

Track Pro-S Quick Start Guide

Locate. Track. Protect.

ESCO

Getting Started

1.

Remove

Remove magnet from the Track Pro-S tag. Save magnet for future use.

2.

Scan

Configure the Track Pro-S tag using the Track Pro App by scanning the barcode.

3.

Locate

The current location of the Track Pro-S will be shown in the Track Pro App.

4.

Sight Line

Ensure the Track Pro-S tag is outside and has good line of sight to the sky.

5.

Link

The Track Pro-S will start linking with communications network and be operational within 48 hours.

Additional information

For more information on how Track Pro can help you take ownership of your assets, scan the QR code at the right.
