

We've added a Web License upgrade on this product to give you more freedom in how you share the video master with your congregation. The web license includes our standard license (public performance in a single church setting), as well as a couple of additional features. However, it's important to know that you must also have a CCLI Streaming License to use the included song legally. The permissions we're granting apply only to the video master and not the underlying song. Go to: <https://us.ccli.com> › streaming

The Web License allows you to:

- Post the video on your website (using a native player)
- Include the video in a live stream of your service online
- Include the video in a recording of your service online

The Web License DOES NOT allow you to:

- Upload the video to youtube or other video sharing sites UNLESS posted in the context of a service
- Broadcast the video on television or any other medium

*** While this license makes the content available for you to use in these ways, we cannot guarantee that social sharing sites like Facebook and YouTube will not flag or block this content unintentionally. We encourage testing to ensure these possible issues don't arise as you stream or share your service online.**

**** Streaming Worship Tracks requires a CCLI Streaming License**
