

TE01

Temperature Sensor

Introducing TE01, the futuristic Temperature Sensor Assembly series, perfect for diverse applications like ovens, hot air generators, thermic heaters, cooling water systems, hvac units and more.

It offers the unique option of integrating a temperature transmitter inside the head, streamlining the setup process and delivering 4-20mA, 2-wire output. This advanced feature enhances efficiency and accuracy in temperature monitoring, making TE01 the ideal choice for precision-driven industries and applications.

SPECIFICATIONS

Sensing Element	: DIN PT100/ PT1000/ NTC Sensor
Temperature Range	: -50 to 550°C
Accuracy	: Class A \pm 0.15%
Response Time	: T50 = 9s T90 = 28s
Sleeve MOC	: SS316
Sleeve OD	: in mm (as per order)
Sleeve Length	: in mm (as per order)
Sleeve End	: Open for media air Closed for other media
Head	: Aluminum die cast Cover with chain
Protection	: IP65
Electrical Connection	: Cable Gland PG11 (as per order)
Process Connection	: ½" BSP M (adjustable or as per code)
Transmitter	: Optional transmitter 4-20mA , 2wire Fitted inside head
