Bag Packing

SuperGrip Suction Car Mount Setup

Assembling of Vibration Isolator with SuperGrip Suction

- Align the arm to one of the corners of the Vibration Isolator, and then insert the bolt.

- Tighten and secure the bolt using the Allen key, and attach the remaining arms to the corners of the Isolator.

NOTE: Use the vibration isolator separately in Over-slung or Under-slung, whether on a vehicle, crane, jib, or dolly.

- Remove the black dust cover of Suction Car Mount.

- Align the Suction Gripper with the screw hole provided in the arm, and then properly tighten the assembly.

- Attach the remaining cups properly.

Suction Grippers Assembly

- Place your suction grippers at the desired point on your car.

- Press down the suction Grippers and keep pushing the pump to firmly fix it onto the car surface. Repeat this process for all the suction cups.

Caution: Recheck the Pump every 90 minutes. If the red line is visible. Re-pump the cup without losing the remaining vacuum till the red line disappears.

- Place the DJI-QR Plate (**Not Included**) on the Suction Car Mount, and then insert the two Allen bolts.

- Both the bolts need to be tightened using the Allen key.

- Push and open the lock lever of the DJI-QR plate.

- Then attach the gimbal by sliding it onto the DJI-QR plate of the suction car mount and tighten it with the help of the knob provided on the DJI-QR plate.

- Unlock the knob of the Gimbal (Not Included) and remove the plate by employing the push pin.

- Align the gimbal plate to the thread at the bottom of the camera, and then insert the bolt and tighten it using a screw driver.

- Tighten and secure the assembly with the knob provided on the gimbal, as shown in the image.

**YOUR PROAIM SUPERGRIP SUCTION CAR MOUNT
ALL DRESSED UP AND READY TO GO!**
