HYDRAULIC DOCK LEVELLER BY

FOR THE INDUSTRY;  
BY THE INDUSTRY

AVAILABLE IN CAPACITY RANGE 30K-100K

## Safety features:

- Hydraulic velocity fuse, limits loaded ramps to freefall within 3" (76mm)
- Full range safety yellow telescopic toe guards meet the ANSI Z535.1 specification
- Permanently mounted reinforced safety yellow maintenance strut, supporting both deck and lip, makes routine maintenance easy and safe

BUILT TO LAST, BY PEOPLE FROM THE INDUSTRY, TITANIUM SERIES DOCK LEVELLERS GUARANTEE TO PROVIDE YEARS OF TROUBLE-FREE TRAFFIC IN YOUR SHIPPING/RECEIVING

## EASE THE OPERATION:

The Titanium series of dock levellers works simply by pushing a button on the control station. A standard feature on stand-alone units. Cycling times are under 60 seconds. Proven hydraulic units (mounted to TENV motors) and cylinders are easily maintained and fully adjustable. Working ranges are between 12" (305mm) above and below dock grade.

## STRUCTURAL SUPERIORITY:

No less than six heavy duty HSS thick walled support channels welded to a solid head plate and high tensile deck plate for 50k capacity only. The unique gusseted anti-seize lip hinge design is guaranteed for life and greatly increases its structural integrity. A first in the industry. 2" rear deck tilt facilitates loading and unloading uneven trucks. (This feature can also be eliminated to reduce tripping. These features keep this dock from dishing or flexing.

\*\*The looped style lip hinge is one of a kind to the industry. This unique design prevents the hinges from seizing due to environmental issues: such as snow and ice or from the lack of usage for prolonged periods of time. The hinge remains agile while maintaining rigidity. Weld patterns make this lip stronger than conventional dock lips, hence, the limited life time guarantee.

HYDRAULIC DOCK LEVELLER BY

**FOR THE INDUSTRY;  
BY THE INDUSTRY**

## STANDARD FEATURES:

- Side (and rear) brush type weather seals
- Fully hydraulic lip
- Telescopic toe guards
- Adjustable lip keepers
- Maintenance stand

## AVAILABLE OPTIONS:

- 18" or 20" (3/4" thick) fully hydraulic lip
- Four sided pans or preform pit kits for new construction

## CLIMATE PACKAGES:

- Remote power units
- Dual action lip cylinders
- Insulated decks
- (Galvanizing)

## SAFETY PACKAGES:

- Barriers
- Manual or automatic traffic light packages
- Wheel chocks
- Vehicle restraint

## CONTROL PANEL UPGRADES:

Fully programmable and customizable combination controls which include: emergency stop, independant lip control, door controls, light packages and many more.

These upgrades tie in all possible dock features in one single panel

**A WELL-BUILT, LOW COST, LONG TERM INVESTMENT FOR THE THROW AWAY GENERATION.  
THERE'S NO REASON YOU CAN'T HAVE IT ALL.**
