

How to find your size

Bangles

✓ Tuck your thumb in your hand. Wrap the sizer around your hand and thumb at the widest point. Pull the sizer in to find your size.

✗ Do not measure around the wrist as the bangle will need to slide over the hand.

✓ You can also use a tape measure if you have one available, always making sure to measure at the widest point of the hand with the thumb tucked in.

✓ To find your size, note the length on your tape measure and check it against this chart:

XS	185mm	L	210mm
S	190mm	XL	220mm
M	200mm	XXL	230mm

The bangle sizer must be printed at 100% scale.

To check that the bangle sizer has been printed properly, use a ruler to measure the line below. It should be exactly 2.5cm.

Please note that bangle sizer is an indicative guide only and therefore may not be an exact measure.
