REVERIE

FOR THOSE WHO DREAM

SUSTAINABILITY REPORT

She lived and lived well, curating the life of her dreams. And all the things she surrounded herself with - her homewares and art, clothes and accessories, books and flowers... were as elegant and tasteful and timeless as she.

ABOUT REVERIE

Reverie is proudly Australian designed, made and owned. Every piece in the collection is constructed in our luxurious, eco fabric, woven from the finest yarns and fibres. From fabric through to finished design, Reverie is a celebration of Australian craftsmanship.

We're for women who know they can be stylish, comfortable and sustainable.

Reverie is unreservedly committed to sustainable and ethical production practices. Our entire collection is made in facilities which meet all standards for ethical clothing manufacturing. We're also dedicated to ensuring our production process is as sustainable as possible, from manufacturing to shipping.

We don't design for momentary trends. We mindfully design for comfort, understated elegance and timelessness.

Owning a piece of Reverie is owning a timepiece of stunning quality and effortless style you'll live and dream in for years to come.

- To reduce carbon emissions, Reverie is dedicated to keeping majority of fabric production and 100% of garment manufacturing local within Australia
- Small manufacturing runs to ensure no stockpiling and mass production
- Inclusive brand with sizes ranging from an XS to 3XL

All components of each garment and product were thoughtfully and carefully considered throughout the design process.

FABRICS

SILK SUPPLIER

- Made in China due to no current Australian Silk Manufacturers
- Oekotex 100 rating
- WCA Report
 - Score 100% in Labor
 - Score 100% Environment

All fabrics have been intentionally developed to incorporate stretch only with natural components. There are no plastic components (spandex, elastane, nylon, polyester) in any of Reverie's fabrics.

All components are eventually 100% biodegradable. By having 0% plastic, the garments are therefore also eliminating any potential microplastics to be sent into the earth's precious waterways. Each fabric has been considerably developed and created to work with the natural stretch of the fibre, rather than adding plastic components to facilitate this.

PACKAGING

STICKERS

- Compostable
- Compostable inks
- 100% FSC Certified

TISSUE PAPER

- Compostable
- Soy-based inks
- Acid Free Paper
- 100% FSC Certified

BOXES

- Recyclable

ACCESSORIES

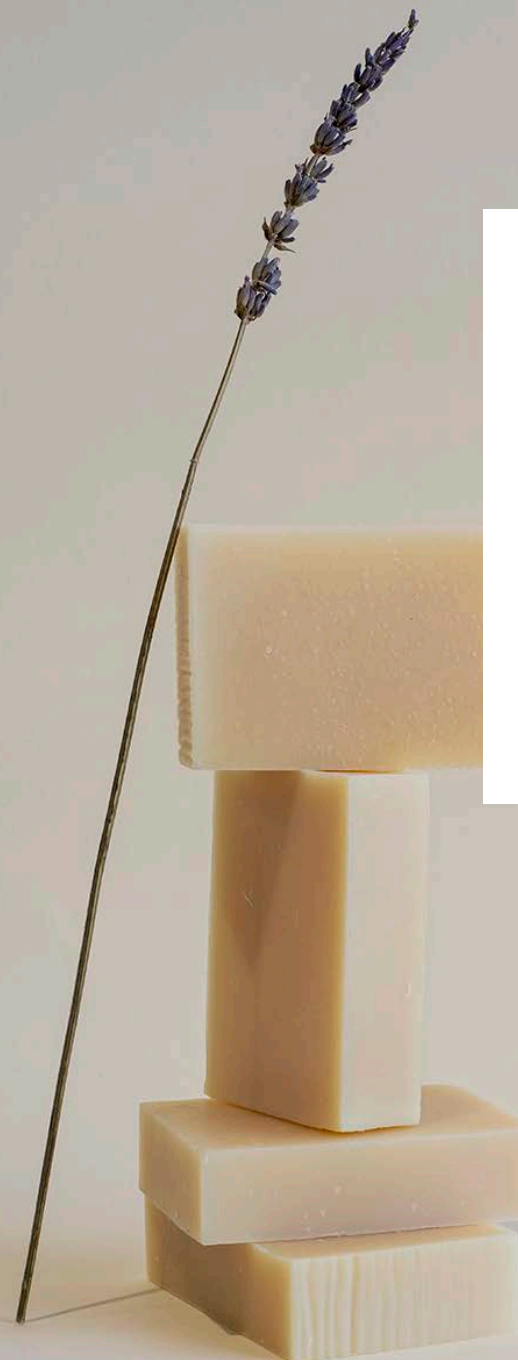

SOAP

- Handmade in Australia
- No Palm Oil, no chemicals, phosphates, sodium lauryl sulphates or parabens

TEA

Certified Organic Lemon Myrtle

- Grown under strict pesticide-free standard in northern New South Wales region
- Grown, made and packed in Australia
- Compostable packaging

REVERIE FACILITY

ETHICALLY MADE

- 50% of production is sewn in an Australian facility that holds Ethical Clothing Australia Certification

BRISBANE BASED

- Remaining products are sewn at our HQ - our owned facility based in Brisbane shared with our sister brand, dk active
- Both factories run on Solar Power

We're cognisant of the impact of all external factors that come into play when running a business. Because we're into actions, rather than words, here's how we're taking tangible steps to combat those contributions.

Carbon neutral shipping to reduce our carbon footprint

Keeping as much fabric production as possible within Australia. All garments are Australian made

Using sea freight for international imports rather than air which reduces carbon emissions and dependence on fossil fuels

Shipping our parcels in entirely compostable or recyclable packaging

Powering our HQ on solar, and feeding back the excess energy we generate into the energy grid

Favouring fabric mills who also operate on solar power

Supplier offers on-site 5 stage water treatment plant. Up to 85% of its water is able to be reused - either back through the manufacturing process or via 3rd party recycled water programs for agriculture parklands and industry
