business practices against merits of governance, workers, community, and environment. We feel that this is a great way to hold a magnifying glass to our business practices to benchmark against the rest of the world, and improve upon not just what we do, but how we do it.

SOLAR POWER

Using energy from the sun is one of the most popular forms of renewable energy that significantly reduces our carbon footprint. Since June 2015 we have had a 100kW solar system operating at our Murwillumbah brewery, which has mitigated CO2 emissions to the equivalent of planting 5000 trees.
