**PLAYMAGS**  
3D MAGNETIC TILES

---

Playmags™ building blocks are unique! The magnets attract on all sides, even when flipped around.

Children will effortlessly learn through creative play about geometric shapes, symmetry, architecture, and basic maths concepts such as counting, addition and subtraction, through manipulation of the colourful pieces.

Place the pieces together on our sturdy magna board to create endless designs. Build a cube with six squares and notice how the first two pieces placed next to each other create instant support and allow additional pieces to be added easily.

Playmags™ also features magnetic figures, cars, boards, play houses and much more for added fun.

Our additional magnetic products include a magnetic drawing pad, magna dots and a magnetic cube puzzle.

Play is the primary mode of learning for children. Young children love discovering mathematical concepts in the world around them. When a child has the opportunity to take flat objects and successfully construct 3D projects from them, the sense of discovery is extremely exciting and empowering.

Playmags offers hours and hours of fun. Children can build various projects and let their imagination run wild with ideas.

Create castles, cubes, houses and so much more.

PROUD WINNER OF THESE PRESTIGIOUS AWARDS

It is a happy  
talent to know  
how to play.

CUBE PUZZLE

Includes:

---

Playmags™ magnetic building blocks attract on all sides and the combinations form many different shapes and structures from flat designs to squares, pyramids, plus many more unlimited geometric shapes.

Tiles easily connect, which prompts kids to move from constructive two-dimensional to three-dimensional creations. Magnificent high rise 3d towers are designed by kids who have developed into critical thinkers through creative play. As they build, kids develop tools for spatial problem-solving tasks, logical thinking and math reasoning.

Bright colored tiles come in many shapes include squares, triangles and more, and in different sizes. Blocks easily connect and inspire creativity, brain development, patterning, shape recognition, building and motor skills.
