Vibration Isolator Setup

Begin by taking out the mainframe from the case.

- Attach DJI-QR Ronin plate with top plate of Vibration Isolator with the provided screws & allen key.

NOTE: Attach Isolator with Proaim Airwave Vibration Isolator Arm then secure with provided screws

- Loosen the side lock lever & insert your gimbal then again lock the lever to secure it. If ronin plate look loose then tighten the side allen bolt.

NOTE: The isolator can be fixed both Over Slung and Under Slung, as per your requirement

NOTE: Vibration Isolator can also be customized with different payloads for using with lightweight set-ups from 15-30kg / 33-66lb.

- Loosen allen bolts on top Plate with the help of allen key and remove the plate. Your equipment will look as shown in image.

- Loosen all allen bolts with help of provided allen key as shown in images.

- Remove the Passive Plate from the Frame as shown in the image.

- Turn the Isolator upside-down & loosen the bolts to remove Square-O-Rings from the Isolator.

- Now reduce the rings set in center of the Vibration Isolator as per your payload requirement. Then similarly follow the back steps to assemble the Vibration Isolator.

- There are many different holes at the top and bottom side of vibration isolator plate to mount different accessories.

- 1/4"-20 hole is for DJI-QR Ronin Plate

- M4 or M3 hole is for MOVI Mount

Be sure to mount your Gimbal Camera Setup securely.

YOUR PROAIM PRO CAMERA VIBRATION ISOLATOR ALL DRESSED UP AND READY TO GO!
