Smart-Lock Drawer Setup

• Remove the mat of Victor V1-42 Cart (Not Included), as shown in the image.

NOTE: It is internally layered with a soft carpet that protects both the items placed in the drawer as well as the drawer from scratches.

 Align the drawer to the bottom of the Cart and create markings in place of the holes engraved on the Cart.

 Now, using a drilling machine (Not Included), drill six holes where the markings are, as shown in the image.

NOTE: The drawer is affixed to your Cart by drilling holes into the cart, ensuring a solid and secure attachment.

 Matching the drawer and Cart holes, insert a screw and properly tighten using a 2.5mm
Allen Key.

 Follow the same process for inserting all the screws.

NOTE: The soft-closing sliding mechanism prevents the gear inside the drawer from smashing & hitting together.

NOTE: Smart-Lock Drawer is a deep & fully enclosed drawer that stores all suitable video production accessories & facilitates convenient access to them.

• Remove both the bolts of the lock using an Allen Key, as shown in the image.

• Attach the lock to the bottom of the Cart and mark the holes.

 Now, drill holes in those marking points using a Drilling Machine.

• Insert the bolts by properly matching the holes.

• Insert the nuts and properly tighten using the Allen Key.

NOTE: Hold the nut using a Plier (Not Included) and tighten it using an Allen Key.

• The lock has been properly inserted into the cart.

• Set the drawer's number lock according to your preference.

NOTE: You can mount 3 drawers in Victor V1-42 cart, at top -2 & bottom -1 drawer.

NOTE: It features a 3-digit personalized a combination lock that ensures your valuables are fully protected.

NOTE: If you own the latest version of Victor V1, Victor Lite, or Atlas Cart, you'll find that the cart comes equipped with pre-drilled holes for your convenience.
