

Aries “Work Week” Barrier Face Covering

Wearing a mask should not be an unpleasant experience. What good is a high filtration mask if you are constantly removing or adjusting it throughout the day just to breathe? And what good is a comfortable mask if it doesn't protect?

Made from Captur™, a novel, engineered fabric technology, the Aries “Work Week” Barrier Face Covering mask meets ASTM level 2 ratings for breathability and filtration (see the next page for details). It can be worn up to 40 hours and offers the best fit, most comfort, filtration and breathability available in a face covering.

Best-in-class nose wire for tighter seal reduce leakage and glass fogging, while providing all day comfort

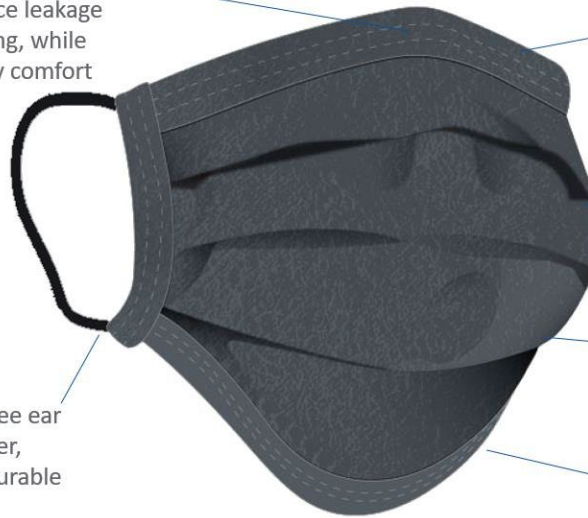

Made of Captur™, a novel, engineered fabric technology that combines high levels of protective filtration and maximum breathability

Includes Ingeo™ biopolymer for improved durability, softness, and lower carbon footprint

Patented, latex free ear loops for softer, consistent, and durable wear

Thick pleats for enhanced fit, comfort, and breathability

Larger frame to cover nose, mouth and chin to enhance comfort and minimize leakage

100% American Made

Aries Performance

In February 2021, ASTM International, issued a new standard for Barrier Face Coverings (BFC). The standard is intended to establish a baseline for general face masks, focusing on how well they filter particulates, deliver comfort and breathability and their re-use potential.

The new ASTM standard helps companies make informed decisions on the face coverings they are providing employees, including what filtration levels they need to provide for maximum safety and how much breathability they are delivering. Aries delivers Level 2 Performance for both standards.

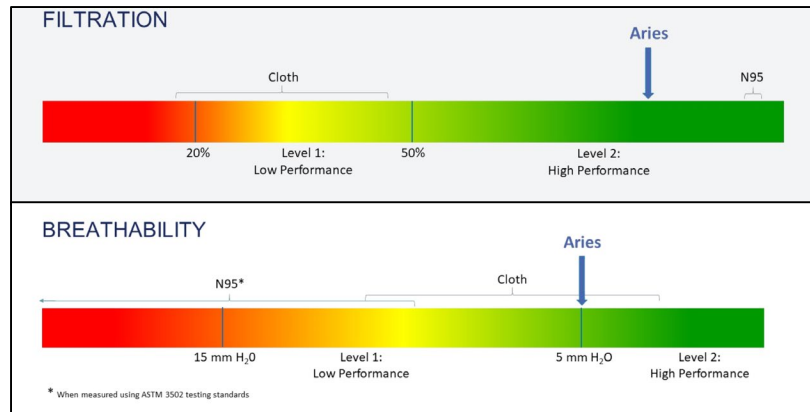

Filtration & Breathability

Filtration:

Sub-micron particulate filtration efficiency effectiveness of barrier face covering for capturing small particles from wearer; larger percentages indicate higher performance

Breathability: Air-flow resistance

Indicative of ease of breathing while wearing barrier face covering; lower resistances indicate more breathable products

Product Specifications	
Purpose	Used as source control to minimize the projection of expelled materials from wearer's nose and mouth
Form Factor	Flat-fold, pleated form, designed to last for a 5-day, 40-hour work week
Materials	85% polypropylene, 15% Ingeo™ biopolymer (sustainable polymer, delivering a lower carbon footprint). Patented Polyester/spandex ear loops
Size	One Size Fits Most
Reuse	Each BFC is designed to last for a typical 40-hour/five-day work week; 5-year shelf-live in storage
Manufactured	All materials are made and assembled in the USA

Warning:

- The Aries Barrier Face Covering is not a medical mask as defined in ASTM F2100, is not intended for use in medical procedures, and is not a respirator.
- Barrier face coverings should not be placed on very young children (<2 years) or anyone who has trouble breathing, or anyone who is unconscious, incapacitated, or otherwise unable to remove the barrier face covering without assistance.
