Note: Colours displayed are a guide only

The Quickscreen system is extremely cost effective. Each slat is screwed off once in postion. The system allows for variable slat spacing so any gap is achievable. Once slats are screwed off, a snap on cover hides the fixings to provide a seamless finish.

For horizontal slat screening, generally the side frame is screwed directly to a post or wall without need of another U channel or angle.

In 'void' situations where slats cannot be fed in from top down, an F section is available. The F section can also be used where it is preferred to pre-make complete panels in a factory and simply install onsite.

For raking panels/angles, slats can be cut at an angle and screwed off making Quickscreen an ideal solution for difficult installations.

Available in long length supply or custom cut to size ready for assembly.

SYSTEM ADVANTAGES

Concealed fixing: screws are hidden – clean finish!

Low maintenance – unlike timber screening

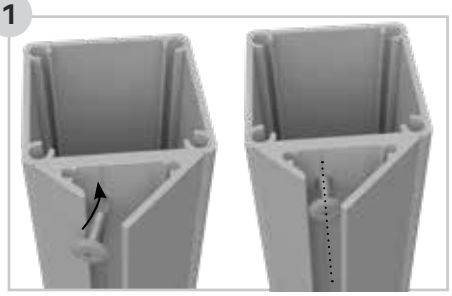
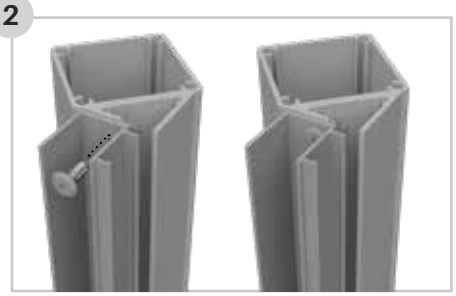
1



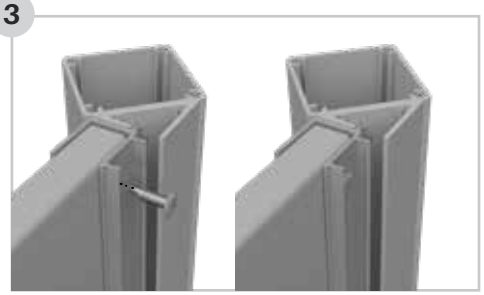
Place 135 adapter against post/wall. Insert screw into void opening. Screw fix adapter using V groove as a guide to fixing location.
TIP: pilot hole drill before screw fixing;
max screw head size is 10mm.

2



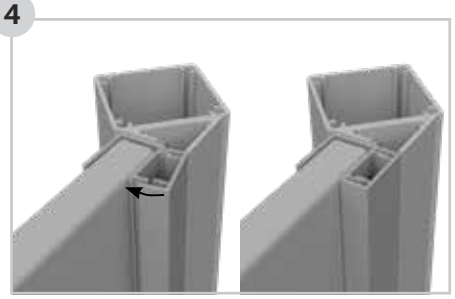
Screw fix Quickscreen Side Frame to 135 adapter fixing through adapter short leg.

3



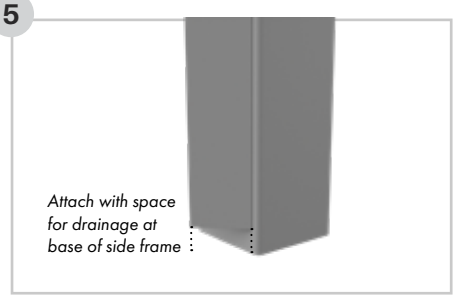
Insert slats into Quickscreen side frame and fix off slats.

4



Snap on concealed fixing cover. Lever into place with short leg going on first then levering on long leg to snap into position.

5



135 adapter should be cut so that it is elevated from floor and at the same length as Quickscreen Side Frame.

65mm slat spacing table

HORIZONTAL SLAT SYSTEM

Slat Qty
Total number of slats required for height shown in corresponding rows

Slat spacing
Height of gap between each slat

Height
The Quickscreen side frames allow for variable gap spacing as each slat is fixed off at desired position. Any gap is achievable. Shown are specifications for the popular spacings of nil, 5mm, 9mm & 20mm spacing.
The formula to calculate variable gap screen height is:
((65mm (slat height) + desired gap) x number of slats) - desired gap + 3mm (for top cap).

For example, a 30mm desired gap with 14 slats: (65 + 30) x 14 - 30 + 3 = 1303mm high

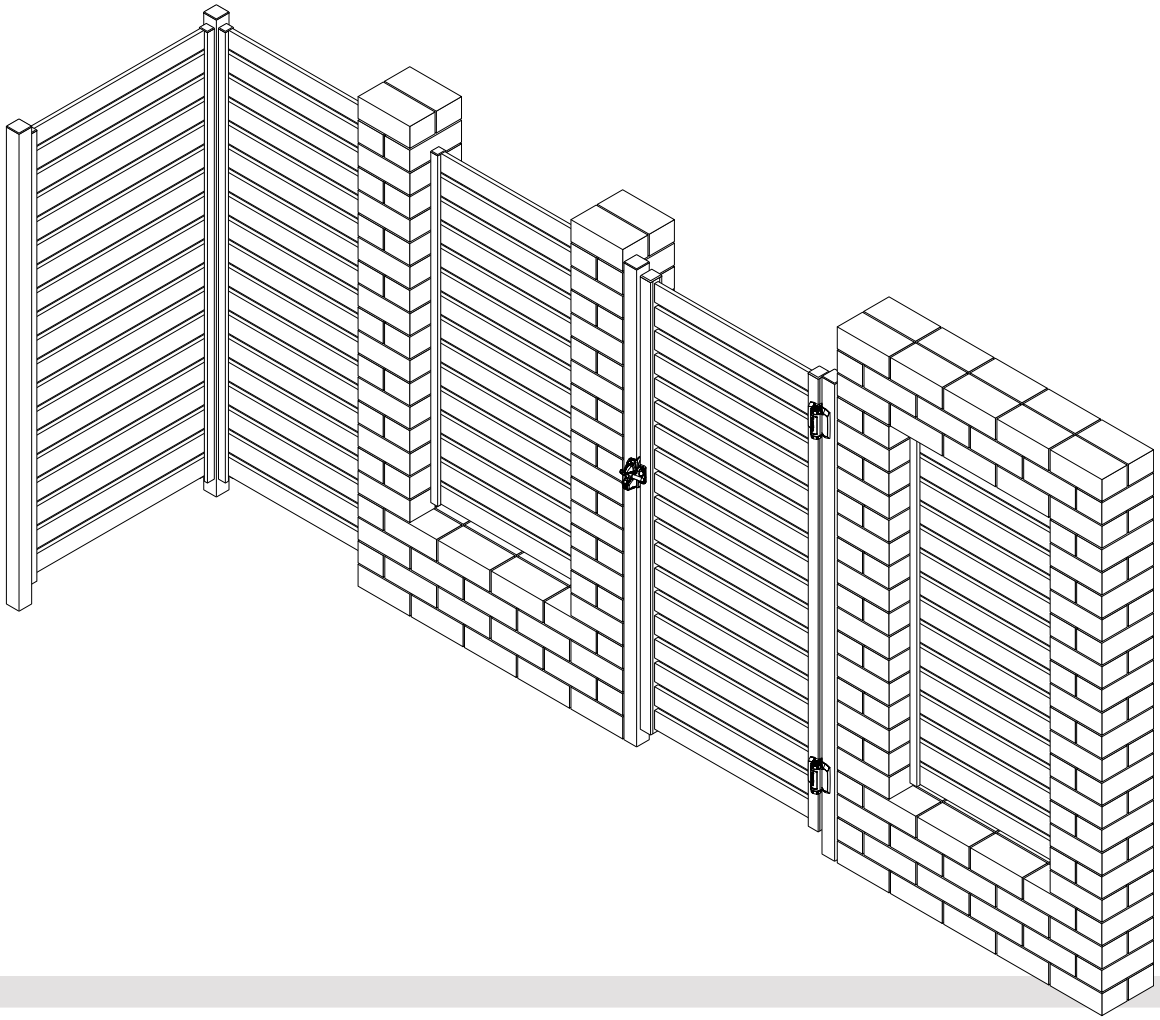
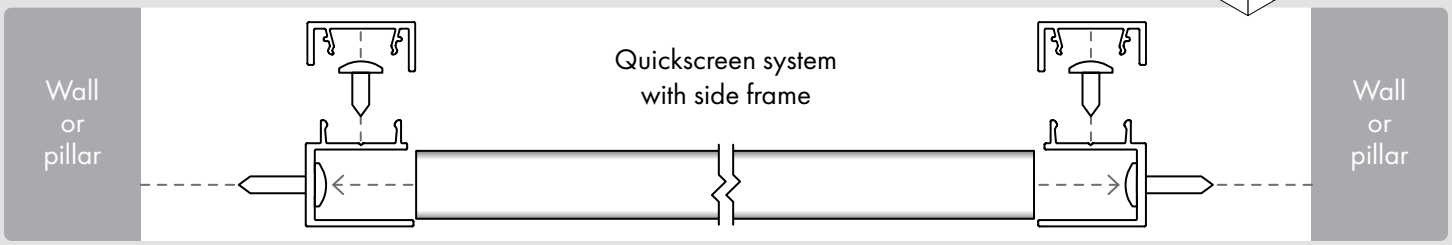
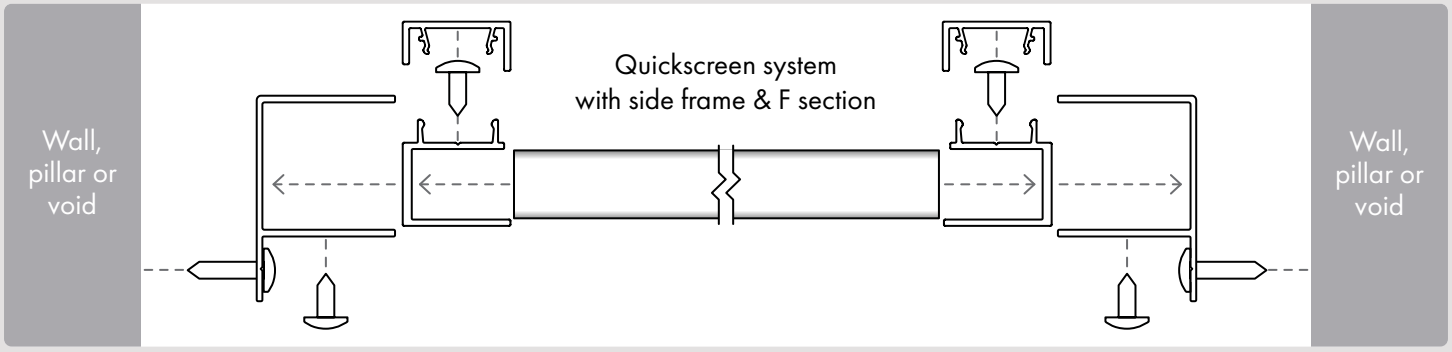
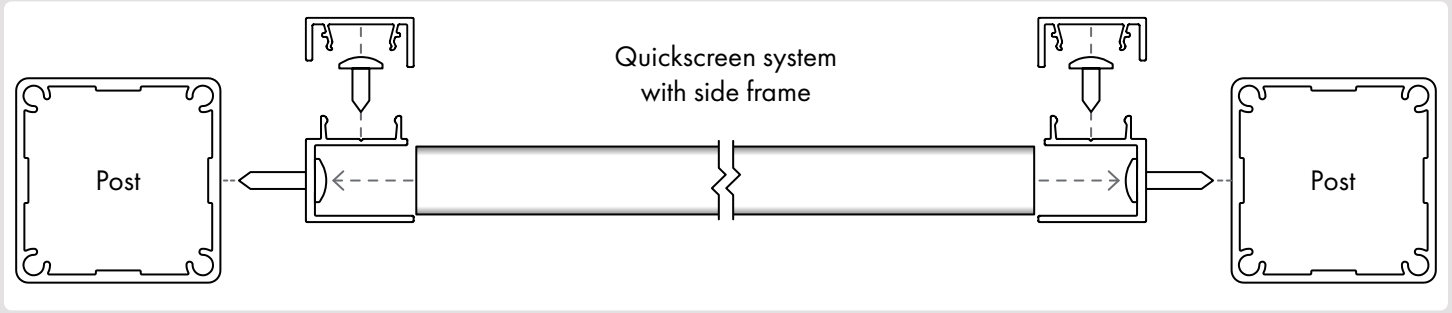
HORIZONTAL SLAT INSTALL GUIDE



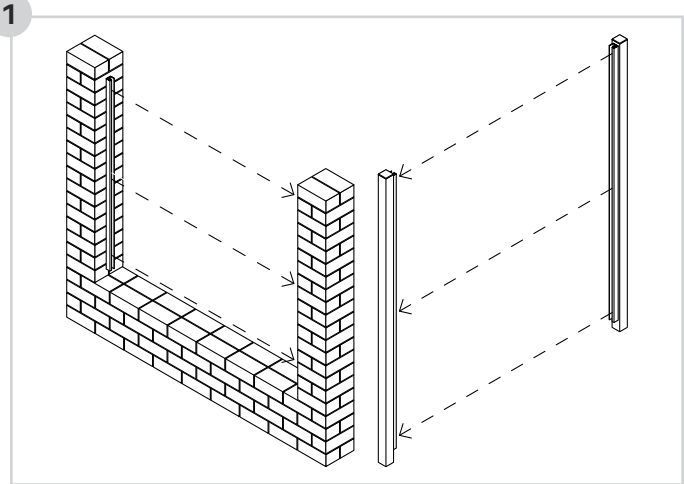






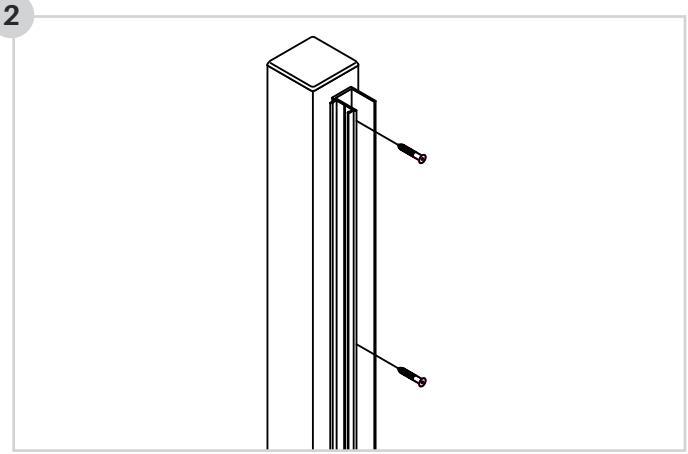
HORIZONTAL SLAT INSTALL GUIDE

1



Take measurement between walls or posts at 3 points: top, middle and bottom (Take note of the smallest measurement)

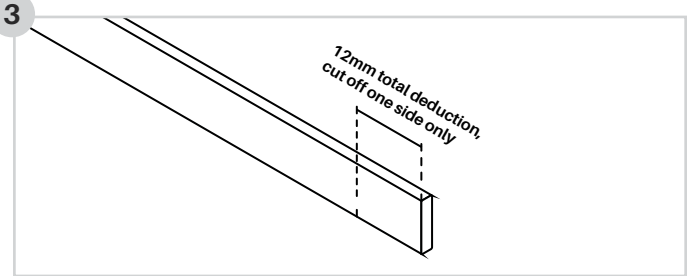
2



Cut side frames 3mm less than desired height (3mm allows for the top cap)

Affix side frames to wall or post with appropriate fixings

3

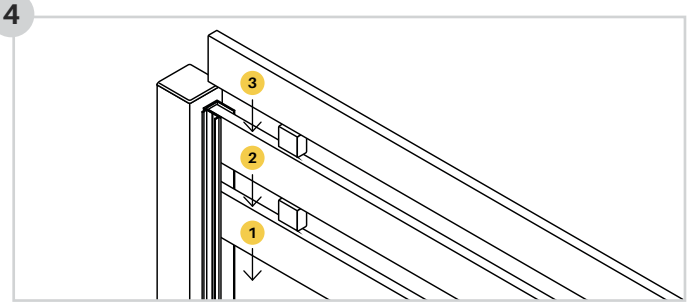


Cut aluminium slats 12mm less than total width of opening (Refer to measurement in step 1)

The 12mm deduction takes into account thickness of side frame on both sides of the screen and head of fixings.

Ensure fixings holding side frame do not obstruct slats when dropping in. If so, you may need to trim slats further.

4

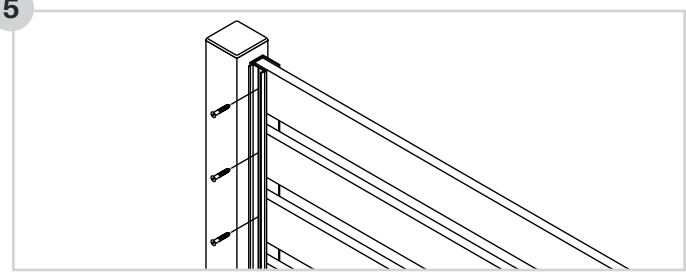


Drop in aluminium slats

Tip: Ensure bottom slat is level and screw off at both sides

Optional spacer blocks can be rotated to achieve a 9, 15 or 20mm slat gap. Any gap can be achieved by leaving a desired space. Consider using timber block spacers to achieve other gaps.

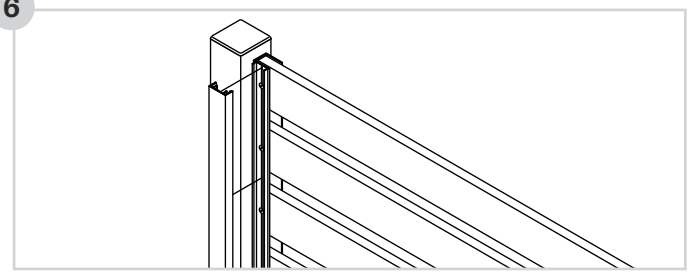
5



Screw off each slat as it is dropped in (ensuring each slat is level)

If spacer blocks used, remove after each level is installed.

6

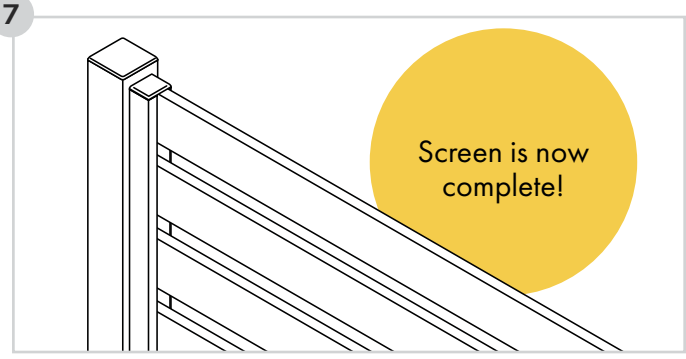


Cut snap on fixing cover to appropriate height

Attach snap on fixing cover to hide screws

Tip: If screen is wider than 1800mm, it is recommended to attach the centre support rail vertically at the centre of the screen. Cut centre support rail to appropriate height of screen and screw off to each slat at back side of screen

7

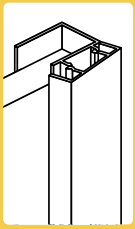


Snap on fixing cover install tip

Engage shorter leg of snap-on cover first.

At this point, the snap-on cover will be sitting off the side frame on an angle.

The longer leg must be at open side of side frame.



Starting from the top and working your way down, use a wood block and a hammer/ mallet to tap the longer leg into place.

A short, sharp tap may be required to engage the long leg.

VERTICAL SLAT SYSTEM

Vertical slat is a stylish screening solution that continues to increase in popularity. The Quickscreen System allows 65x16.5mm or 90x16.5mm slats to be installed using a cost effective top/bottom rail system. Each slat requires screwing off at top and bottom. Screws are hidden by a heavy duty "U" section at top and bottom. An "F" section is installed vertically on both sides which allows easy installation between posts or pillars. A complete system is available – panels, pedestrian gates and sliding gates.

Ideal for installations between pillars and existing posts!

Available long length supply or custom made to size & flat packed.

ASSEMBLE ON-SITE OR IN YOUR WORKSHOP —

Panels fit into F section on both sides for easy installation. Problems with out of square pillars or posts can be easily overcome with F section fitting.

1. F section
2. U channel top/bottom rail
3. Quickscreen frame
4. 65mm x 16.5mm slats (90mm x 16.5mm slats also available)

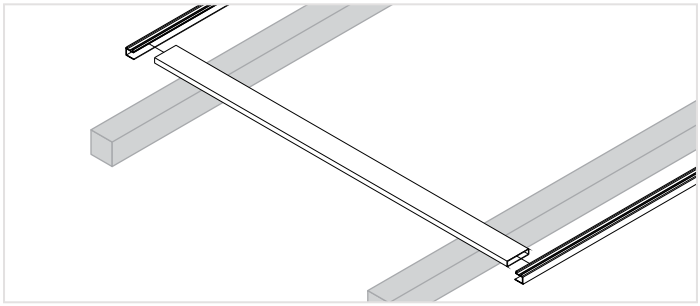
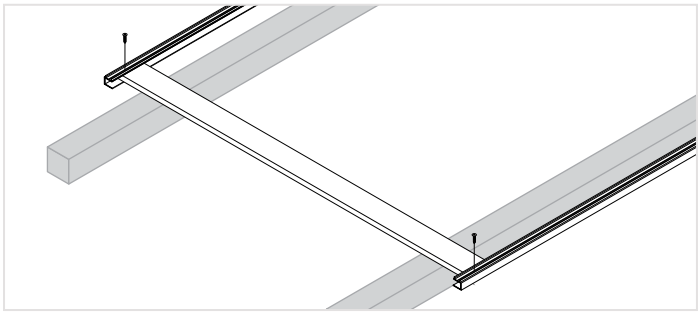
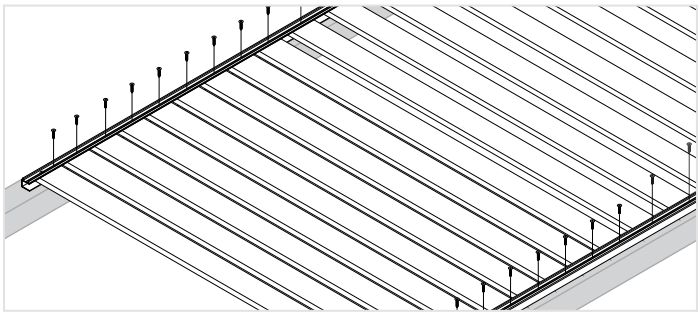
VERTICAL SLAT INSTALL GUIDE



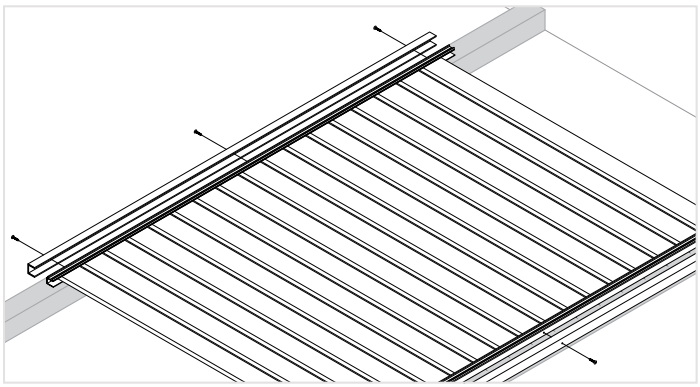
1 Place first slat on padded bearers, then place the top and bottom frames onto the slat.



2 Position front edge of slat required distance from the edge of the top and bottom frame and screw through frame to affix at both end of the slat with 1x screw per end.

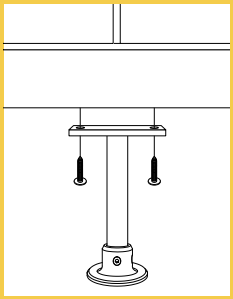


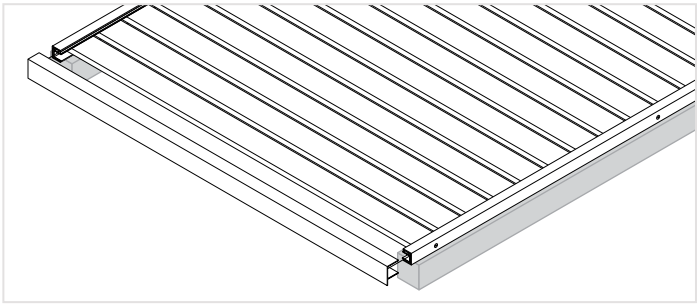
3 Slide remaining slats into the top and bottom frame and attach with single screw through top and bottom frames to affix, then check measure diagonals. Double screw fix first and last slats. **Keep slat spacing in mind!**



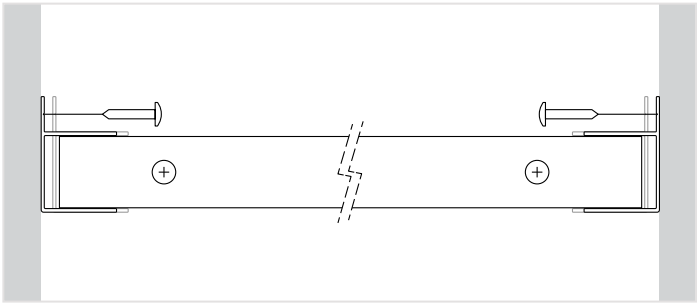
4 Place U channel over top and bottom frame, pre-drill 3mm holes and screw off in three points on top and bottom of the U channel – Measure in 50mm from the left and right edges, then one in the centre. **Ensure sufficient pilot holes are drilled before affixing, making sure they won't hit other screws.**

For panels over 1800mm wide, we suggest using a height adjustable foot underneath screen to prevent sagging of panel. Pre-drill 3mm holes and affix with screws. If using the height adjustable foot there is no need for a screw in the middle of the bottom rail.

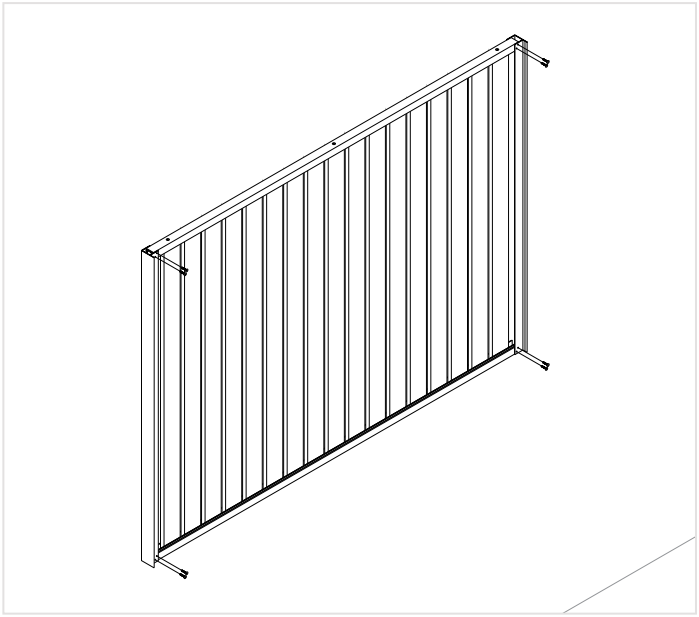




5 Place F section over each side of panel – F section will stay in place without screws until the last step.



6 Lift panel into opening and push F section out to sit flush to wall then affix F section to wall (fixings not included). **Ensure sufficient pilot holes are drilled before affixing.**



6 Affix panel to F section by pre-drilling 3mm holes and screwing through F section in corner positions – we suggest using 2 screws in each corner

SIDE FRAME SYSTEM OVERVIEW

Australia's leading slat screen system | **Designed & patented Exclusive to GO & AO** | **Save time & money**

Xpress Plus side frames feature patented internal legs designed to hold slats firmly in place. This innovative design feature allows assembly of pre-powder coated aluminium and does not require welding, screwing or riveting off each slat.

Ideal for installations between pillars and existing posts!

Horizontal slat screening system

TWO ASSEMBLY METHODS —

1. Build as you go: Affix side frames to post or wall and install slats working from the bottom to the top. No U channel or F section required.

2. Pre-assemble: Assemble panel in workshop or onsite. Install assembled panel using U channel or F section.

HIGHEST QUALITY WITH 10 YEAR WARRANTY —

Industry leading trade quality system. Extruded and powder coated in Australia. Genuine Interpon powder with 10 year Warranty. Large range of pre-powder coated stock available.

QUICK & EASY INSTALLATION —

Enjoy the benefits of our patented system allowing for assembly without need of welding, screwing or riveting off each slat.

COMPLETE SYSTEM —

Xpress Plus is a complete system consisting of slats, side frames, caps, posts, pedestrian gates and sliding gates. Highest quality product at the best trade prices.

VARIABLE SLAT SPACING —

Achieve any slat spacing desired. Slats are separated with slimline spacers that snap into the side frame. Stocked spacers are 5mm, 9mm and 20mm. 100mm lengths also available for cutting to required gap.

A premium aluminium insert with 9mm or 20mm spacing is also available to suit 65mm x 16.5mm slat.

THREE SLAT OPTIONS —

Choose from our range of 65mm x 16.5mm slats with or without centre web or 90mm x 16.5mm slats in stock to suit side frames.

EXTRUDED & POWDER COATED IN AUSTRALIA

HIGHEST QUALITY FINISHES —

Our range of genuine Interpon D1000 series powder coat finishes has been carefully selected to include the most sought after colours on offer.

All components are suitably pre-treated prior to powder coating and are applied by fully accredited coating facilities.

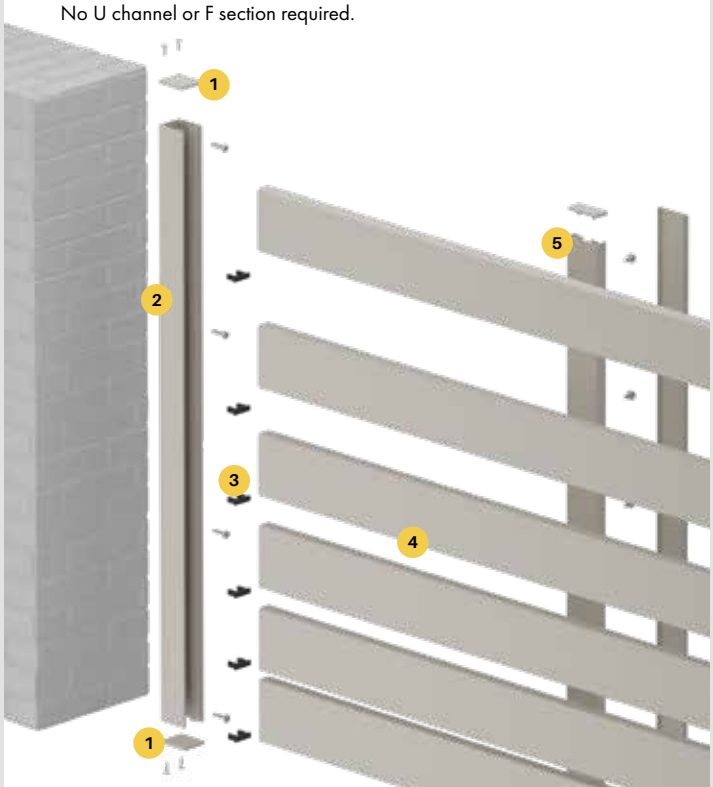
SIDE FRAME INSTALLATION OPTIONS

Enjoy the flexibility of installing Xpress Plus patented side frames via two convenient methods

METHOD 1

BUILD AS YOU GO —

Pre-powder coated Xpress Plus side frames are affixed to a wall or pillar.
Slats are then inserted from the bottom working upwards to completion.
Slats are separated by snap in spacers.
No U channel or F section required.



1. Side frame end plates
2. Patented Xpress Plus side frame
3. Snap-in spacers
4. 65mm x 16.5mm slats (90mm x 16.5mm slats also available)
5. Centre support rail (Recommended for use on screens over 2000mm wide)

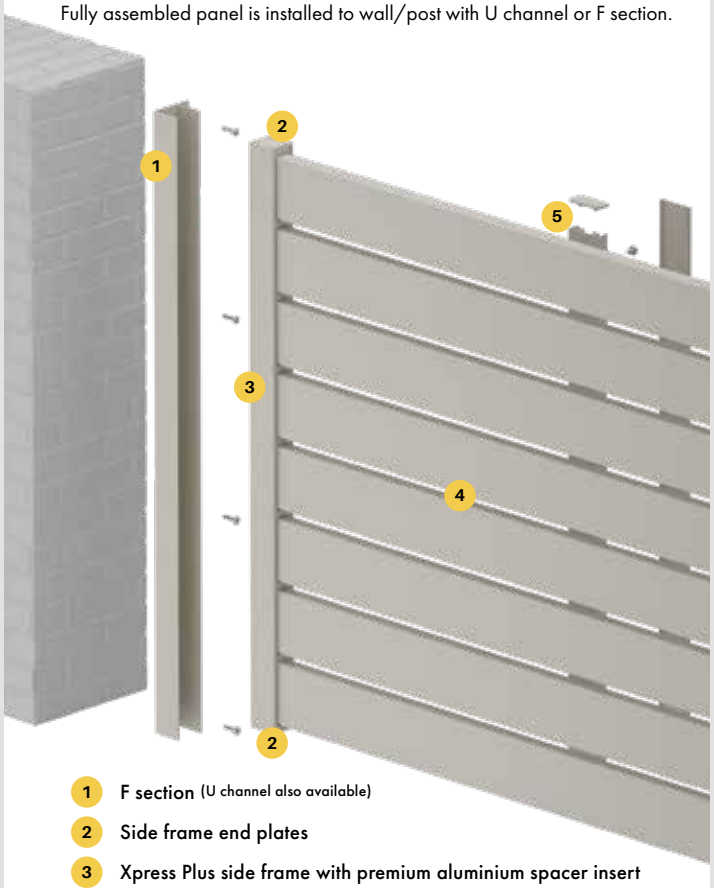
BENEFITS & FEATURES —

- Assemble on-site with pre-powder coated material – quick and easy!
- No welding, riveting or screwing off slats required
- No need for U channel or F section – Side frames affix directly to wall or post
- Patented side frames overcome out of square wall/posts: Friction fitting of slats into side frame allows slats to laterally adjust if needed
- Side frame suits 65mm x 16.5mm or 90mm x 16.5mm slats
- Variable slat spacing: Spacers for 5mm, 9mm or 20mm are available or easily achieve unique spacing by cutting to size from 100mm spacer blocks.
  For privacy/nil spacing, simply stack slats on top of each other

METHOD 2

PRE-ASSEMBLE PANELS —

Screen panels are assembled at a workshop or onsite.
Slats are separated by snap in spacers OR via premium aluminium insert.
Fully assembled panel is installed to wall/post with U channel or F section.



1. F section (U channel also available)
2. Side frame end plates
3. Xpress Plus side frame with premium aluminium spacer insert
4. 65mm x 16.5mm slats (90mm x 16.5mm slats also available)
5. Centre support rail (Recommended for use on screens over 2000mm wide)

BENEFITS & FEATURES —

- Pre-assemble panels in workshop or onsite prior to actual install
- Install with U channel or F section – Overcome out of square walls/posts with forgiveness in U channel or F section cavity
- No welding, riveting or screwing off slats required
- Create gaps between slats using snap in spacers OR premium aluminium insert
  Premium insert suits 65x16.5mm slat only with 9 or 20mm slat pacing
  Snap in spacers of 5mm, 9mm or 20mm available or create your own unique spacer
  For privacy/nil spacing, simply stack slats on top of each other
- Use of premium aluminium insert spacer enables assembly of mill finish panels which may be powder coated as a completed unit
- Side frame suits 65mm x 16.5mm or 90mm x 16.5mm slats

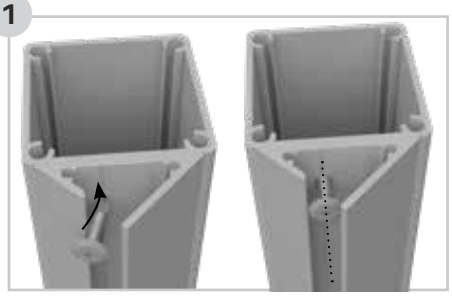
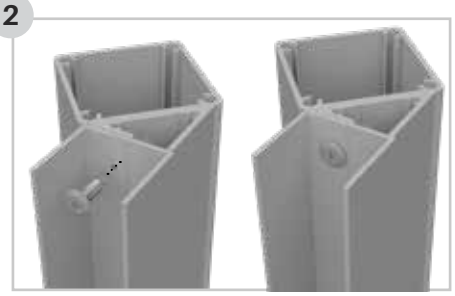
1



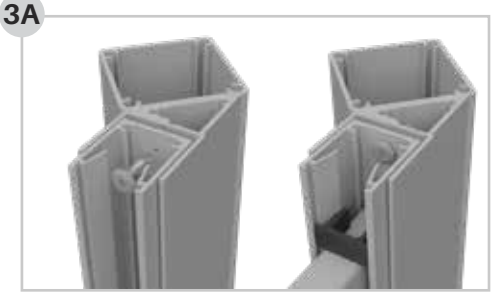
Place 135 adapter against post/wall. Insert screw into void opening. Screw fix adapter using V groove as a guide to fixing location.
TIP: pilot hole drill before screw fixing; max screw head size is 10mm.

2



Xpress Plus Options:
Attach U Channel to 135 adapter fixing through short leg of adapter.

3A

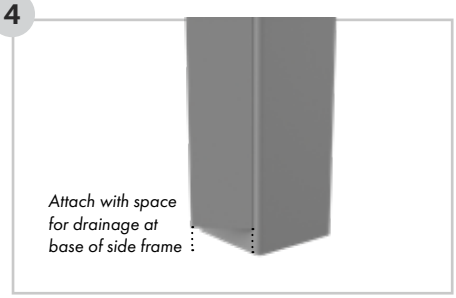


Xpress Plus BAYG:
Install side frame into U channel screwing off side frame through the centre.
Construct panel by installing slats and spacers one by one, starting from bottom.

3B

Xpress Plus Premium:
Construct panel using side frame, premium insert and slats. Then drop entire panel into U channel and screw off to fix into position.

4



135 adapter should be cut so that it is elevated from floor and at the same length as Xpress Plus Side Frame.

TRADE TIP: CENTRE SUPPORT RAIL

The centre support rail is commonly used to brace off slats in wider screens. If you need to add extra rigidity to the screen, the centre support rail can also be screw fixed at top and/or bottom with our centre support rail **top/bottom plate**. This is ideal for use on wide slat screen panels or panels installed in high wind areas.
The specially designed **top/bottom plate** seamlessly attaches to the centre support rail extrusion providing a hidden screw fixed bracing system.

Centre support rail top/ bottom plate

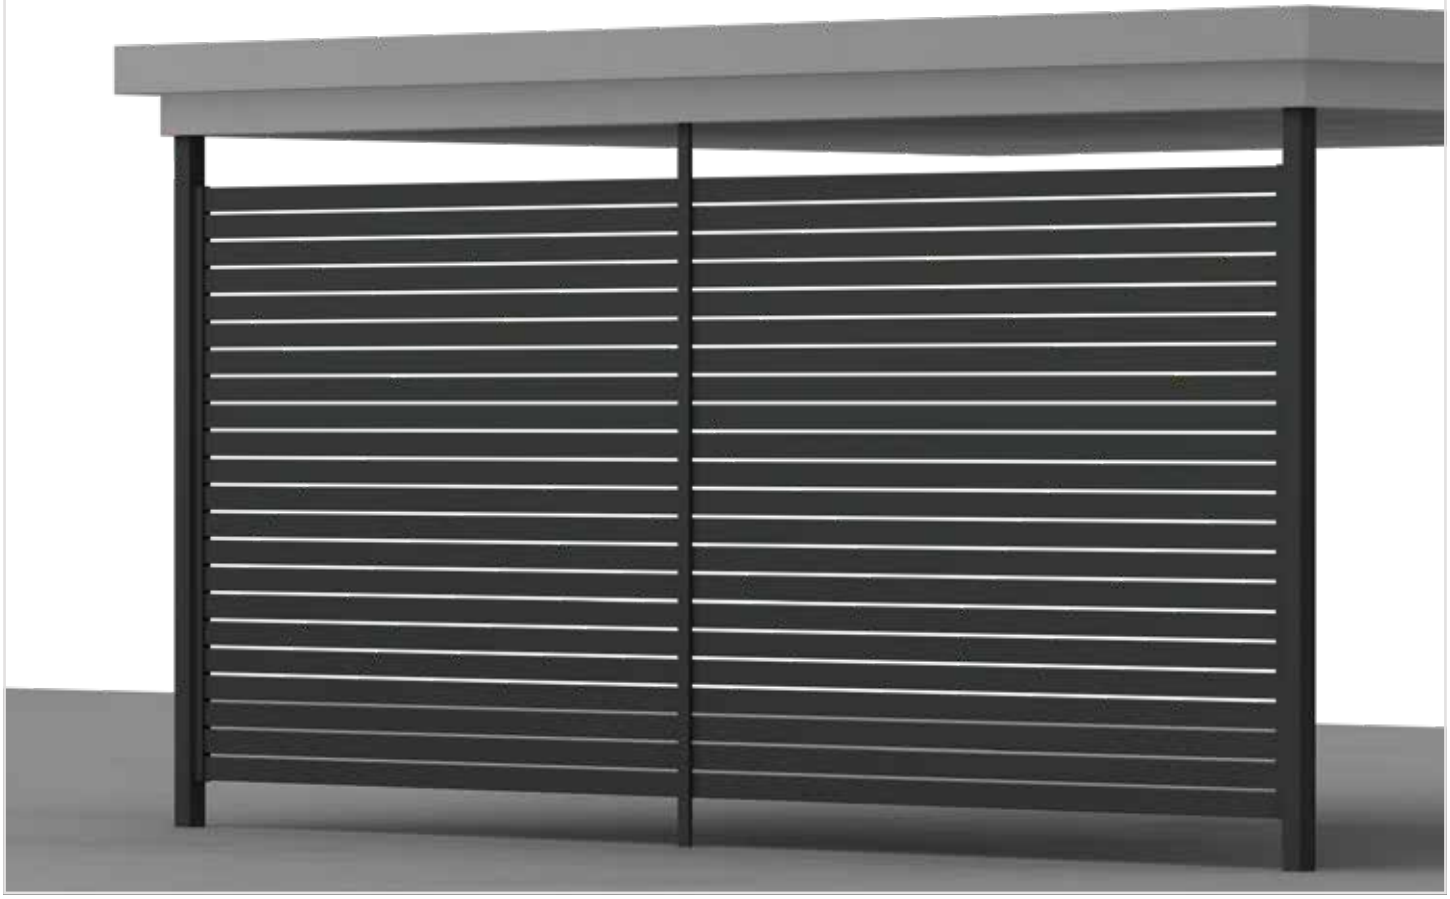
See pages 11 & 31 for more details

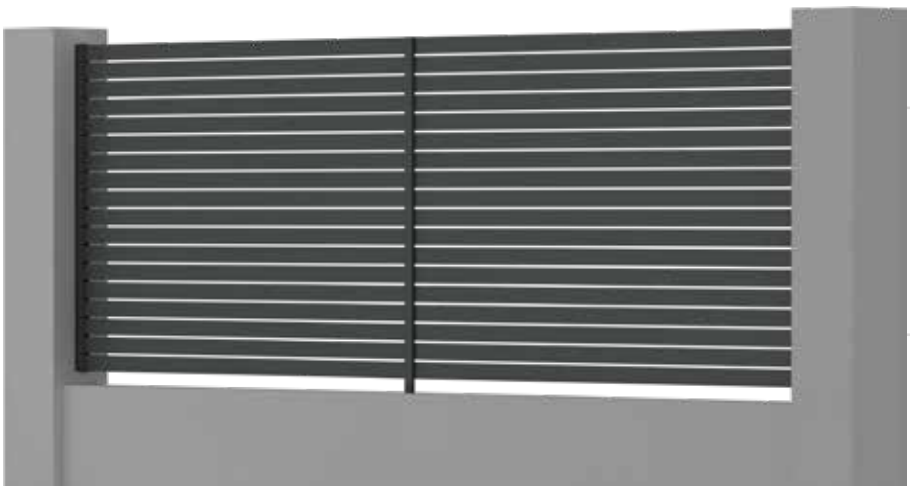
Specially machined plate screw fixes to screw flutes in centre support rail extrusion. Fix to top and/or bottom of centre support rail.
Top/bottom plate is now mechanically attached to centre support rail.

Fix off centre support rail to horizontal beam, ceiling or floor via sturdy single fixing.
Snap on centre support rail cover hides fixings for a clean finish.

Ideal for wider screen panels used in patios

Centre support rail can extend past top and bottom slats for screw fix bracing into top beam and floor.
Adds significant rigidity to screen panels.





Ideal for screw fix bracing at bottom for wide screen panels between pillars

SLAT CAPS & TOPPER

Aluminium slat installed vertically allows for a number of stylish design options including radiator/blade fencing or picket top fencing. A significant advantage of powder coated aluminium is the minimal ongoing maintenance required.

GO's systems allow for easy NON-WELD assembly achieved via hidden screw fixings. The innovative horizontal top & bottom rails have an open back cavity allowing easy entry for screw fixing of slats. Screws are hidden by a simple snap in cover giving a seamless finish.

The simple screw fix system provides a significant cost saving versus traditional fully welded/fabricated panels.

PREMIUM POST SYSTEM OVERVIEW

Australia's leading slat screen system | **Designed & patented Exclusive to GO & AO** | **Save time & money**

Xpress Plus Premium post system is Australia's premier horizontal slat screening system for fencing.

Featuring 50x50mm square posts, patented internal legs firmly hold slats in position without need of screwing, riveting or welding each slat. Slats are recessed into the post for a neat slimline finish.

The system enables the fastest and easiest onsite assembly of slat fencing with pre-powder coated stock.

Horizontal slat screening post system

ASSEMBLE ON-SITE —

Simply install posts and insert slats working from bottom to top. Slats are separated by snap in spacers available in 5mm, 9mm or 20mm heights. 100mm long spacers also available for cutting to specific gap if needed.

Starting height of slats is set by using snap-in height adjustable spacer.

EASY QUOTING & PLANNING —

Quickly and accurately plan and quote a fence using our free and easy to use calculator in Excel format. Simply put in your fence shape, height and span. Instantly receive post centres and a bill of materials for your fence.

Fast, easy and accurate!

LONG LENGTH SUPPLY OR CUSTOM CUT TO SIZE —

Long length extrusion is available or simply provide us your fence spans and we can custom cut post & slat to size.

COMPLETE SYSTEM —

50x50mm aluminium posts available in 1 way, 2 way and 90 degree configurations. Slimline side frames available separately as well as matching pedestrian and sliding gates. All systems feature patented non-weld assembly.

SAVE TIME & MONEY —

Enjoy the fastest and easiest slat fence system available utilising pre-powder coated stock. Install posts with slats in the same day. The patented system means only 1 person is required for install.

No need for screwing, welding or riveting each slat.

STYLISH DESIGN —

The patented system enables slats to be inserted directly into the 50x50mm post for a slimline finish. No need for U channel or F section.

EXTRUDED & POWDER COATED IN AUSTRALIA

HIGHEST QUALITY FINISHES —

Our range of genuine Interpon D1000 series powder coat finishes has been carefully selected to include the most sought after colours on offer.

All components are suitably pre-treated prior to powder coating and are applied by fully accredited coating facilities.

POST SYSTEM OVERVIEW

Stylish design with fast and easy installation – no welding or riveting required

BUILD ON-SITE WITH FAST & EASY INSTALL

Install pre-powder coated 50x50mm posts (core drill or base plated)
and insert slats working from bottom to top.

BENEFITS & FEATURES —

- Assemble on-site with pre-powder coated posts and slats
- 1 way, 2 way and 90° post configurations available
- Patented friction fitting of slats into posts – no need to weld, screw or rivet slats
- Variable slat spacing – 5mm, 9mm and 20mm spacers available or customise slat spacing by cutting down 100mm spacer blocks. Nil spacing can be achieved by simply stacking slats with no gap
- The starting height of first slat is set by simply snapping in infill

1. Press-in aluminium top plate
2. Slat locking clip
3. 65mm x 16.5mm slats (90mm x 16.5mm slats also available)
4. Snap-in spacers
5. Patented 50x50mm post
6. 100mm high spacer block (cut down to adjust first slat starting height)

Installation tip
Speed setting 1: Use with 76mm or larger core drill bits
Speed setting 2: Use with 63mm or smaller core drill bits

Diamond revolution drill

Core drill
Order Code: **REV-CD-2S**

- 2 speed core drill – 1500W
- Comes with case, allen key, spare set of brushes and manual
- Safety switch
- Uses common size 1 1/4" UNC male thread for diamond core bits

Technical data
Voltage: 240V
Rated frequency: 50-60Hz
Rated input power: 1500W
No load speed r/min: 2100/950
Weight: 8.8kg

Diamond revolution stand

Suits diamond revolution core drill
Order Code: **REV-STAND**

- Steel and aluminium construction
- Height: 800mm
- Base: 330mm x 380mm
- Weight: 12.6kg

Core drill template

Order Code: **REV-TEMPLATE**

- Assists with starting to core drill hole
- Stabilises the drill bit from jumping

Spirit level for core drill

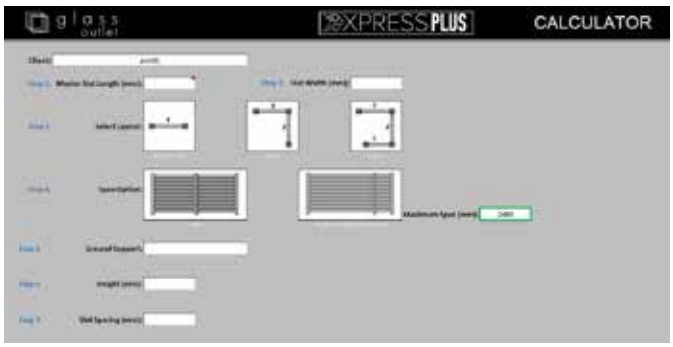
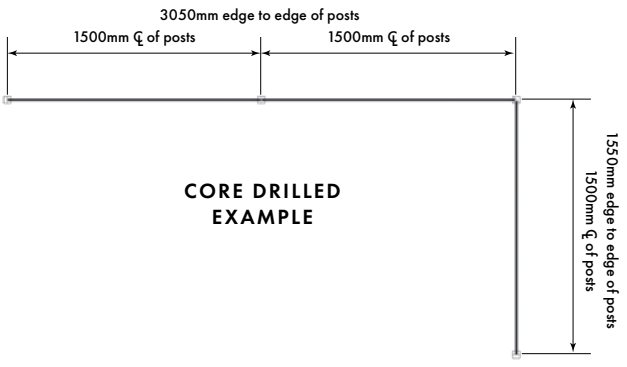
POST INSTALL OVERVIEW

1 Determine fence layout

2 Determine how posts are to be installed:

1. Core drill into concrete (recommended min. Ø76mm core hole at approx. 100mm deep)
2. Base plated to surface (base plates can be screw fixed to posts)
3. Set into ground with concrete footings (recommended footings min 600mm deep x 300mm wide with post embedded to 600mm minimum and then concrete filled)



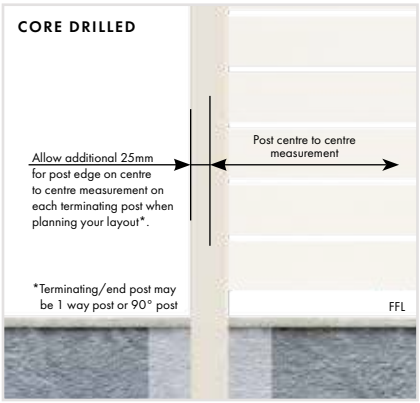


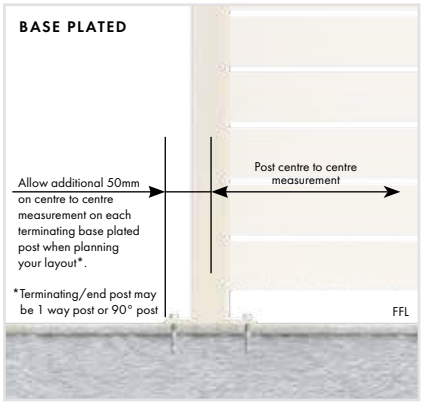
3 Determine post positions

For simplicity, calculate post positions from centre of post to centre of post.
Refer Xpress Plus calculator which provides post centres depending on layout selected.

*Recommended that post centres do not exceed 2500mm. In areas of high wind, consider restricting span widths.

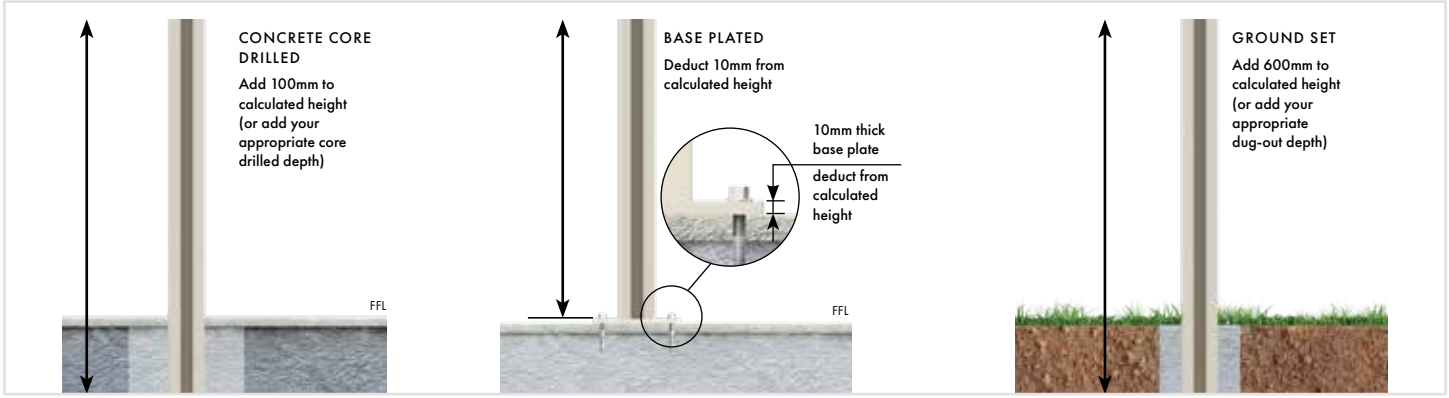
Install tip: For end or corner posts of a run, there will be 25mm extra to take into account for 'overhang' of 50mm post.
For base plated installs, end or corner posts have an extra 50mm 'overhang' with the post and base plate.





Images & drawings are not to scale

POST INSTALL OVERVIEW



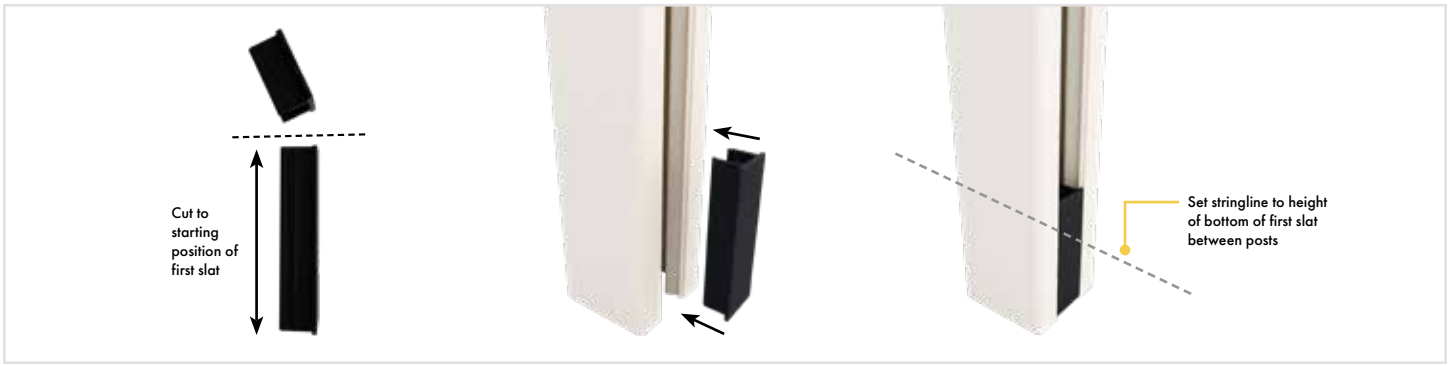
4 Determine overall post height required

The Xpress Plus excel calculator calculates requirements from ground level upwards.

For overall post heights required, add the extra length below the surface for core drill and concrete footings.
For base plated installations, deduct 10mm from screen height (as base plate is 10mm thick)

Install posts.

TIP – Use spirit level to ensure posts are vertically level. Ensure top of posts level and in alignment.

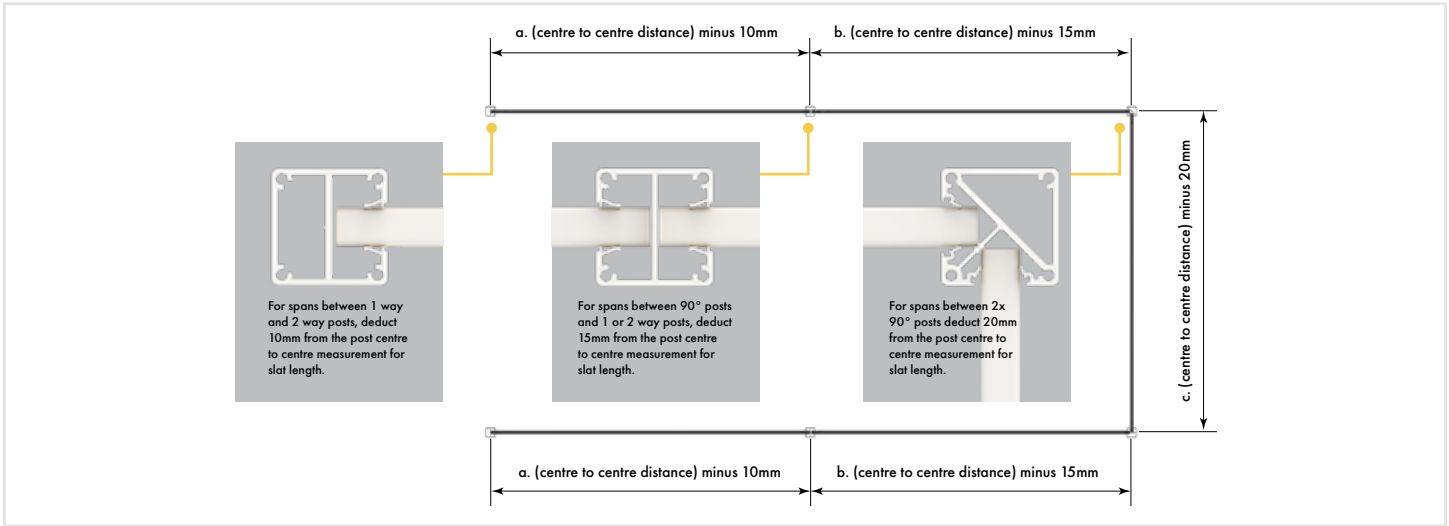


5 Xpress Plus calculator provides calculation of height to cut initial height setting blocks.

NOTE: For uneven ground/deck, cut one setting block only and place at the highest point of the finished floor line. Then, run a level string line to determine heights of remaining setting blocks before cutting to size.
TIP – it is recommended that the bottom gap is no higher than 50mm. Consider lowering or raising overall post height to achieve a starting gap less than 50mm.

Cut setting blocks to suit stringline level and snap into posts.

Use stringline to set first slat height.



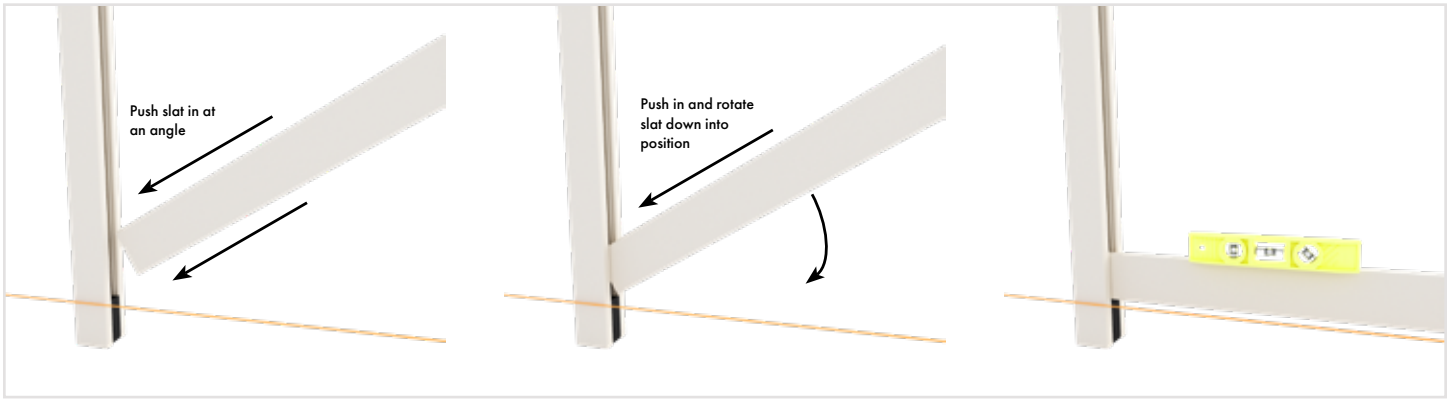
6 Cut slats to appropriate length for each post opening – Refer Xpress Plus excel calculator for guide on slat lengths required.

Deduction summary:

a. For spans between any 1 way post and 2 way post combination, slats are cut **10mm less** than the centre to centre of posts
b. For spans leading into a 90 degeee post, slats are cut **15mm less** than the centre to centre of posts
c. For spans between two 90 degree posts, slats are cut **20mm less** than the centre to centre of posts

Images & drawings are not to scale

POST INSTALL OVERVIEW



7 Install first slat in each span. Using spirit level, ensure slats are level.

8 Snap in spacer block above first slat into either side of pocket of post. Repeat for all slats.

9 Top slat finishes 5mm below the top of the post. Screw slat locking clip into top slat.

POST INSTALL OVERVIEW

10 Install 3mm thick top plate. Use rubber mallet to tap into position.

OPTIONAL EXTRA:

Centre support rail

See page 46 for full specifications

11 **Install note: for spans over 2000mm (or in high wind areas under 2000mm wide) it is recommended to have a centre support rail**
Place centre support rail against slats and screw off at each slat using XP-SCREWS. Snap on fixing cover to hide screws.

PEDESTRIAN GATE OPTIONS

Option 3

Horizontal slat gate with 65mm x 16.5mm slats
9mm or 20mm slat spacing
Fitted with the Lockwood 001 deadlatch
*Inwards swinging only

SEE PAGES 64-71 FOR FULL SPECIFICATIONS ON ALL PRODUCTS LISTED BELOW

1. **Patented non-weld gate side frames**
Machined drill holes & slots – 9mm or 20mm spacing
Suits 65x16.5mm slat
XP-4200-GSF09 or XP-4200-GSF20

2. **Gate insert**
Snaps into gate side frame to hide gate slat fixing screws
XP-4200-GI

3. **Gate stop & rubber**
Required for latch side of gate
XP-4200-GSTOP / XP-GATESTOP-RUB

4. **Aluminium CSK blind rivet**
CSK rivets recommended due to 3mm gap between latching post & gate side frame
XP-GATESTOP-RIV-10PK

5. **Gate frame cap**
Simply press into top of gate frames
XP-GFC

6. **Gate frame screws**
12 gauge x 65mm long with flange hex head
XP-SCREWSGF-10PK

7. **Gate hinges**
A range of hinging options available
See pages 72-76 & 82-83 for hinge options

8. **65mm x 16.5mm gate slat w/ 2x screw flutes**
Screw fluted slats at top/middle/bottom of gate
XP-6100-GB65

9. **65x16.5mm slat**
Standard slats held in place with patented friction fitting gate side frame
XP-6100-S65

10. **Deadlatch lockbox**
Patented non-weld lockbox to suit Lockwood 001 deadlatch
XP-LBOX-DL

11. **Lockwood 001 deadlatch**
Manufactured by Lockwood
XP-DL001 | **See page 68**

PEDESTRIAN GATE OPTIONS

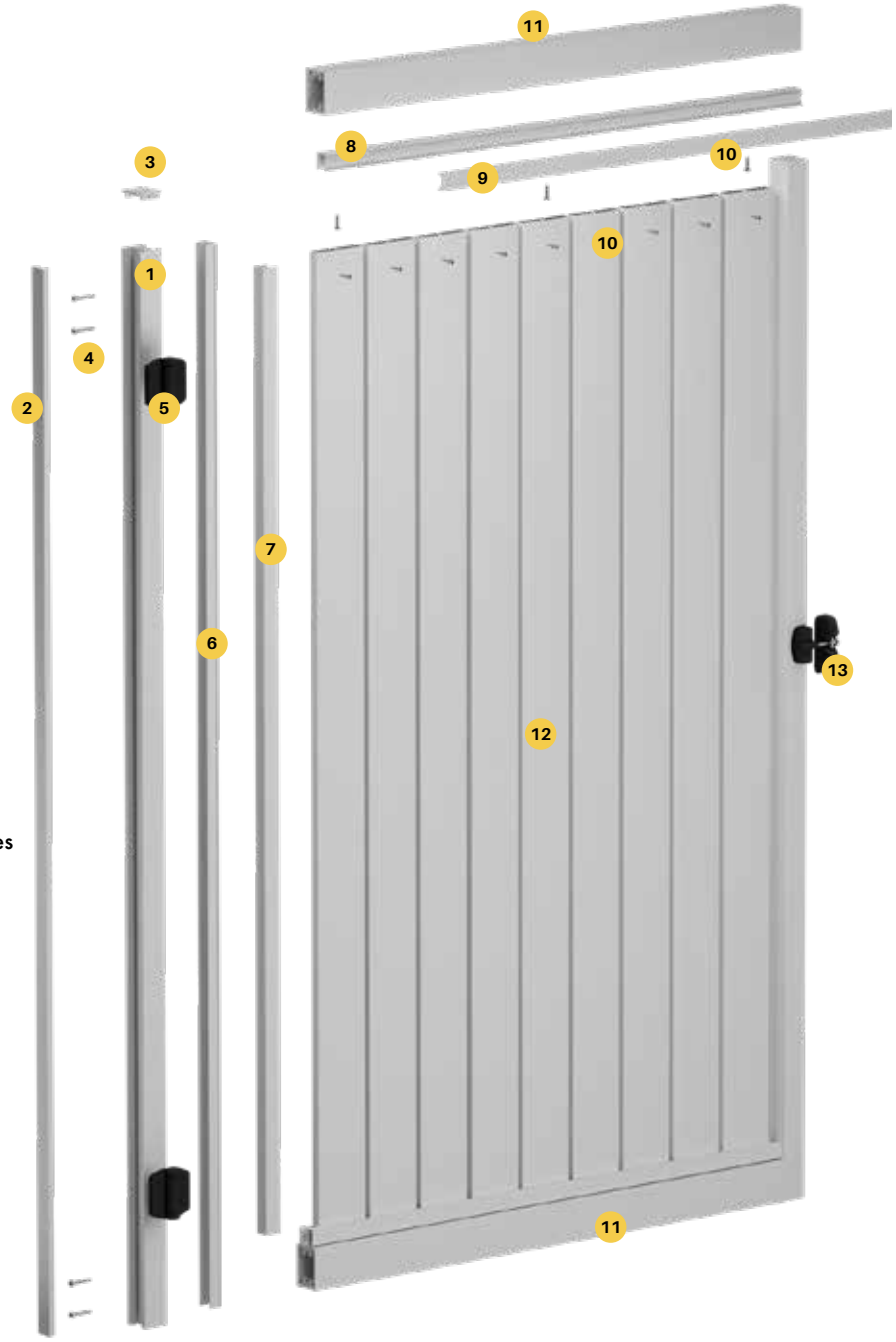
Option 5

Vertical slat gate with 65mm or 90mm x 16.5mm slats
Variable slat spacing including nil spacing
Fitted with the D&D Lokk Latch Deluxe
Maximum 1200mm wide

SEE PAGES 64-71 FOR FULL SPECIFICATIONS ON ALL PRODUCTS LISTED BELOW



1. **Patented non-weld gate side frames**
   Machined drill holes
   XP-4200-GSF20

2. **Gate insert**
   Snaps into gate side frame to hide top & bottom rail fixing screws
   XP-4200-GI

3. **Gate frame cap**
   Simply press into top of gate frames
   XP-GFC

4. **Gate frame screws**
   12 gauge x 65mm long with flange hex head
   Use to fix off heavy duty top/bottom rail
   XP-SCREWSGF-10PK

5. **Gate hinges**
   A range of hinging options available
   See pages 72-76 & 82-83 for hinge options

6. **Non-punched gate infill**
   Replaces slotted infill from gate side frame
   XP-XBAT-4200-INF

7. **U channel**
   Affix to vertical inner face of gate side frames
   Reduces potential light gap on both vertical edges of gate
   QS-5000-HORIZ

8. **Quickscreen sideframe**
   Affix to inner face of top & bottom rails
   Insert and screw off each slat – variable spacing
   QS-5800-SF

9. **Quickscreen concealed fixing cover**
   Snap-on cover to hide slat fixing screws
   QS-5800-CFC

10. **Fixing screws**
    Use to affix Quickscreen side frames and slats
    All slats must be screw fixed to side frames
    XP-SCREWS

11. **65x45mm heavy duty rail**
    Position at top & bottom of gate
    XP-6100-HD6545

12. **65x16.5mm or 90x16.5mm slat**
    Slats held in place with fixing screws
    XP-6100-S65 / QS-6100-S90

13. **Lokk Latch Deluxe w/ packer**
    Manufactured by D&D Technologies
    Lockable both sides
    LL-DL | **See page 77-78 & 84**

When calculating even spacing between vertical slats, overall gate width should be carefully considered to ensure first and last gap (between gate side frames and first/last slat) are kept uniform with other slat spacing

Deadlatch lockbox

ALUMINIUM

Black / Monument / Woodland Grey / Silver / Surfmist / White Basalt / Dune / Mill finish

Order Code: **XP-LBOX-DL**

- Patented non-weld lockbox
- Suits horizontal slat gates with 65x16.5mm slats
- Must use with gate side frame (XP-4200-GSF09/20)
- Screw fix assembly of pre-powder coated lockbox and extrusion
- Suits Lockwood 001 deadlatch (XP-DL001)

Lockwood 001 deadlatch

12Gx65MM HEX FLANGE HEAD

Order Code: **XP-DL001**

- Lockwood 001 deadlatch to suit metal frames
- Market leading performance & reliability
- Only suits inwards swinging gate
- Cut-resistant stainless steel bolt

Lever/knob lockbox

ALUMINIUM

Black / Monument / Woodland Grey / Silver / Surfmist / White Basalt / Dune / Mill finish

Order Code: **XP-LBOX-LSET**

- Patented non-weld lockbox
- Suits horizontal slat gates with 65x16.5mm slats
- Must use with gate kits (XP-GKIT-LSET09/20)
- Screw fix assembly of pre-powder coated lockbox and extrusion
- Suits knob or lever sets (Stanley or Lockwood models)

Lockwood round knob set

HIGH PURITY ZINC ALLOY

Order Code: **XP-HDL-LW534**

- Lockwood model 534
- Knob set keyed both sides
- Lock / unlock both sides
- Suits left or right gate opening
- Satin Chrome brushed finish
- C4 5 pin on outside
- C4 6 pin restricted compatible on inside

Stanley round knob set

STAINLESS STEEL

Order Code: **XP-HDL-KNOB**

- Knob set keyed both sides
- Lock / unlock both sides
- Suits left or right gate opening
- Stainless steel knob and rose
- C4 6 pin restricted compatible (Inside & outside)

Stanley lever set

STAINLESS STEEL

Order Code: **XP-HDL-LEVER**

- Lever set keyed both sides
- Lock / unlock both sides
- Suits left or right gate opening
- Stainless steel knob and rose
- C4 6 pin restricted compatible (Inside & outside)

GATE ACCESSORIES

Hinge panel brace screws

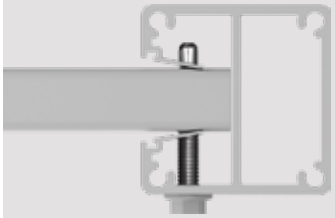
12Gx40MM – 12 PACK

Black / Monument / Woodland Grey / Silver / Surfmist / White Basalt / Dune / Mill finish

Order Code: **XPL-SCHEX-12PK**

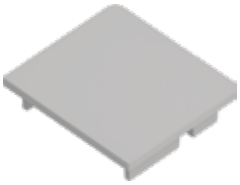
- Screws fix through post and slat both sides of panel that gate hinges from
- Fix off both sides at top slat and mid slat positions
- Pilot hole required before screw fixing (ensure drill does not penetrate other side of post)
- Must be used to provide rigidity of hinging panel adjacent to gate

Applicable if using XPress PLUS post system next to gate



Finishes

BLACK (B) · MONUMENT (MN) · WOODLAND GREY (G) · SILVER (S) · SURFMIST (SM) · WHITE (W) · BASALT (BS) · DUNE (D) · MILL (M)



Gate frame cap

NYLON

Black / Monument / Woodland Grey / Silver / Surfmist / White

Order Code: **XP-GFC**

- UV stabilised nylon – 3mm thick cap
- Available in 5 colours
- Suits gate side frame
- Press-in flat cap

Finishes

BLACK (B) · MONUMENT (MN) · WOODLAND GREY (G) · SILVER (S) · SURFMIST (SM) · WHITE (W)

Self drilling wafer screws

10Gx16MM – BAG OF 100

Black / Monument / Woodland Grey / Silver / Surfmist / White Basalt / Dune / Mill finish

Order Code: **XP-SCREWS**

- 10G x 16mm self drilling wafer head zinc plated
- Powder coated heads for neat finish
- Use to screw fix slats to Quickscreen side frame or to affix centre support rail to slats

Countersunk blind rivet

4.0x8.4

Order Code: **XP-GATESTOP-RIV-10PK**

- Countersunk aluminium rivet – 10 pack
- Use for affixing gate stop to post when using a lockbox with Lockwood 001 deadlatch – due to 3mm gap requirement between gate side frame and post rivets are required (as screw heads may interfere)

PACK OF 10

Gate frame screws

12Gx65MM HEX FLANGE HEAD

Order Code: **XP-SCREWSGF-10PK**

- Use to secure gate slats to gate side frame through pre-machined holes in gate side frames
- Hex flange head for easy assembly

Electric Striker

Order Code: **XP-HDL-ES**

- Optional electric striker kit
- SS304 striker – Left or right handing
- Power required to lock/unlock
- 12 volt (DC current)
- LATCHING POST – face mount face plate with built in side keeper
- Requirement to notch latching post to recess electric striker mechanism
- Allow 9mm latching gap
- Compatible with locks:
  XP-HDL-LW534
  XP-HDL-KNOB
  XP-HDL-LEVER

⁎ Routing template included with kit

Gate stop rubber

4300MM LONG

Order Code: **XP-GATESTOP-RUB**

- Used as bumper for gate stop (mates with XP-4200-GSTOP)
- Rubber feeds into cavity in gate stop extrusion
- Cut to required length

Nylon packer

USE WITH D&D LOKK LATCH DELUXE

Order Code: **XP-PACKER**

- UV stabilised nylon
- Must be used when installing a D&D Lokk Latch Deluxe
- Packer aligns Lokk Latch Deluxe with gate side frame
- Affixes to inner face of gate side frame positioned under Lokk Latch striker

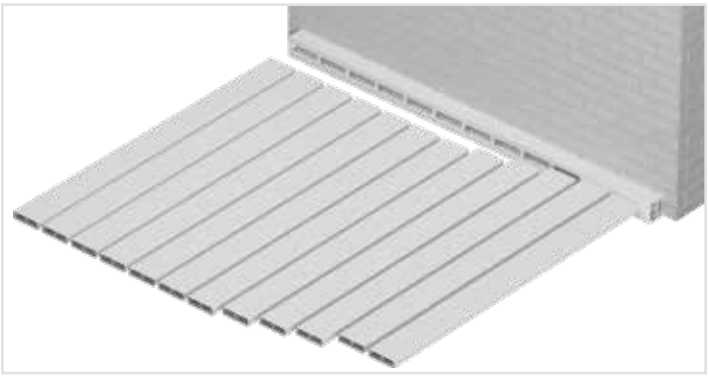
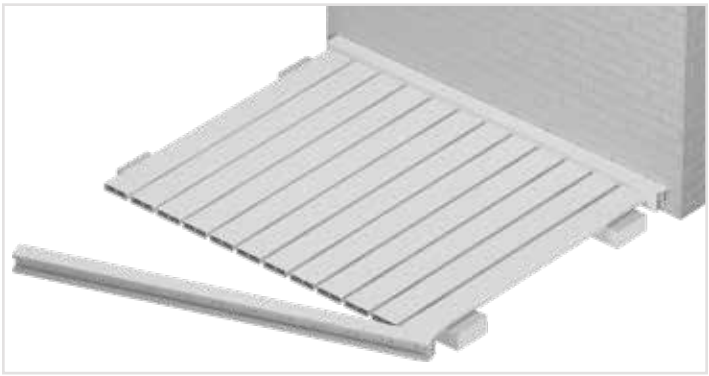
GATE ASSEMBLY: SIMPLE OVERVIEW

GATE OPTIONS 1, 3 & 4

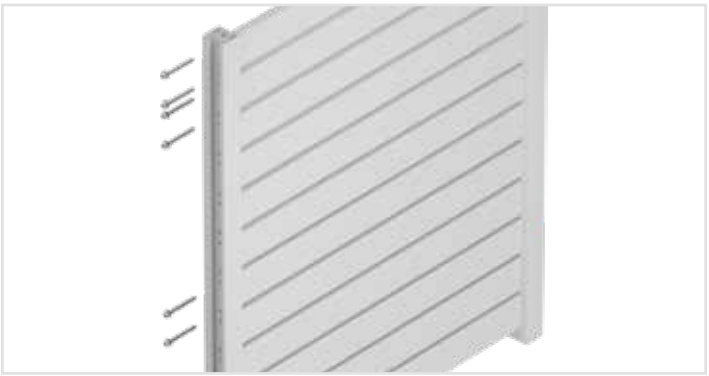


1 On a flat protected surface, lay 1x gate side frame with slotted spacer infill and rest against a padded stop and tap slats and gate blades into place



2 Elevate slats and gate side frame on two padded bearers. Engage second gate side frame to slats and tap frame until all slats are fully engaged

TIP: Start at one end and work slats in from one end to the other



3 Screw off gate blades at required positions. Ensure gate is square by measuring diagonals

4 Slide 2x outer infills down into position to hide screw heads

Important note:

Using pliers, bend inner legs of outer infill slightly outward to lock into position.

5 Slide 2x outer infills past end of gate side frame (approx. 10mm), then using pliers, bend inner legs of outer infill slightly outwards. Tap outer infill back to level with gate side frame

TIP: This step stops the outer infill from sliding down prior to hardware installation

6 Insert top caps into side frames

To determine the actual slat width for your gate, make a deduction of 36mm to the overall gate width (outer edge to outer edge of gate side frame)

FORMULA FOR SLAT WIDTH:

OVERALL GATE WIDTH – 36MM

You need to allow for hinge and latch gaps

Check hinge and latch hardware specifications for gaps required and take this information into account when determining overall gate width

Contact us for further installation instructions when using lockboxes etc.

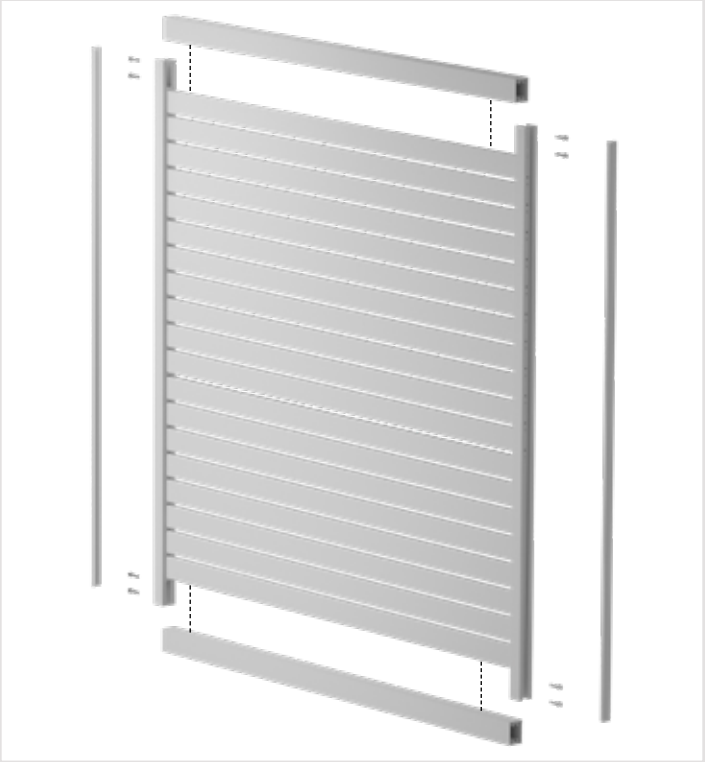
GATE ASSEMBLY

GATES WIDER THAN 1500MM

1 When the gate is wider than 1500mm, 2x heavy duty top/bottom rails are used in place of the top and bottom gate blades (Additional gate blades are still required as per page 63).



2 Once top/bottom rails and all slats are installed, ensure gate is square.
The slimline brace must be measured and cut with an aluminium drop saw to run diagonally across the back face of the gate.
Secure each slat using XP-SCREWS.

IMPORTANT:

Ensure the slimline brace is installed running from the 'bottom' hinge side corner to the top 'latch' side corner

Consider anchor pins to secure track
XPSG-3000/6000-TRACK-ST or XPSG-6000-TRACK-AL

When calculating even spacing between vertical slats, overall gate width should be carefully considered to ensure first and last gap (between gate side frames and first/last slat) are kept uniform with other slat spacing

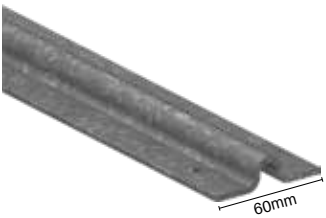
GATE ACCESSORIES

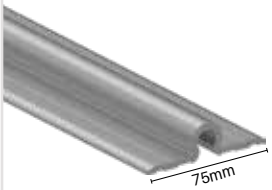


Steel sliding gate track

3000MM LONG OR
6000MM LONG

Order Codes:
XPSG-3000-TRACK-ST (3000mm)
XPSG-6000-TRACK-ST (6000mm)

- Available 3000mm or 6000mm long
- Made from 3mm galvanised steel for durability
- Bolt down sliding gate track with a Ø20mm running surface
- Easy to install with predrilled fixing holes (22 holes for 3000mm track and 42 holes for 6000mm track)



Aluminium sliding gate track

6000MM LONG

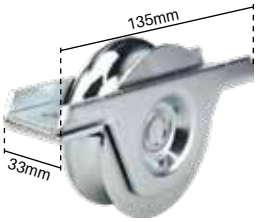
Order Code:
XPSG-6000-TRACK-AL (6000mm)

- Available 6000mm long
- Mill finish aluminium – 6063-T5
- Bolt down sliding gate track with a Ø20mm running surface
- No drill holes – drill fixing holes as needed

Sliding gate track pins

Order Code: **XPSG-ANCHOR**

- Mushroom head galvanised steel track anchor pins
- 6.5mm x 38mm
- Pre-expanded expansion anchor. Once hammered in, unique kinked shaft provides a spring action for vibration proof anchoring. Use 6.5mm masonry bit into concrete



Sliding gate wheel

Order Code: **XPSG-WHEEL**

- 80mm diameter with 20mm diameter groove
- Zinc plated steel
- Load rating 180kg
- Use with 1 x XPSG-WHEEL-CS clamping set to fix to sliding gate bottom rail
- Made in Italy

Sliding gate wheel clamping set

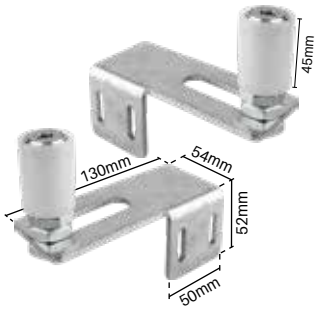
Order Code: **XPSG-WHEEL-CS**

- Use to clamp sliding gate wheel to bottom rail
- Aluminium M8 threaded block
- Includes 2 x zinc plated screws
- Sold as a pack of 2 (suits 1 x wheel)

Slide guide

Order Code:**XPSG-GUIDE**

- Self-adjusting slide guide attaches to sliding gate top rail
- Keeps gate in vertical position and travelling true while opening/closing
- As gate travels along track and shifts up or down, slide guide adjusts automatically. Up to 280mm vertical adjustment.
- Guide channel is anodised black with sturdy nylon block



Sliding gate guide rollers

2 PACK

Order Code: **XPSG-TOPROLL-2PK**

- Alternative to SlideGuide
- Rollers guide top rail while gate opens and closes
- Can only be used if vertical deviation of gate while travelling is 15mm or less
- White nylon rollers – made in Italy
- Kit includes 1 x left and 1 x right zinc plated steel mounting bracket (fixings not included) – 30mm hole centers

2 installation methods —

GATE ACCESSORIES

Gate U catch

Order Code:**XPSG-CATCH-U**

- Suits up to 50mm gate frames
- Gate catch supplied with 5 pre-drilled holes for easy installation and adjustment
- Rubber stop provided for noise reduction
- Steel zinc plated

Gate F catch

Order Code:**XPSG-CATCH-F**

- Suits up to 50mm gate frames
- Affix bracket to wall/post via "F" leg
- U catch attaches to F section – includes rubber stop for noise reduction
- U catch horizontally adjustable for ease of lining up to gate frame
- Steel zinc plated

Gate stop

Order Code:**XPSG-STOP**

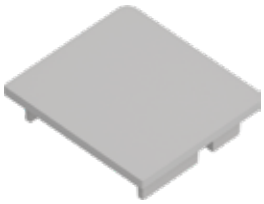
- Stops the gate in the option position
- Forged steel zinc plated gate stop with nylon bumper
- Bolts to concrete at end of gate track. 4x Ø11mm fixing holes
- Made in Italy

MATES WITH XP-5800-CSR

Centre support rail top/bottom plate

Order Code: **XP-BTP**

- Aluminium with countersunk hole machining
- Use to brace off top and/or bottom of centre support rail to top and bottom rails
- Bracing centre support rail provides extra rigidity



Gate frame cap

NYLON

Black / Monument / Woodland Grey / Silver / Surfmist / White

Order Code: **XP-GFC**

- UV stabilised nylon – 3mm thick cap
- Available in 5 colours
- Suits gate side frame
- Press-in flat cap

Finishes

PACK OF 10

Gate frame screws

12Gx65MM HEX FLANGE HEAD

Order Code: **XP-SCREWSGF-10PK**

- Hex flange head for easy assembly
- Use to screw horizontal top & bottom rails to vertical side frames
- Also use to screw fix 'gate' slat to side frames for horizontal slat gates with 9mm or 20mm spacing (65x16.5mm slats)

Self drilling wafer screws

10Gx16MM – BAG OF 100

Black / Monument / Woodland Grey Silver / Surfmist / White / Basalt Dune / Mill finish

Order Code: **XP-SCREWS**

- 10G x 16mm self drilling wafer head zinc plated
- Powder coated heads for neat finish
- Use to: (1) Screw fix centre support rail to slats
  (2) Screw fix & brace off centre support rail top/bottom plate to top/bottom rail
  (3) Screw fix slats to side frames if required
  (4) Attach Quickscreen side frame to outer gate frame for gate options 2 & 3

Your Smart Nice Home

LONG TERM RELIABILITY

NiceHome automation and accessories are tested every day in the Nice laboratories according to strict criteria. To ensure compliance with the strictest safety requirements on the market, NiceHome guarantees the highest possible technological and quality standards.

PROFESSIONAL QUALITY

Designed and manufactured in Italy, NiceHome automation benefits from unique Italian know-how combining top performance with an essential style to adapt perfectly to the needs of your home.

To complement horizontal slat and vertical slat sliding gates, GO can supply the highest quality Italian made gate automation and accessories. NiceHome automation is a new upgrade to the well-known Mhouse range.

Filo 400 Pro Kit

Order Code:**XPSG-FILO-400**

KIT INCLUDES:
- 1x Motor
- 2x Remotes
- 1x Pair of Photocells (safety device which prevents the gate from closing on pedestrians or vehicles)

- Sliding gate opener suits gates up to 6000mm wide and weighing up to 400kg
- Easy to install and simple programming steps
- Flexible short power cord pre-wired to motor
- Plugs into standard power point with 10 amp flat 3 pin plug
- Includes pinion (cog) that integrates with rack on gate

Low voltage cable option

External transformer

FILO 400 Pro Kit with split pack

Features external transformer

Order Code:**XPSG-FILO-400PRO-SP**

- Same motor and accessories as FILO 400 except transformer is separated from motor
- External transformer converts 240V mains power to low voltage 24V
- Use 2 core x 2.5mm (double insulated) electrical cable to run from transformer to motor. CABLE SOLD SEPARATELY – can be purchased from electrical wholesaler or reputable hardware store
- Motor can be installed a maximum of 50 meters away from transformer 10 amp flat 3 pin plug
- Ideal where getting 240V mains power to gate motor is different. Simply run low voltage cable from transformer to gate motor.
- Refer www.easygate.com.au for technical assistance/manuals

KIT INCLUDES:
- 1x Motor
- 2x Remotes
- 1x Pair of Photocells (safety device which prevents the gate from closing on pedestrians or vehicles)
- 1x External transformer in weatherproof enclosure

MOTOR ACCESSORIES

Remote control

Order Code:**XPSG-FILO-REMOTE**

- Optional extra remote control to replace remotes in kit if broken or more remotes required (2x remotes included as standard with each motor kit)
- 5 channel remote able to control various gate functions (eg open only, close only, partial open etc)

Wireless keypad

Order Code:**XPSG-FILO-WKP**

- Optional wireless keypad for gate motor opening/closing
- PIN number control access
- Easy to affix to wall or post
- Runs on 2 x CR2430 lithium batteries

Solar power kit

Order Code:**XPSG-FILO-SOLAR**

- Solar power system designed for use with NiceHome motors
- System uses exclusively solar power to run automation without use of electrical mains power
- Provides continues electrical energy. Ideal for sites where mains power is unavailable
- Includes photovoltaic panel (converts solar energy into electrical energy) and electric battery (for stored power, able to operate gate night and day)
- Attention must be paid to ensure panel positioned to receive full sunshine

Backup battery

Order Code:**XPSG-FILO-BATTERY**

- Optional battery provides backup power in the event of mains power failure
- Gate can be cycled multiple times under battery power (no. of cycles may vary due to gate size and site conditions)
- Backup battery is recharged under mains power

Rack

Order Code:**XPSG-FILO-RACK**

- Tough & durable nylon rack (with steel core)
- Affix to bottom rail of sliding gate
- 1 meter long sections; 6 fixing points
- Quieter than steel racks
- Made in Italy

AUSTRALIA'S BEST QUALITY AT UNBEATABLE PRICES

SYSTEM ADVANTAGES

Concealed fixing: screws are hidden – clean finish!

Low maintenance – unlike timber screening

Cost effective solution

Hinged & sliding gates also available

Adjustable slat spacing

ECO FRIENDLY

Slats have commonly been made from harvested timber which must be repeatedly painted. Alumawood slats are made from aluminium – the most abundant metal in the Earth's crust and third most abundant element (after oxygen and silicon). There are no ongoing painting issues with imaged slats.

FIRE RETARDANT

Aluminium is described as non-combustible. When aluminium is exposed to a prolonged fire environment it will begin to melt (not burn) with a melting point between 600 and 660 degrees celsius. Aluminium slats are an excellent choice where fire risk requires consideration.

WEATHER & INSECT PROOF

Imaged aluminium is impervious to insects and termites plus the non-porous surface is naturally resistant to fungi, mould and mildew. It is also unaffected by exposure to sunlight and water making it ideal for batten/screening solutions.

LIGHT WEIGHT

Aluminium weighs approximately one third of a piece of steel that is the same size and shape. Alumawood is made by extruding aluminium which allows for optimisation of shape to maximise strength and reduce weight.

COLOUR STABILITY

Alumawood features genuine Interpon basecoat with Italian film for a long lasting finish.

Woodgrain effect imaged aluminium has a durable base coat applied followed by a technically advanced film which is transferred onto the base coat under heat & pressure. The transfer cannot rub or peel off. The sophisticated process is called sublimation.

RUST PROOF

Aluminium does not rust. Alumawood may be enjoyed for the long term with minimal maintenance and no worry of rusting.

Aluminium is produced to chemical composition, mechanical property and dimensional tolerances in AS/NZS 1866:1997.

ALUMAWOOD SCREENING EXTRUSIONS

The Alumawood system is extremely cost effective. Each slat is screwed off once in postion. The system allows for variable slat spacing so any gap is achievable. Once slats are screwed off, a snap on cover hides the fixings to provide a seamless finish.

For horizontal slat screening, generally the side frame is screwed directly to a post or wall without need of another U channel or angle.

In 'void' situations where slats cannot be fed in from top down, an F section is available. The F section can also be used where it is preferred to pre-make complete panels in a factory and simply install onsite.

For raking panels/angles, slats can be cut at an angle and screwed off making Alumawood an ideal solution for difficult installations.

Vertical slat screening is also easily achievable with Alumawood extrusions.

Available in long length supply or custom made to size ready for assembly.

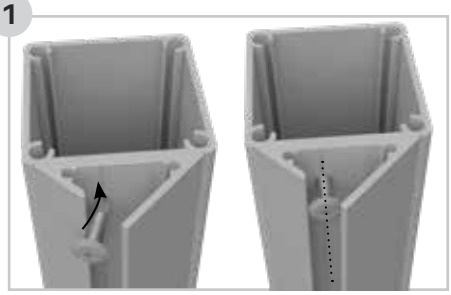
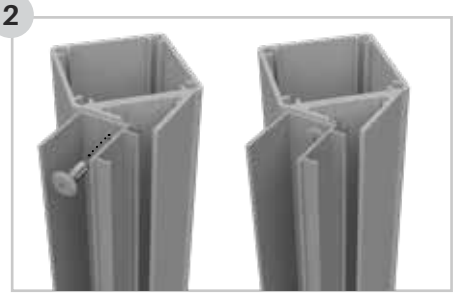
1



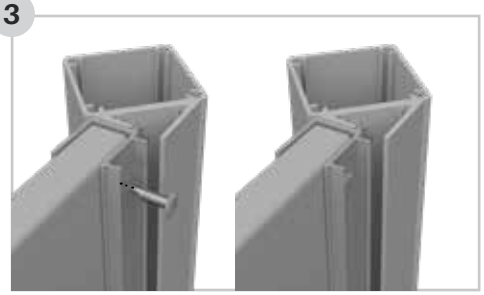
Place 135 adapter against post/wall. Insert screw into void opening. Screw fix adapter using V groove as a guide to fixing location.
TIP: pilot hole drill before screw fixing; max screw head size is 10mm.

2



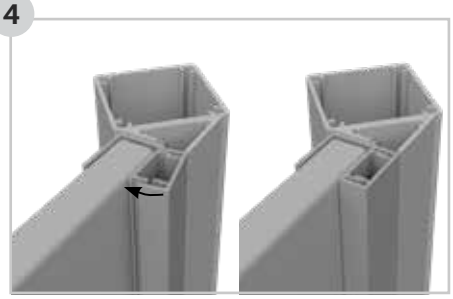
Screw fix Quickscreen Side Frame with screw positioned slightly offset from centre (closer to the snap on cover side) but ensure screw sufficiently engages with short leg of 135 angle adapter.

3



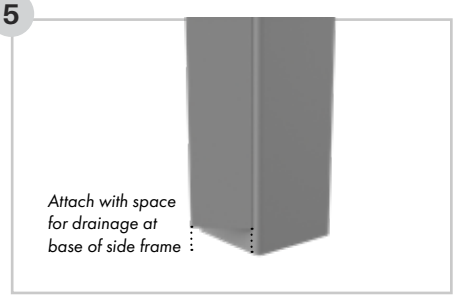
Insert slats into Quickscreen side frame and fix off slats.

4



Snap on concealed fixing cover. Lever into place with short leg going on first then levering on long leg to snap into position.

5



135 angle adapter should be cut so that it is elevated from floor and at the same length as Quickscreen Side Frame.

NOW AVAILABLE
HORIZONTAL SLAT BALUSTRADE

- Four stylish infill designs to choose from
- Save time & money without compromising quality or style
- Non-weld assembly and easy installation
- Engineering certification approved for balustrading

Why choose horizontal slat balustrade?

AIRE Horizontal Slat Balustrade is a complete non-weld system which perfectly typifies the saying 'simplicity is the ultimate form of sophistication'. With sleek lines and innovative design consideration ensuring screw fixings are hidden, the system is easy to install and yet provides for a stunning finish.

The system is stocked in 3 popular powder coat finishes – satin black, monument matt and pearl white glass. It is also available in mill finish allowing customisation of powder coat colour. Pre-powder coated material can be cut to required lengths and assembled onsite. The installation process is simple and effective – side frames are affixed to the sturdy aluminium posts and horizontal slats are screw fixed either side with a fixing cover hiding screws.

The system has been extensively load tested by accredited NATA testing facilities. Importantly, engineering compliance certification is available.

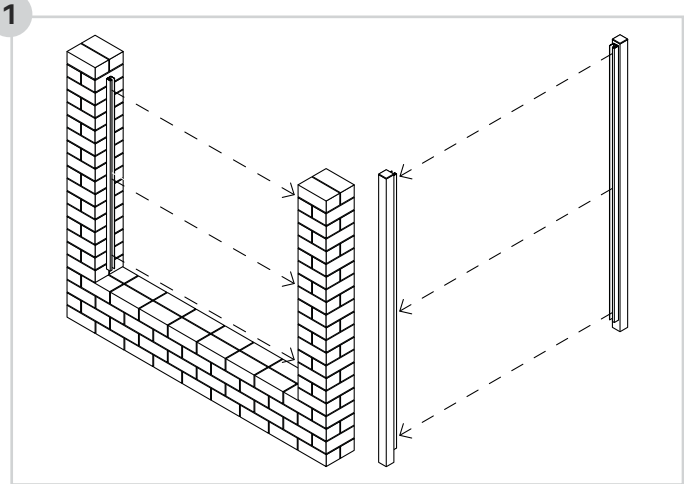
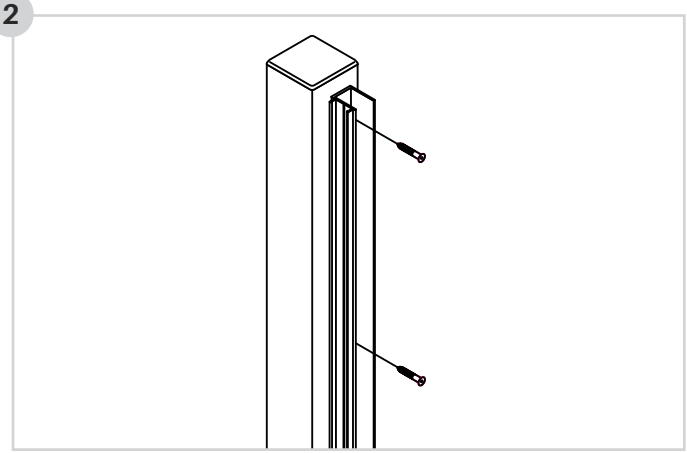
HORIZONTAL SLAT INSTALL GUIDE

1



Take measurement between walls or posts at 3 points: top, middle and bottom (Take note of the smallest measurement)

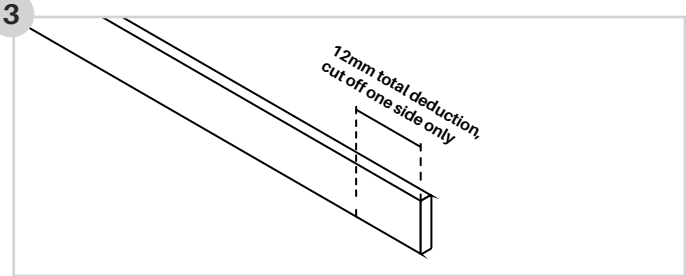
2



Cut side frames 3mm less than desired height (3mm allows for the top cap)

Affix side frames to wall or post with appropriate fixings

3

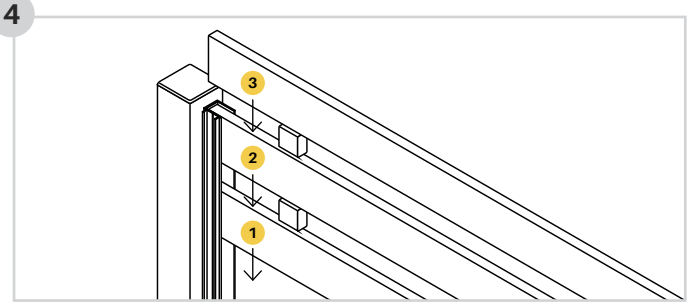


Cut aluminium slats 12mm less than total width of opening (Refer to measurement in step 1)

The 12mm deduction takes into account thickness of side frame on both sides of the screen and head of fixings.

Ensure fixings holding side frame do not obstruct slats when dropping in. If so, you may need to trim slats further.

4

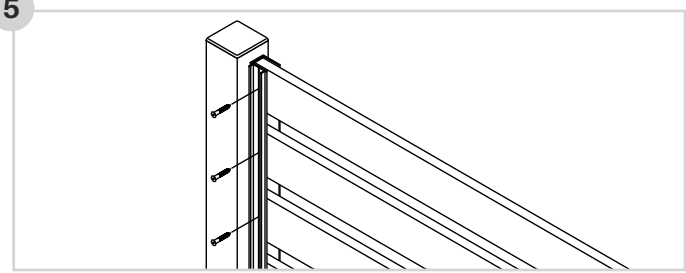


Drop in aluminium slats

Tip: Ensure bottom slat is level and screw off at both sides

Optional spacer blocks can be rotated to achieve a 9, 15 or 20mm slat gap. Any gap can be achieved by leaving a desired space. Consider using timber block spacers to achieve other gaps.

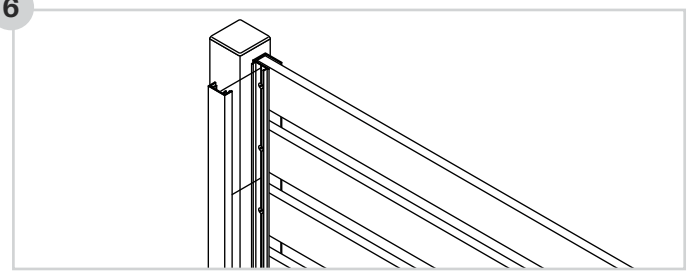
5



Screw off each slat as it is dropped in (ensuring each slat is level)

If spacer blocks used, remove after each level is installed.

6

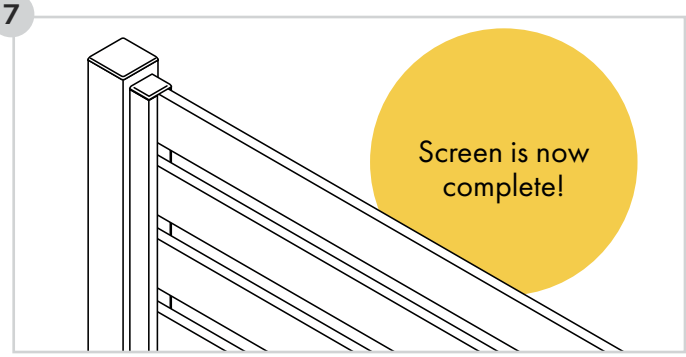


Cut snap on fixing cover to appropriate height

Attach snap on fixing cover to hide screws

Tip: If screen is wider than 1800mm, it is recommended to attach the centre support rail vertically at the centre of the screen. Cut centre support rail to appropriate height of screen and screw off to each slat at back side of screen

7

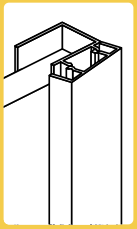


Snap on fixing cover install tip

Engage shorter leg of snap-on cover first.

At this point, the snap-on cover will be sitting off the side frame on an angle.

The longer leg must be at open side of side frame.



Starting from the top and working your way down, use a wood block and a hammer/ mallet to tap the longer leg into place.

A short, sharp tap may be required to engage the long leg.

Height

The Alumawood side frames allow for variable gap spacing as each slat is fixed off at desired position. Any gap is achieveable. Shown are specifications for the popular spacings of nil, 5mm, 9mm & 20mm spacing.
The formula to calculate variable gap screen height is:
((65mm (slat height) + desired gap) x number of slats) – desired gap + 3mm (for top cap).

For example, a 30mm desired gap with 14 slats: (65 + 30) x 14 - 30 + 3 = 1303mm high

VERTICAL SLAT SYSTEM

The Alumawood System allows 65x16.5mm or 90x16.5mm slats to be installed using a cost effective top/bottom rail system. Each slat requires screwing off at top and bottom. Screws are hidden by a heavy duty "U" section at top and bottom. An "F" section is installed vertically on both sides which allows easy installation between posts or pillars. A complete system is available – panels, pedestrian gates and sliding gates.

Ideal for installations between pillars and existing posts!

For Island Grey

1 **F section**

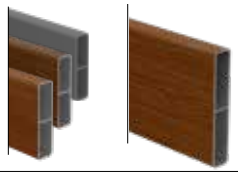
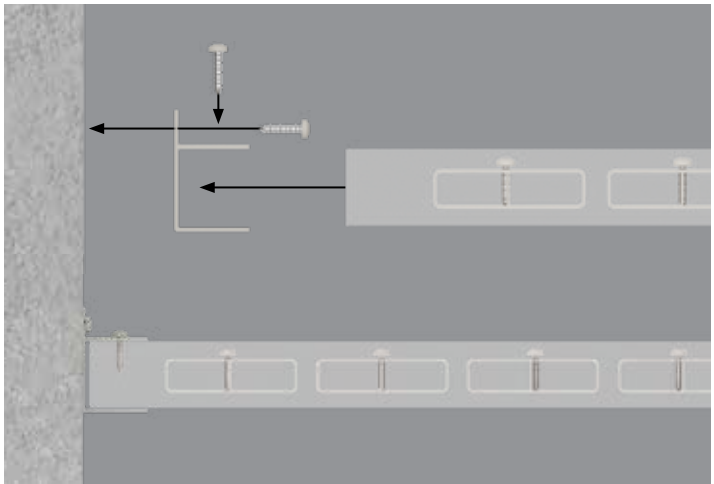
90mm: AWQS-5800-S90-WRC*
*WRC finish only
Refer page 103



ASSEMBLE ON-SITE OR IN YOUR WORKSHOP —

Panels fit into F section on both sides for easy installation. Problems with out of square pillars or posts can be easily overcome with F section fitting.



POSTS & ACCESSORIES —

1 50x50mm post
2 65x65mm heavy duty post
3 Top caps
4 Dress rings
5 Domical covers
6 Base plates

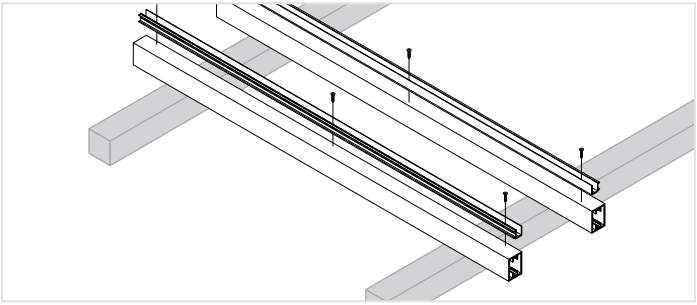
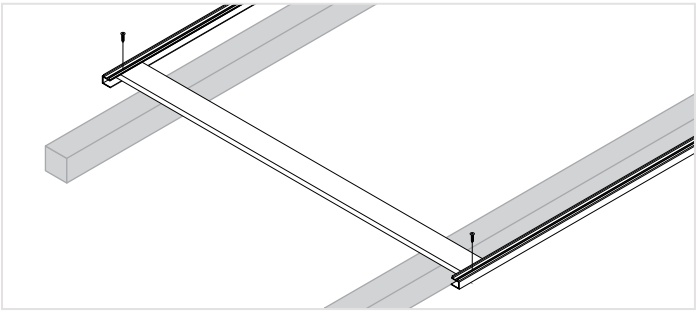
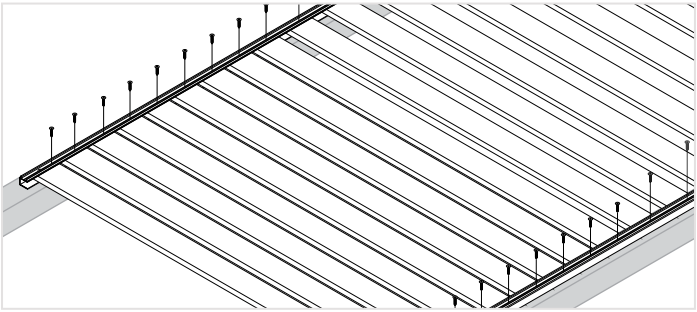
VERTICAL SLAT INSTALL GUIDE



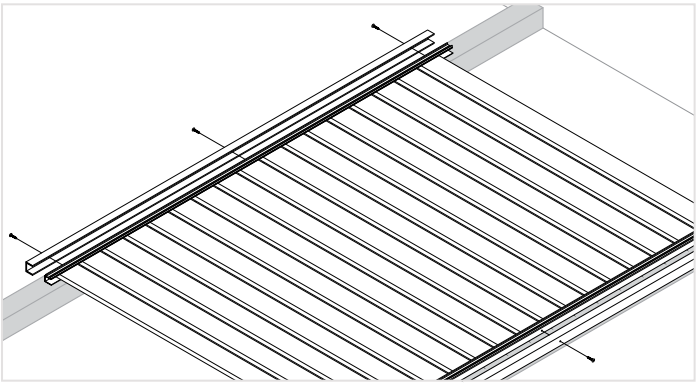
1 Place first slat on padded bearers, then place the top and bottom frames onto the slat.



2 Position front edge of slat required distance from the edge of the top and bottom frame and screw through frame to affix at both end of the slat with 1x screw per end.

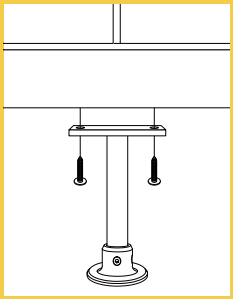


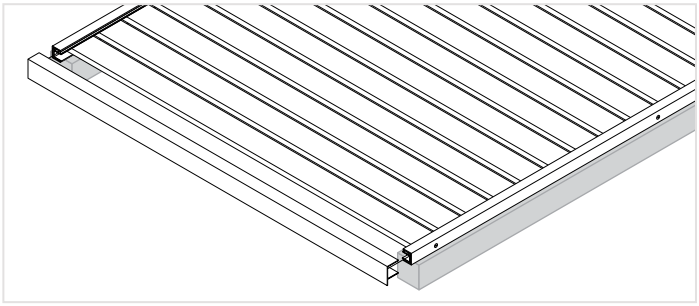
3 Slide remaining slats into the top and bottom frame and attach with single screw through top and bottom frames to affix, then check measure diagonals. Double screw fix first and last slats. **Keep slat spacing in mind!**



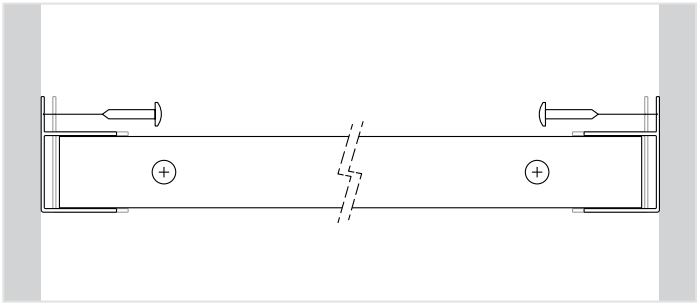
4 Place U channel over top and bottom frame, pre-drill 3mm holes and screw off in three points on top and bottom of the U channel – Measure in 50mm from the left and right edges, then one in the centre. **Ensure sufficient pilot holes are drilled before affixing, making sure they won't hit other screws.**

For panels over 1800mm wide, we suggest using a height adjustable foot underneath screen to prevent sagging of panel. Pre-drill 3mm holes and affix with screws. If using the height adjustable foot there is no need for a screw in the middle of the bottom rail.

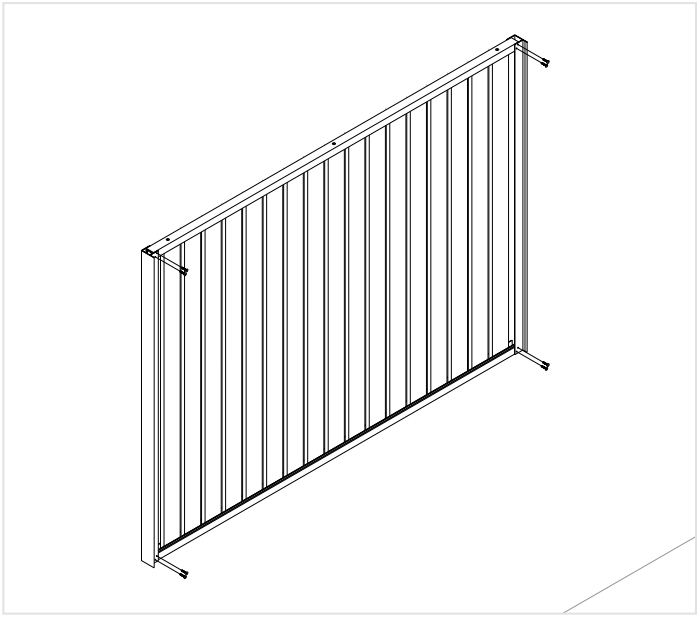




5 Place F section over each side of panel – F section will stay in place without screws until the last step.



6 Lift panel into opening and push F section out to sit flush to wall then affix F section to wall (fixings not included). **Ensure sufficient pilot holes are drilled before affixing.**



6 Affix panel to F section by pre-drilling 3mm holes and screwing through F section in corner positions – we suggest using 2 screws in each corner

GATE KITS FOR LEVER/KNOB SETS

9mm gate lockbox kit

SUITABLE FOR LEVER/KNOB LOCK SET

Order Code: **XP-GKIT-LSET09**

- Gate side frame kit is specifically machined to suit horizontal pedestrian gate with lockbox and KNOB/LEVER set
- Patented non-weld assembly system: Use pre-powder coated aluminium lockbox (Code: XP-LBOX-LSET)
- Suits 65x16mm slats with **9mm spacing**
- Lockbox and lever/knob handle sold separately

Finish – powder coat

BLACK (B) | MONUMENT (MN) | WOODLAND GREY (G)

KIT INCLUSIONS

a. 2 x 2094mm long Gate Side Frame slotted with 9mm space (1pc has extra machining for lock set)
b. 2 x 2094mm long Gate Inserts
c. 1 x 2200mm long Right hand machined Gate Stop
d. 1 x 2200mm long Left hand machined Gate Stop
e. 1 x 2200mm long non-machined Gate Stop (for hinge side)
f. 2 x 2250mm long Gate Stop Rubber
g. 2 x Gate Frame Cap – Black nylon
h. 1 x 10 pack Wafer head 10-16 x 16mm screws (for affixing gate stop)

GATE ACCESSORIES

Deadlatch lockbox

ALUMINIUM

Terrain

Order Code: **AW-LBOX-DL-TR**

- Patented non-weld lockbox
- Terrain powdercoat matches well with Kwila & WRC
- Suits horizontal slat gates with 65x16.5mm slats
- Must use with gate side frame (AWXP-4200-GSF09/20)
- Screw fix assembly of pre-powder coated lockbox and extrusion
- Suits Lockwood 001 deadlatch (XP-DL001)

Lockwood 001 deadlatch

12Gx65MM HEX FLANGE HEAD

Order Code: **XP-DL001**

- Lockwood 001 deadlatch to suit metal frames
- Market leading performance & reliability
- Only suits inwards swinging gate
- Cut-resistant stainless steel bolt

Lever/knob lockbox

ALUMINIUM

Black, Monument or Woodland Grey

Order Code: **XP-LBOX-LSET-B/MN/G**

- Patented non-weld lockbox
- Powder coated black, monument or woodland grey
- Suits horizontal slat gates with 65x16.5mm slats
- Must use with gate kits (XP-GKIT-LSET09/20)
- Screw fix assembly of pre-powder coated lockbox and extrusion
- Suits knob or lever sets (Stanley or Lockwood models)

Lockwood round knob set

HIGH PURITY ZINC ALLOY

Order Code: **XP-HDL-LW534**

- Lockwood model 534
- Knob set keyed both sides
- Lock / unlock both sides
- Suits left or right gate opening
- Satin Chrome brushed finish
- C4 5 pin on outside
- C4 6 pin restricted compatible on inside

Stanley round knob set

STAINLESS STEEL

Order Code: **XP-HDL-KNOB**

- Knob set keyed both sides
- Lock / unlock both sides
- Suits left or right gate opening
- Stainless steel knob and rose
- C4 6 pin restricted compatible (Inside & outside)

Stanley lever set

STAINLESS STEEL

Order Code: **XP-HDL-LEVER**

- Lever set keyed both sides
- Lock / unlock both sides
- Suits left or right gate opening
- Stainless steel knob and rose
- C4 6 pin restricted compatible (Inside & outside)

Electric Striker

Order Code: **XP-HDL-ES**

- Optional electric striker kit
- Left or right handing
- Power required to lock/unlock
- 12 volt (DC current)
- LATCHING POST – face mount SS304 striker face plate with built in side keeper
- Requirement to notch latching post to recess electric striker mechanism
- Allow 9mm latching gap
- Compatible with locks: XP-HDL-LW534
  XP-HDL-KNOB

Self drilling wafer screws

10Gx16MM – BAG OF 100

Black, Monument

Order Code: **XP-SCREWS-B/MN**

- 10G x 16mm self drilling wafer head zinc plated
- Powder coated heads for neat finish
- Use to screw fix slats to Quickscreen side frame or to affix centre support rail to slats

Countersunk blind rivet

4.0x8.4

Order Code: **XP-GATESTOP-RIV-10PK**

- Countersunk aluminium rivet – 10 pack
- Use for affixing gate stop to post when using a lockbox with Lockwood 001 deadlatch – due to 3mm gap requirement between gate side frame and post rivets are required (as screw heads may interfere)

Nylon packer

USE WITH D&D
LOKK LATCH DELUXE

Order Code: **XP-PACKER**

- UV stabilised nylon
- Must be used when installing a D&D Lokk Latch Deluxe
- Packer aligns Lokk Latch Deluxe with gate side frame
- Affixes to inner face of gate side frame positioned under Lokk Latch striker

Gate stop rubber

4300MM LONG

Order Code: **XP-GATESTOP-RUB**

- Used as bumper for gate stop (mates with XP-4200-GSTOP)
- Rubber feeds into cavity in gate stop extrusion
- Cut to required length

PACK OF 10

Gate frame screws

12Gx65MM HEX FLANGE HEAD

Order Code: **XP-SCREWSGF-10PK**

- Use to secure gate slats to gate side frame through pre-machined holes in gate side frames
- Hex flange head for easy assembly

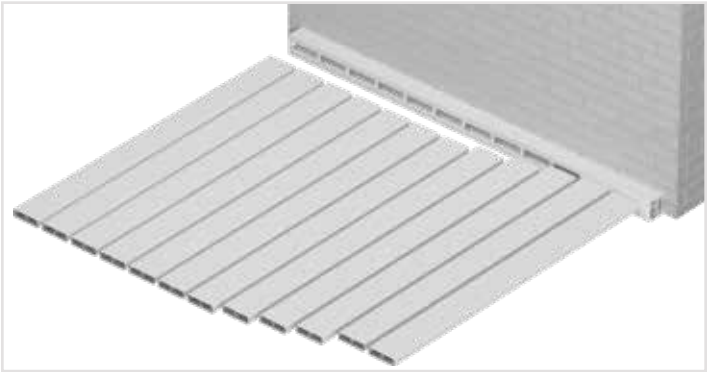
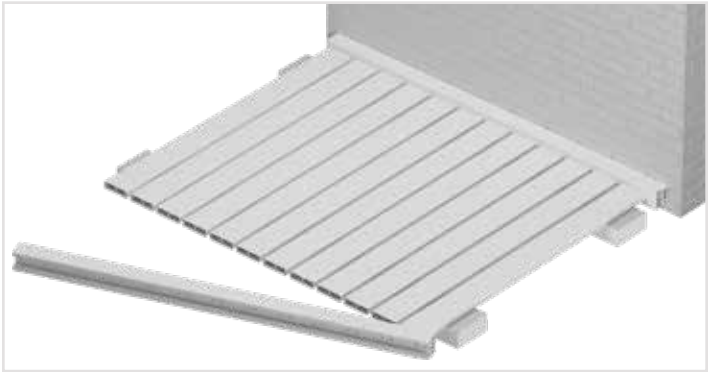
GATE ASSEMBLY: SIMPLE OVERVIEW

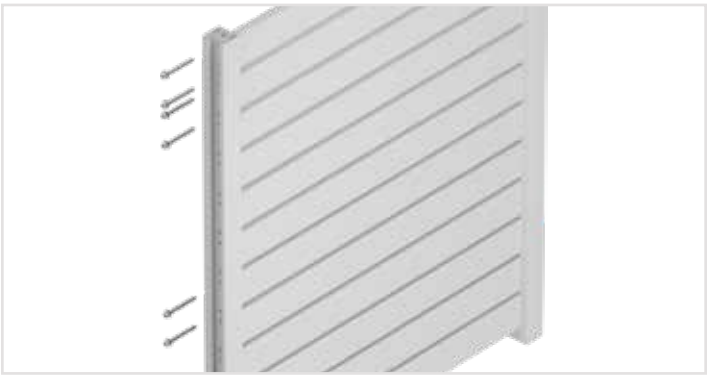
GATE OPTIONS 1, 3 & 4



1 On a flat protected surface, lay 1x gate side frame with slotted spacer infill and rest against a padded stop and tap slats and gate blades into place



2 Elevate slats and gate side frame on two padded bearers. Engage second gate side frame to slats and tap frame until all slats are fully engaged
TIP: Start at one end and work slats in from one end to the other



3 Screw off gate blades at required positions. Ensure gate is square by measuring diagonals

4 Slide 2x outer infills down into position to hide screw heads

5 Slide 2x outer infills past end of gate side frame (approx. 10mm), then using pliers, bend inner legs of outer infill slightly outwards. Tap outer infill back to level with gate side frame
TIP: This step stops the outer infill from sliding down prior to hardware installation

6 Insert top caps into side frames

To determine the actual slat width for your gate, make a deduction of 36mm to the overall gate width (outer edge to outer edge of gate side frame)

FORMULA FOR SLAT WIDTH:
OVERALL GATE WIDTH – 36MM

You need to allow for hinge and latch gaps
Check hinge and latch hardware specifications for gaps required and take this information into account when determining overall gate width

Contact us for further installation instructions when using lockboxes etc.

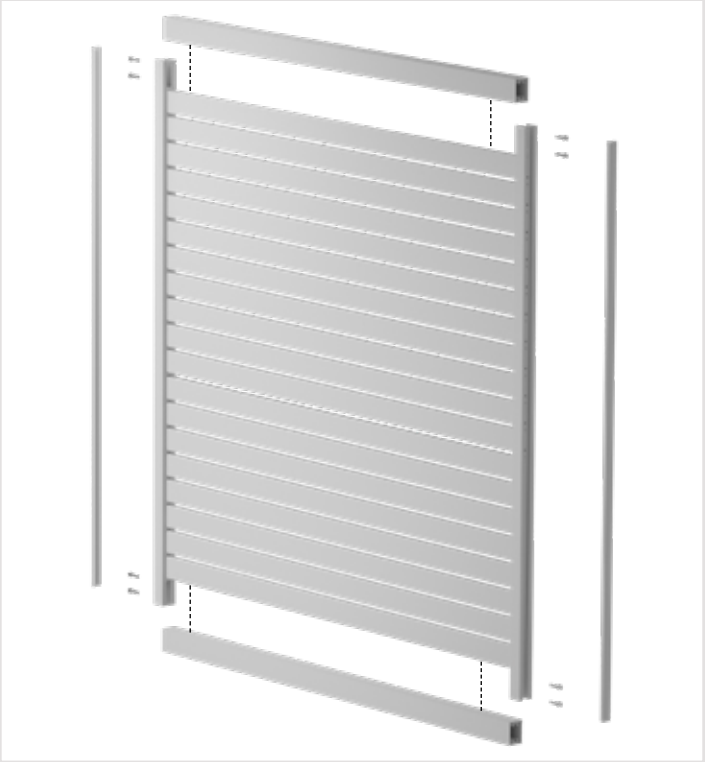
GATE ASSEMBLY

GATES WIDER THAN 1500MM

1 When the gate is wider than 1500mm, 2x heavy duty top/bottom rails are used in place of the top and bottom gate blades (Additional gate blades are still required as per page 127).



2 Once top/bottom rails and all slats are installed, ensure gate is square.
The slimline brace must be measured and cut with an aluminium drop saw to run diagonally across the back face of the gate.
Secure each slat using XP-SCREWS.

IMPORTANT:

Ensure the slimline brace is installed running from the 'bottom' hinge side corner to the top 'latch' side corner

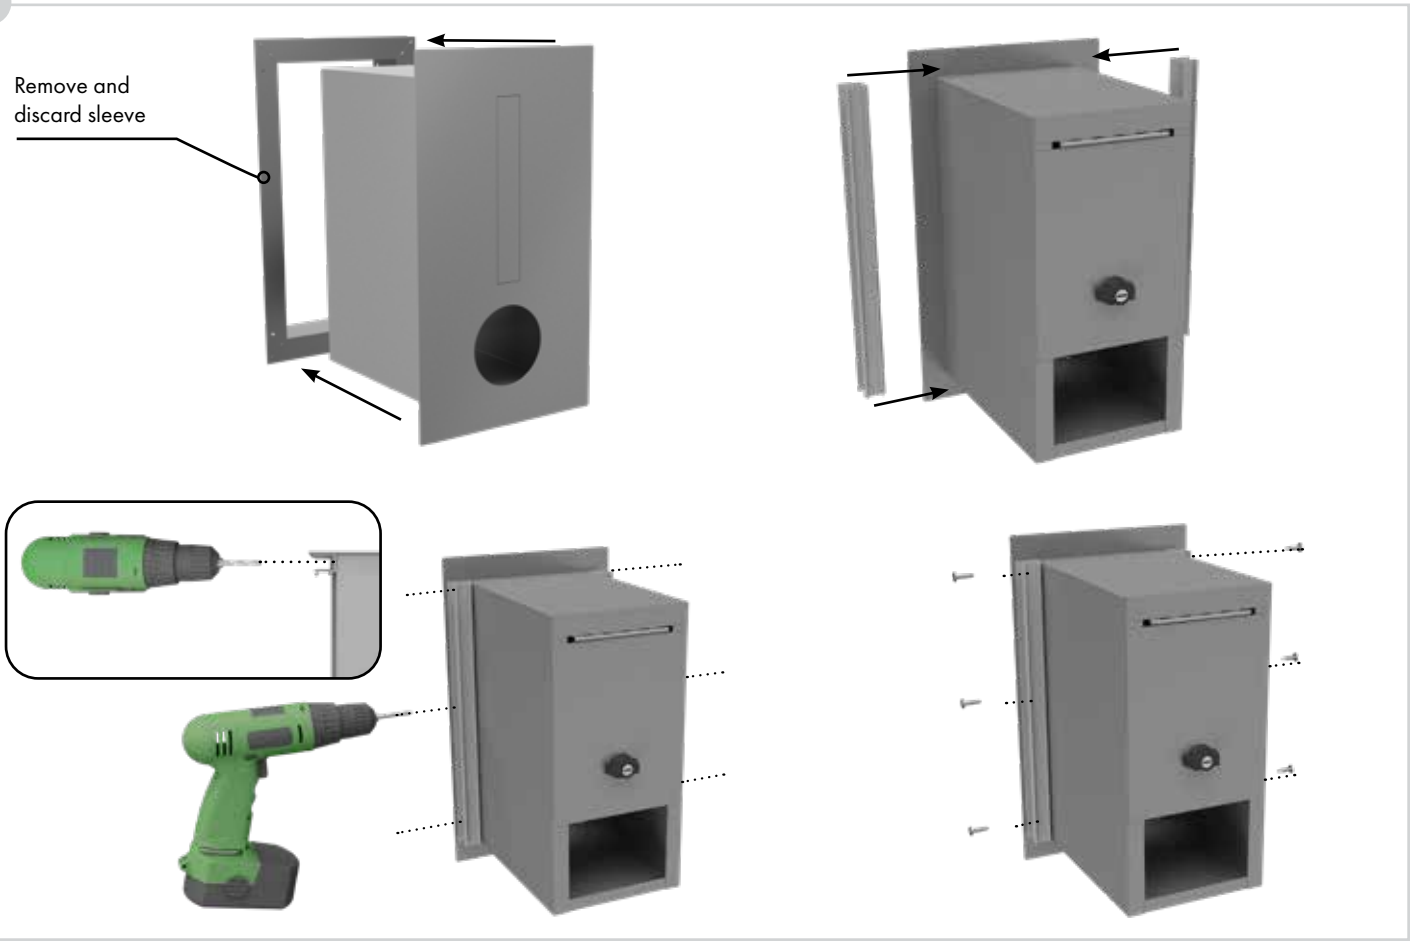
TYPICAL CONFIGURATION

POSTA SLAT LETTERBOX INSTALL GUIDE

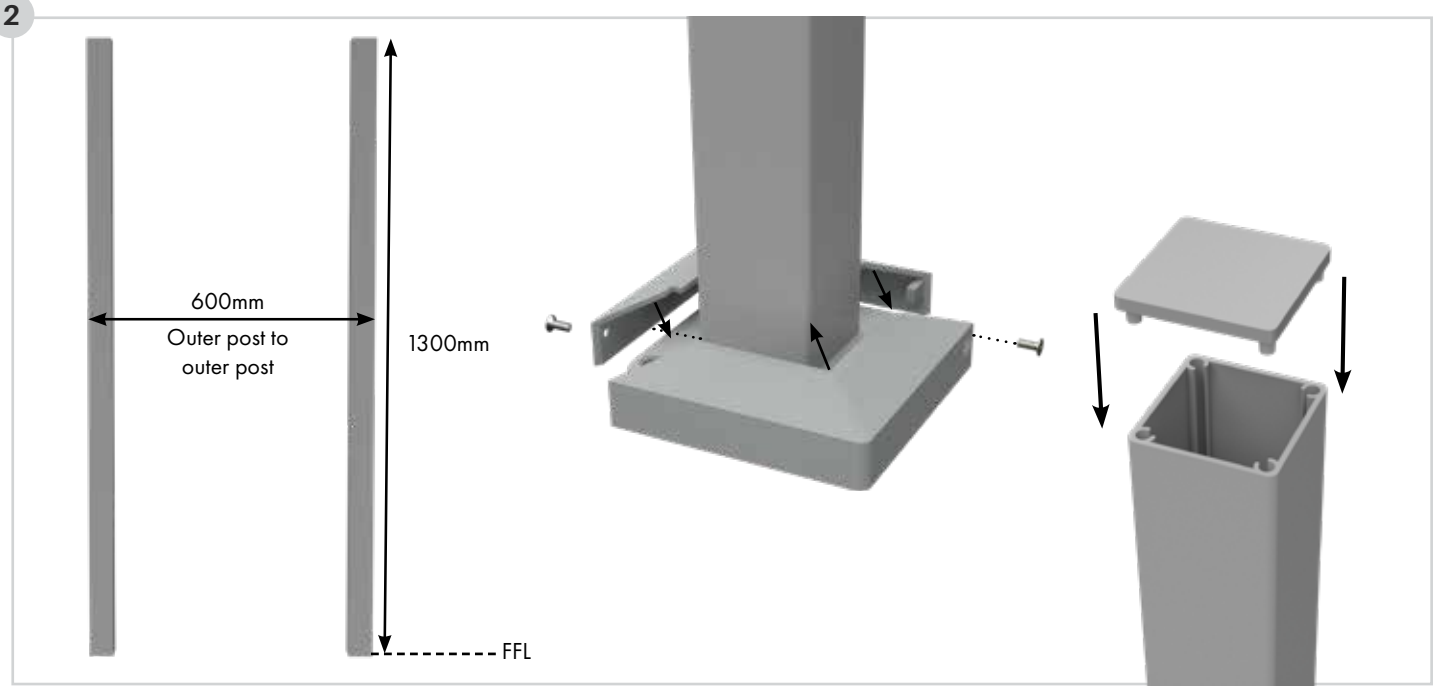
1



Remove and discard sleeve.

Attach Quickscreen Side Frame to either side of the Letterbox box, directly behind the face-plate using 3.5mm pilot holes and 6 x 10Gx18mm screws (from Quickscreen kit).

2



Install 50x50mm posts level at 600mm apart (post outer to post outer) at 1300mm high above finished floor level (FFL).

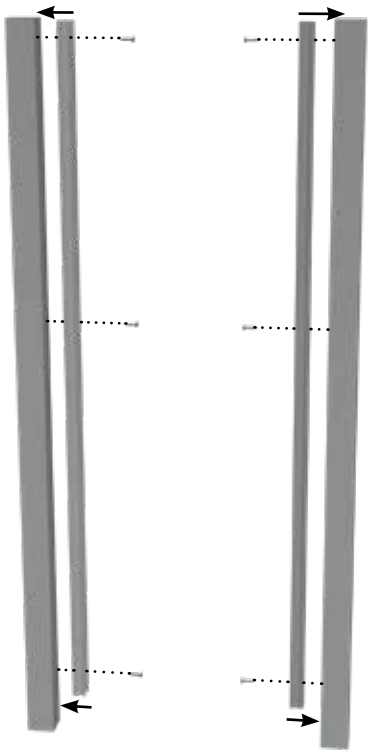
If posts are installed in-ground, ensure they are embedded appropriately. A minimum of 300mm wide x 300mm deep concrete footing for each post is recommended.
Fit 2 x Domical Covers (if base-plate posts are used).

Insert caps into tops of posts.

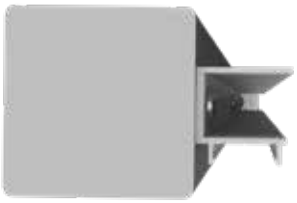
TYPICAL CONFIGURATION

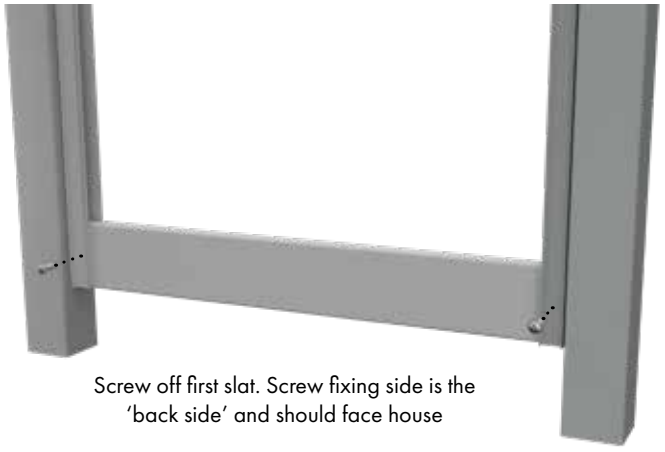
POSTA SLAT LETTERBOX INSTALL GUIDE

3



Align Side Frame top with top of Post, NOT top of top cap

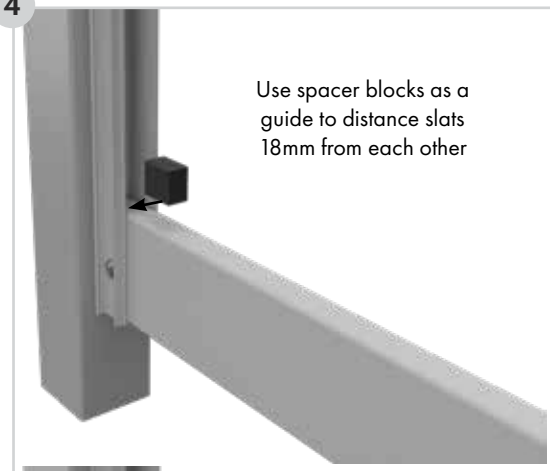




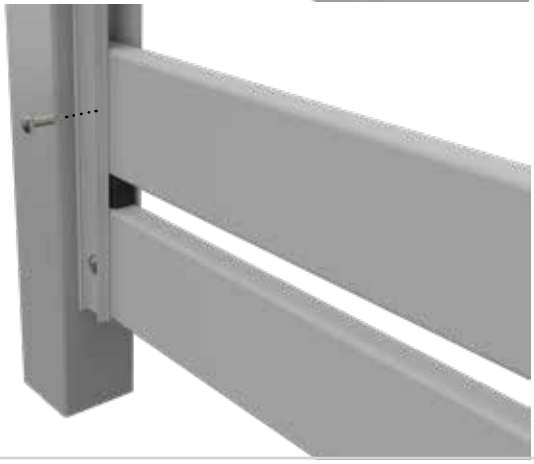
Screw off first slat. Screw fixing side is the 'back side' and should face house

Attach side frame inline with the top of the post (not top of post cap). Fix off sideway through side frame into post at 3 places – top, middle and bottom of side frame. Install the bottom slat ensuring level and screw fix both sides using 10Gx18mm screws.

4



Use spacer blocks as a guide to distance slats 18mm from each other



Install the two top slats, with the top of the top slat flush with the top of the side frame

Gap equal to letterbox height

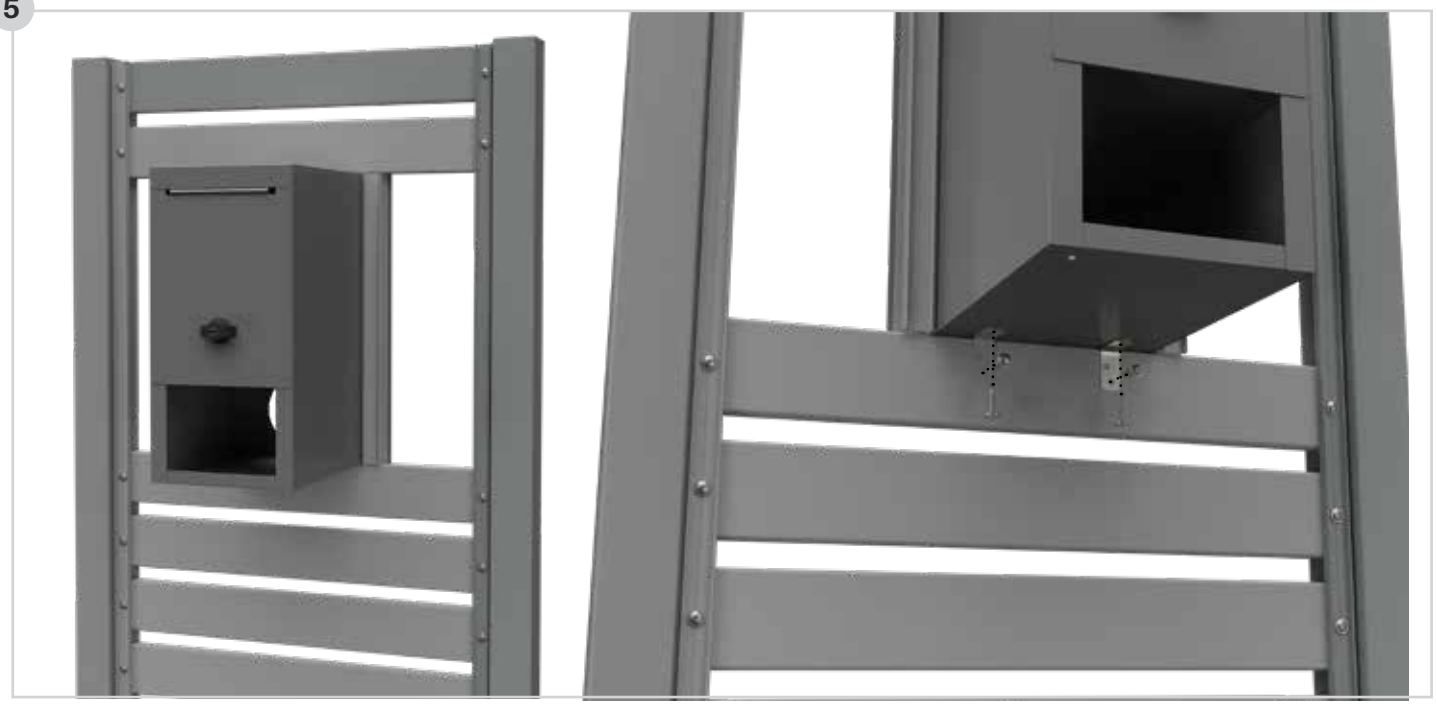
TIP: Temporarily place letterbox into opening for next slat placement.

Using 18mm spacer (2x9mm spacers taped together from Quickscreen Kit), install each slat one at a time for the first 9 slats. Use 1 x 10Gx18mm screw each side of slat. Using the letterbox to temporarily set the void, install the two top slats with an 18mm space between them and the top slat flush against the top of the side frame. Spacer blocks may be removed once slats are screw-fixed to position.

TYPICAL CONFIGURATION

POSTA SLAT LETTERBOX INSTALL GUIDE

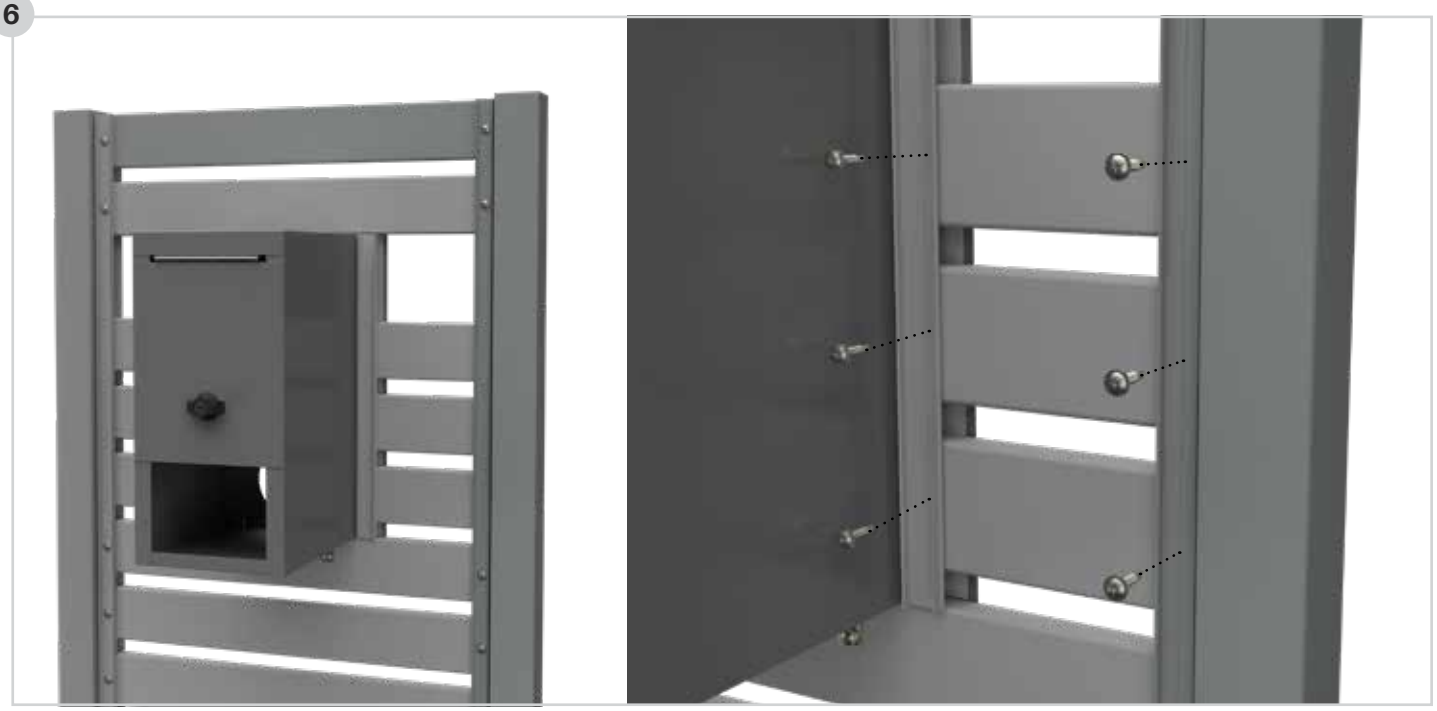
5



Resting the letterbox in the slat opening and centring the letterbox equally between the two posts, screw the two supplied angle brackets to the underneath of the letterbox body using the 10Gx18mm screws, ensuring the face of the letterbox is firm against the slat at the front.

NOTE: Do not cover drain holes in the letterbox body

6



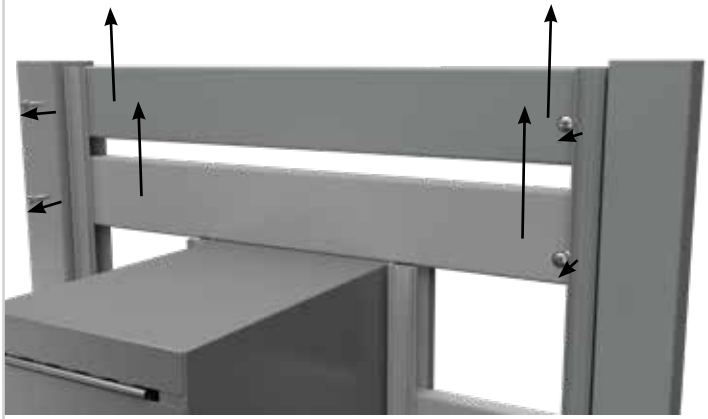
Loosely fit the next 3 short slats each side of the letterbox, then screw-fix ensuring an 18mm gap between each.

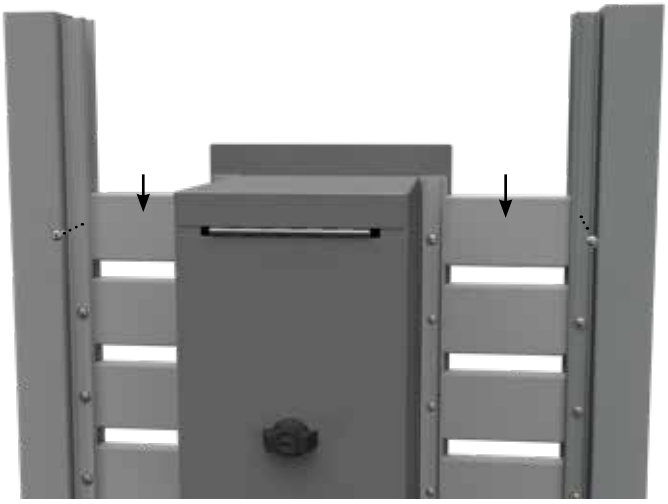
TIP: to fit into void gap, tilt the slats at an angle and then straighten out to level.

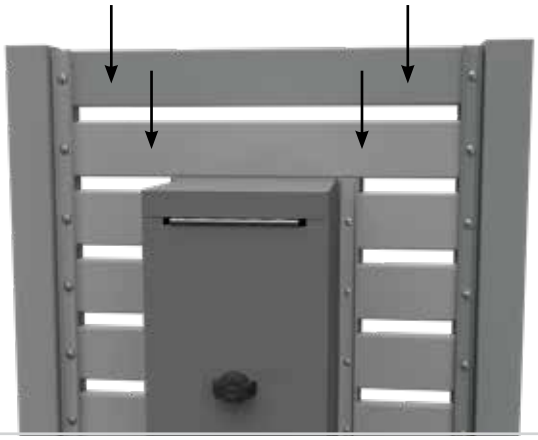
TYPICAL CONFIGURATION

POSTA SLAT LETTERBOX INSTALL GUIDE

7







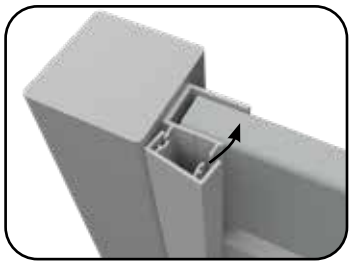
Replace and re-screw top two slats

Unscrew and remove the top two slats temporarily and position the final two short slats each side of the letterbox. Replace the top two full slats and re-screw.
Screw-fix the final short slats with an 18mm space.

8

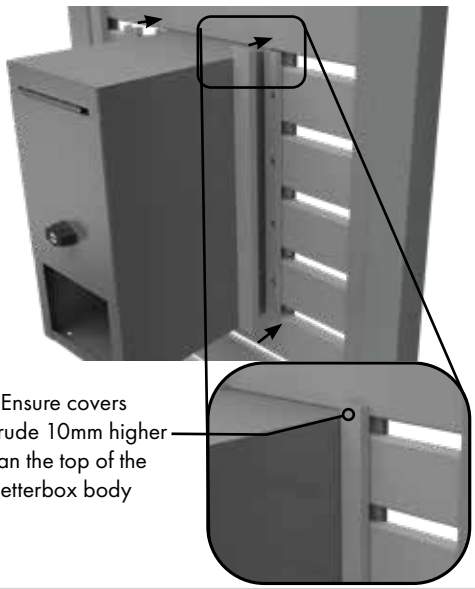
Snap on side frame covers

TIP: Engage shorter leg of snap-on cover first.



TIP: Use a mallet with a wood block to tap on side frames

Snap on side frame covers for side frames attached to letterbox



Ensure covers protrude 10mm higher than the top of the letterbox body

Fit concealing fixing covers to each post side frame to hide slat screws.
TIP: Engage shorter leg of snap-on cover first. At this point the snap-on cover will be sitting off the frame on an angle, the longer leg must be at open side of frame.
Starting from one side and working your way along, use a wood block and a hammer/mallet to tap the longer leg in place. A short, sharp tap may be required to engage the long leg.
Fit concealing fixing covers to each side frame attached to the letterbox body, ensuring the covers protrude 10mm higher than the top of the letterbox body.
