## INSTALL GUIDE

# PIXEL RGB ROCK LIGHT

**WARNING:** By reading this document, I agree it is only to be used as an educational guide. Profile Performance nor its distributors make guarantees on any finished results, nor are they to be held responsible for any damage, misuse, or personal injuries. Use at your own risk. If you are unable to clearly understand and adapt the information below, professional installation is recommended.

### WHAT'S INCLUDED

1-8x PIXEL ROCK LIGHT

1-2x SPLITTER

1-8x MAGNET MOUNT

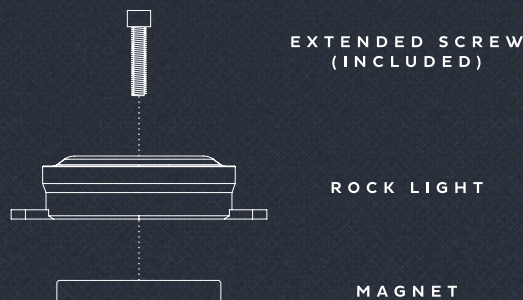

1x EXTENSION

1x MORIMOTO XBT CONTROLLER

### ASSEMBLY PROCESS

To fit the optional magnet mount, remove the screw from the center of the rock light, and replace it with the included extended screw. Then, thread on the magnet from below and tighten until snug.

## WIRING PROCESS

Pixel RGB Rock Lights use water-resistant “barrel” style connectors. If used, the optional extensions add distance between the rock light input and the splitter outputs. The splitters are used to allow one JST four-pin input to power and control four rock lights.
