Dove Tail Base Plate Setup

- Mount the horse-shoe on the rod and secure it with the knob. Mounting the dovetail base plate requires a horse-shoe mount first.

- Mount the dovetail base plate onto the horse-shoe, insert the 2 x (1/4" x 3/4") screws aligning the plate and horse-shoe mount threads.

Note: Proaim Dovetail Mount Base Plate is designed for Camera Carts. It instantly attaches to horse-shoe mount.

- After inserting the screws, secure it with an Allen key and insert the bolt of 3/8"-16 screws from the bottom of the dovetail plate as shown in the image.

- Mount the dovetail tripod plate on the dovetail base plate and secure it properly using a screwdriver.

Note: The Dovetail Tripod Plate is a 10" ARRI standard plate with safety catches on each end.

- For direct camera mounting, slide the C-100 camera (Not included) onto the dovetail plate and press the lever to secure the camera properly.

- For fluid head camera mounting, mount the fluid head (Not included) on the dovetail base plate and secure it with the knob.

Note: Proaim fluid head comprises a sliding camera platform, optimizing tilt control. The sturdy knob stiffens the tilt mechanism to help stop the camera from tipping backward or forwards when using a heavy lens.

- Mount the C-100 camera (Not included) on the fluid head, as shown in the picture.

Note: Proaim Dovetail Mount Base Plate offers stable support to any quick release camera systems & 3-axis Gimbals. It adapts cameras like Canon C100 and DSLR Video camera like Red scarlet.

YOUR PROAIM DOVE TAIL MOUNT BASE PLATE FOR CAMERA CARTS ALL DRESSED UP AND READY TO GO!
