placement if unsure.

The highest quality shower screen glass.

We have developed a reputation in the trade for supplying the highest quality tempered glass. Absolute attention to detail in production, packing and quality control mean clients can be assured of consistency of top quality products.

Glass factory

All steps in production process reach the highest quality levels.

Float glass

- All glass is processed from the same float glass supplier
- Quality and die batch of glass remains consistent
- Strict quality checks to ensure only conforming float glass is processed.

Double edge polishing machines

- Perfect polish and blemish free edges
- Horizontal double edge polishing machines give the finest edge finish
- Speed of glass through edging machine is monitored
- Quality control personnel check each sheet of glass
- Sophisticated water filtration system ensures clean water used during polishing.

Tempering oven

Toughened glass is made from annealed glass via a thermal tempering process. The glass is placed onto a roller table, taking it through a furnace that heats it above its annealing point of approx 700°C. The glass is then rapidly cooled with forced air drafts. Of critical importance in glass processing is the tempering furnace used.

- Furnace used can toughen up to 2440 x 3600mm glass
- Specially designed furnace for heavy glass – Optimally toughens 8mm thick and above
- On-site mechanic ensures regular maintenance
- Punch testing of toughened glass every hour as per Australian Standards.

Tested & certified

Our 6mm, 8mm, 10mm & 12mm glass is tested and certified as complying with the requirements of Australian & New Zealand Standard 2208:1996 – Safety Glazing Material in Buildings.

Detailed quality control

At each stage of production (cutting, polishing, drilling, tempering and packing) dedicated Quality Control Personnel inspect each sheet of glass. Glass identified as not conforming to the highest quality standards is set aside.

In addition to skilled factory staff, GO retains its own Quality Assurance people to review shipments. Random sampling of glass is undertaken to ensure compliance with detailed quality assurance specifications relating to glass surface finish, edge finish, labelling identification, packing specification and the like. Quality assurance reports are provided to GO and the factory to ensure the highest standards are continually achieved and monitored.

Full ERP system implemented with each sheet barcoded: records kept to show exact time glass processed at each step of production = industry leading manufacturing.

GASP testing machine: MEASURING SURFACE STRESS IN TEMPERED GLASS to ensure optimal tensile surface strength. Testing with the GASP machine allows optimisation of furnace settings; ensures conformance to specifications and avoids under or over-stressing glass.

Attention to detail in packing

Shower glass panels are individually packed in cardboard cartons for extra protection in situations where shower panels must be moved through construction sites and/or confined spaces. With each panel in a protective cardboard box the chance of chipping or scratching glass prior to install is reduced significantly.

We're serious about quality, seriously.

Toughened shower glass is Grade "A" standard and proudly displays the Global Mark certified product mark.

We are authorised to display the Global Mark product conformance mark as confirmation that the manufacturing process is able to consistently produce glass in compliance with AS/NZS 2208: 1996 Safety Glazing Materials In Buildings.

SGS

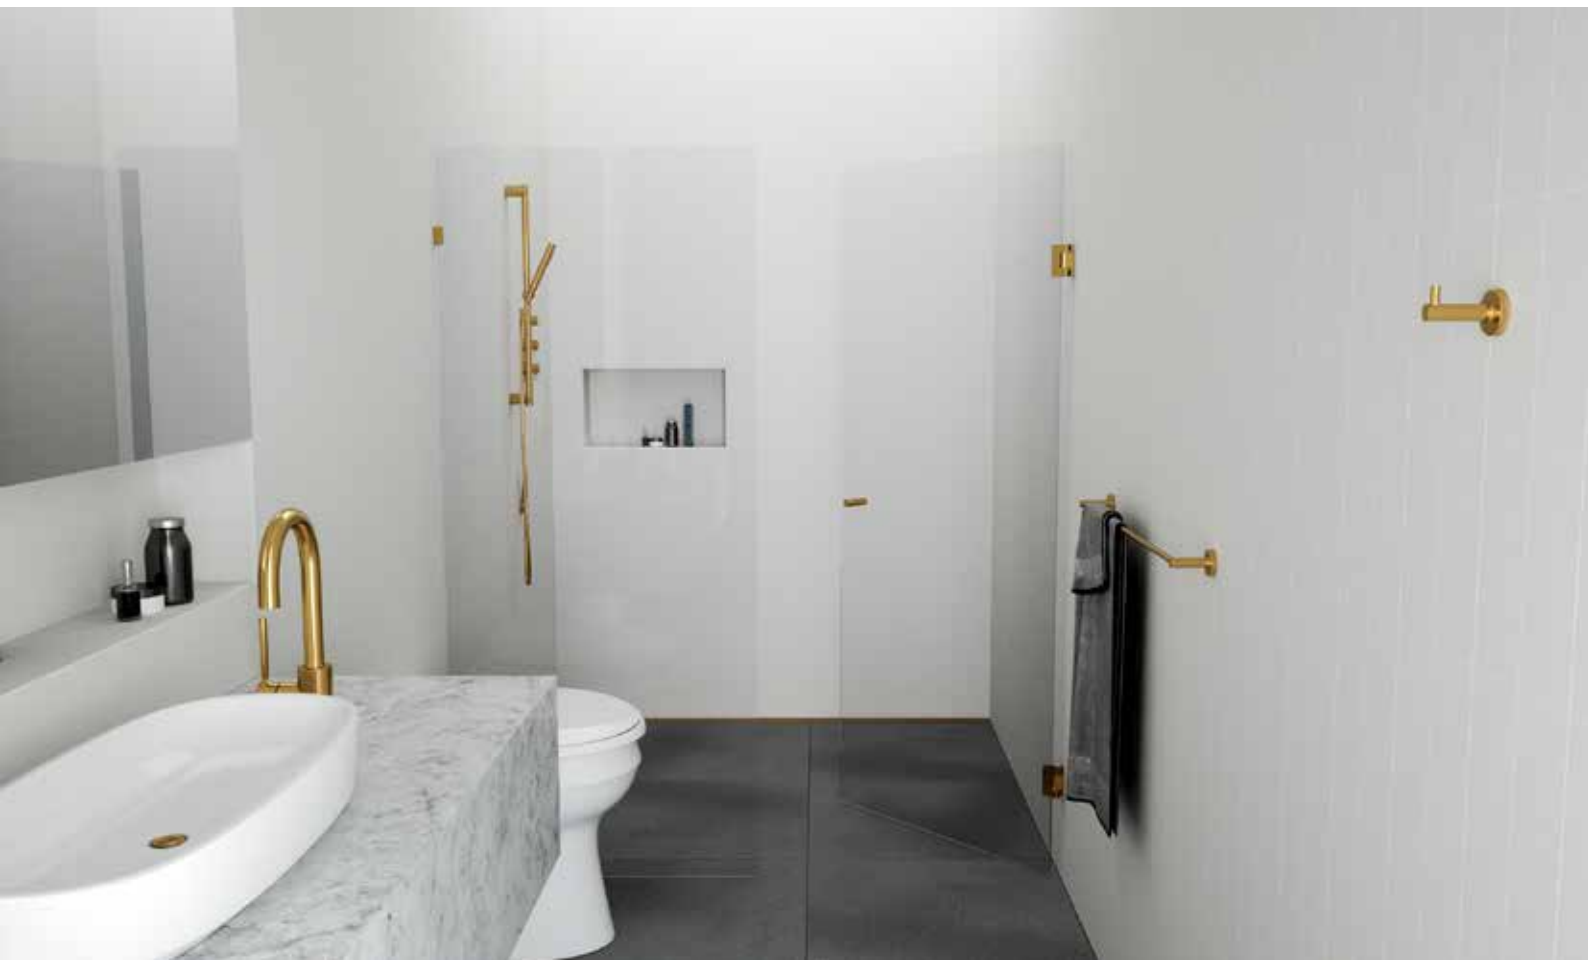

Taking the extra steps

In addition to Global Mark conformance, GO retains the services of SGS. SGS is internationally recognized as the leader for inspection, verification, testing and certification with 90,000 employees and 2000 offices globally.

GO has retained SGS to review and audit factory compliance to detailed production requirements as set out by Global Mark in conjunction with requirements of AS/NZS 2208:1996.

Companies globally rely on SGS for independent third-party inspections, testing and auditing solutions to ensure products, services and processes comply with the latest quality standards.

The combined efforts of a world leading production facility, Global Mark conformance and independent auditing by SGS ensure GO supplies industry leading quality.

REPELS WATER

WARRANTY

The world's leading glass treatment now available & applied

Ultimate protection

Optically clear, UV stable, chemical resistant, water and oil repellent

Reduces maintenance costs

EnduroShield keeps glass visibly cleaner for longer and reduces the frequency between cleans

Highly durable

Permanently bonds to the glass and comes with a true 10 year performance warranty*

Suits all glass ranges

From balustrading to pool fencing, high rise and domestic glazing, shower screens and insulated glass units, EnduroShield is the smart choice for glass

**A permanent*
coating that is
both water and
oil repellent**

Silicone based coating

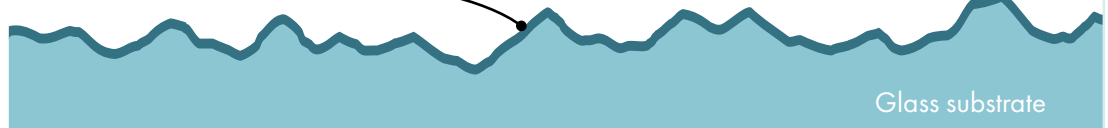

Competitor products fill in hills & valleys of the glass

Glass substrate

EnduroShield coating

EnduroShield follows hills & valleys of the glass

Glass substrate

Silicone based sealers sit on top of the glass surface and can quickly wear off, leaving the surface unprotected. EnduroShield follows the hills and valleys of the glass, forming a strong, permanent* bond that does not flake or peel.

Testing and certification

*EnduroShield's performance has been independently tested by one of the leading global testing and certification houses, TÜV Rheinland in Germany for durability, easy-clean functionality, safety and quality. Testing was carried out to simulate a lifetime of 10 years on glass for both interior and exterior use, and EnduroShield passed all test.

- Easy to clean
- Durability tested

*Contact us for warranty info and terms and conditions

How to place your EnduroShield order

We now offer an EnduroShield coating service in-house, applied by fully accredited and specially trained staff

Purchase our EnduroShield coating service as an optional extra on your next order!

This service can be purchased for job lot orders from all glass ranges, including project orders.

Enduroshield service is not available on Trilogy or Linea ranges.

Step 1

Place order for glass as normal

Step 2

Specify EnduroShield coating required

We have a FREE excel calculator which provides instant pricing.

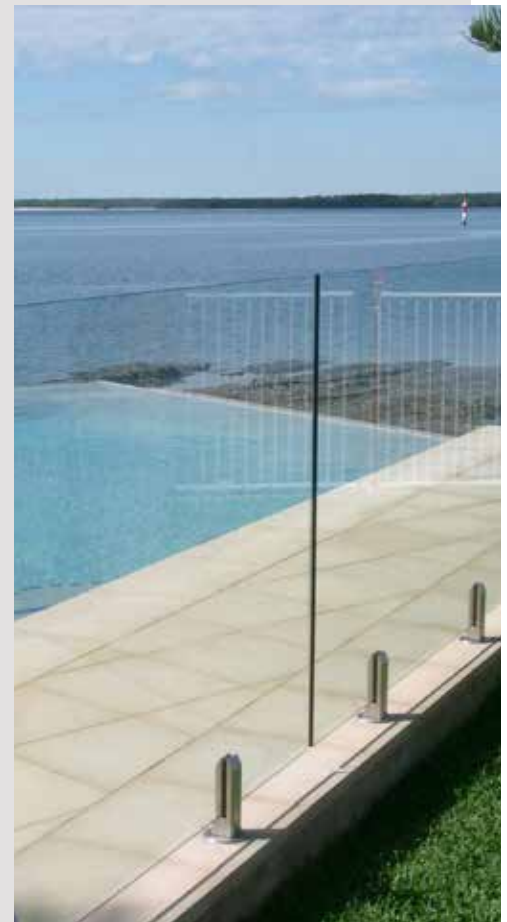

Contact us for your copy

Step 3

We will provide you with a sales order confirmation of pricing with EnduroShield coating

Step 4

We will apply EnduroShield coating on both sides of glass in your order. Once coating has cured, glass will be ready for pick-up, delivery or freight as required

BIANCO

We ensure the highest quality finish on our most popular bright polished shower fittings

Brass is carefully
chromed to ensure a
perfect bright finish

Stainless steel surfaces
are highly polished to
a pristine mirror finish

Aluminium surfaces
are bright polished to
an immaculate finish

HINGES

Suits 8mm & 10mm glass panels

1

Optimised hinge plate

Hinge plate hole distance optimised for maximum clamping action

2

Grub screws secured with Loctite

For precaution, Loctite is used to secure threaded grub screws

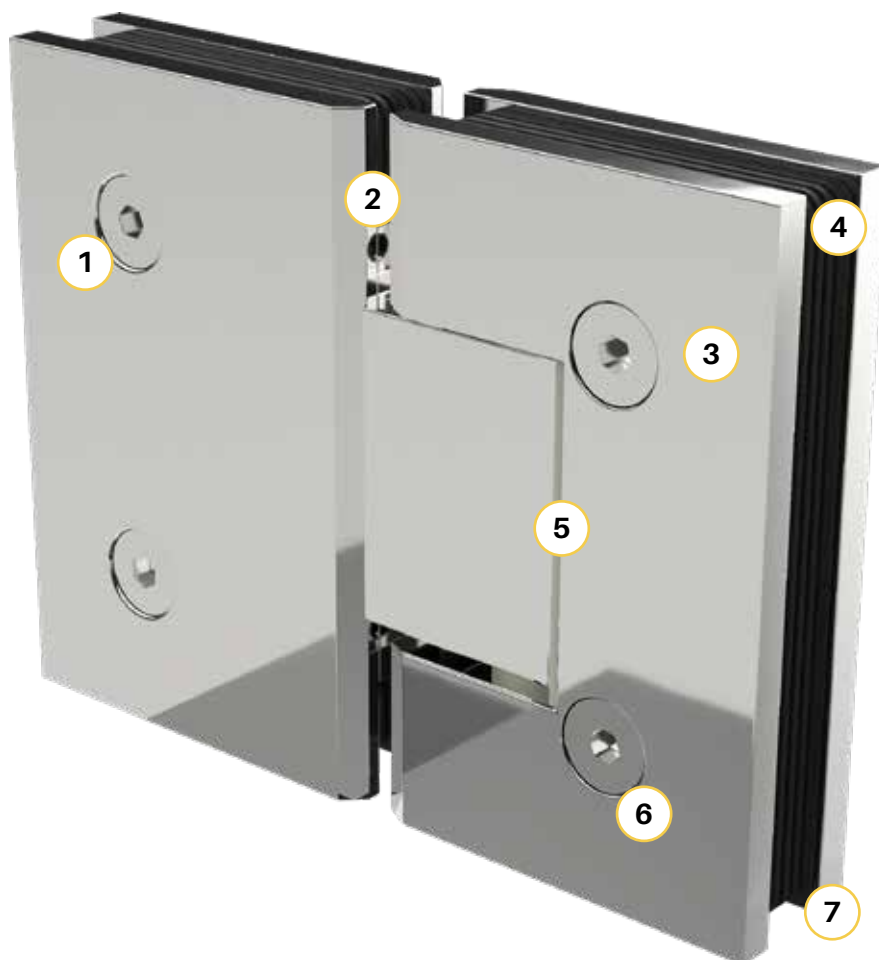

3

Allen key head screws

For ease of installation and to minimise scratching caused by flat head screwdrivers, allen key head screws are used

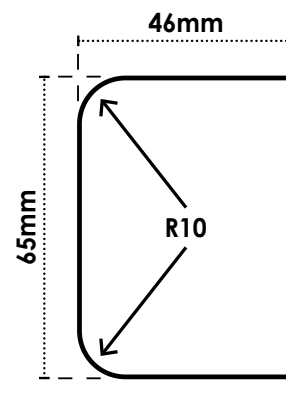

FREE plastic screw cap covers included

GLASS CUT OUT DETAIL

This cut out applies to all hinges excluding heavy duty hinges & 6mm Zurich hinges

4

Superior quality EPDM gaskets

Gaskets are pregilded to the hinges and overlapping plates for easy installation

5

Scratch protectors

Neatly positioned protectors to prevent issues when hinge opens and closes

6

Knurled back screws

Advantage of superior locking action to prevent screws working loose

7

Smart clamping plate design

Recessed clamping plate ensures perfect fit to hinge body

Spring design

Durable tempered stainless steel spring

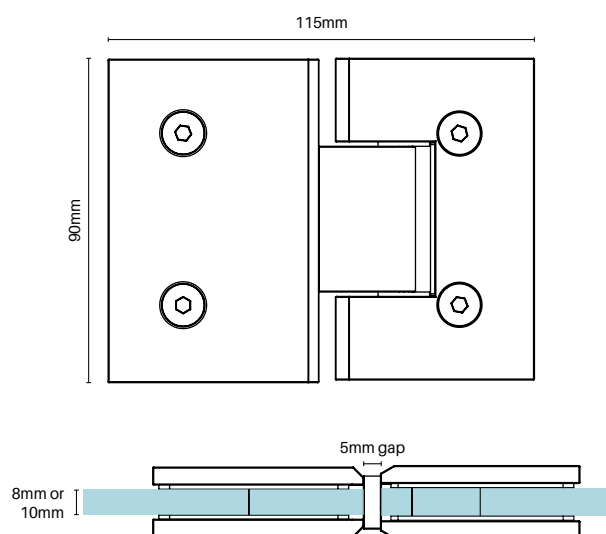

Sealed spring cavity

Innovative hinge design allows spring cavity to be completely sealed which prevents water penetration into cavity

Round circular knob

Chrome plated, matt black, brushed brass/gold, matt white, gunmetal & brushed nickel finishes

Order Code: P-KRC (Bianco – Chrome)
PN-KRC (Nero – Black)
P-ORO-KRC (Oro – Brushed Brass/Gold)
P-SNO-KRC (Sno – White)
P-GIO-KRC (Gio – Gunmetal)
P-NIKL-KRC (Nikl – Brushed Nickel)
P-PEARL-KRC (Pearl satin)

- Solid round knob with two circular grooves
- Slimline Ø25mm double pull knob
- Suits 6mm, 8mm, 10mm and 12mm thick glass
- 30mm long per side

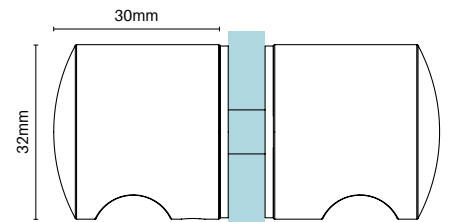

Purity Showerscreens®

Full round knob

Chrome plated or matt black finish

Order Code: P-KRF (Bianco – Chrome)
PN-KRF (Nero – Black)

- Sleek solid round knob with finger notch
- Double pull knob
- Suits 8mm, 10mm and 12mm thick glass

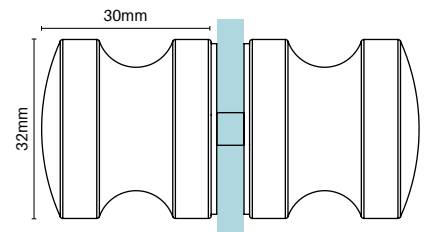

Purity Showerscreens®

Round recessed knob

Chrome plated or matt black finish

Order Code: P-KRR (Bianco – Chrome)
PN-KRR (Nero – Black)

- Easy gripping with full finger notch
- Double pull knob
- Suits 8mm, 10mm and 12mm thick glass

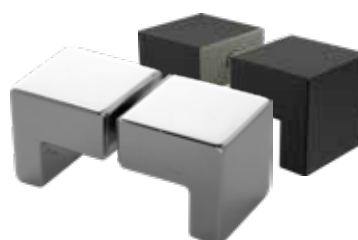

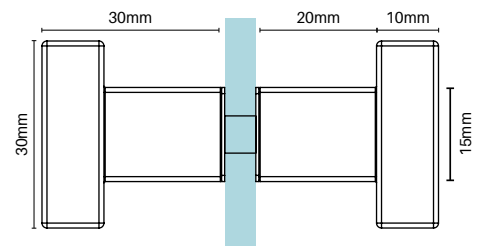

Purity Showerscreens®

Square recessed knob

Chrome plated or matt black finish

Order Code: P-KSR (Bianco – Chrome)
PN-KSR (Nero – Black)

- Easy gripping with full finger notch
- Double pull knob
- Suits 8mm, 10mm and 12mm thick glass

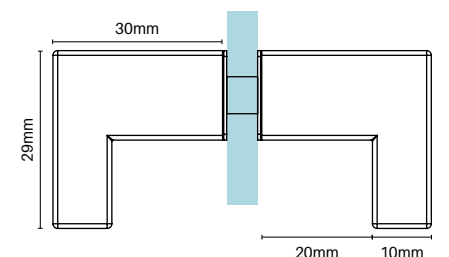

Purity Showerscreens®

Square L shape knob

Chrome plated or matt black finish

Order Code: P-KSL (Bianco – Chrome)
PN-KSL (Nero – Black)

- L shape profile
- Double pull knob
- Suits 8mm, 10mm and 12mm thick glass

ZÜRICH KNOBS

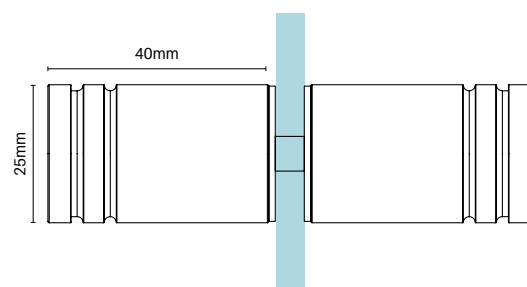

Zürich round circular knob

Pearl satin finish

Order Code: **ZUR-PEARL-KRC (Pearl satin)**

- Slimline Ø25mm round knob with two circular grooves
- Double pull knob
- Suits 6mm, 8mm, 10mm and 12mm thick glass
- Pearl satin chrome
- 40mm long per side
- Outstanding price point

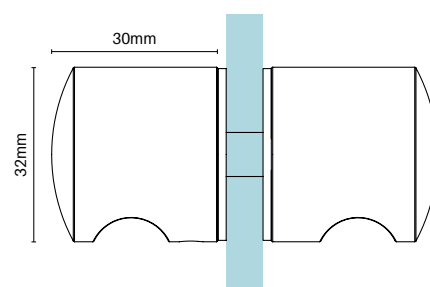

Zürich full round knob

Chrome plated or pearl satin finish

Order Code: **ZUR-KRF (Chrome)**

ZUR-PEARL-KRF (Pearl satin)

- Sleek round knob with finger notch
- Double pull knob
- Suits 8mm, 10mm and 12mm thick glass
- Polish or pearl satin chrome
- Outstanding price point

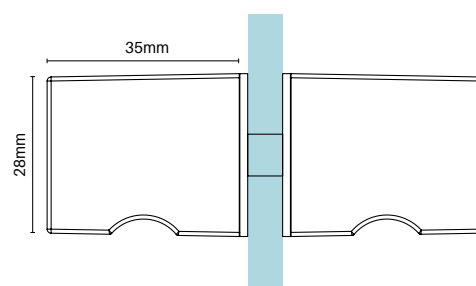

Zürich square recessed knob

Chrome plated or pearl satin finish

Order Code: **ZUR-KSF (Chrome)**

ZUR-PEARL-KSF (Pearl satin)

- Easy gripping with full finger notch
- Double pull knob
- Suits 8mm, 10mm and 12mm thick glass
- Polish or pearl satin chrome
- Outstanding price point

SOLID ALLOY KNOBS

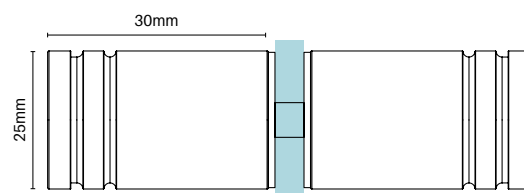

Purity Showerscreens®

Solid premium alloy round circular knob

Matt black

Order Code: **PN-KRC-AA (Nero – Black)**

- Round knob with two circular grooves
- Slimline Ø25mm double pull knob
- Suits 6mm, 8mm, 10mm and 12mm thick glass
- Premium alloy with precision CNC machining
- Superior corrosion resistance

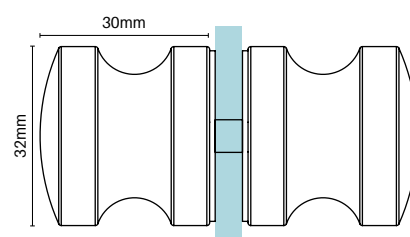

Purity Showerscreens®

Solid premium alloy round recessed knob

Matt black

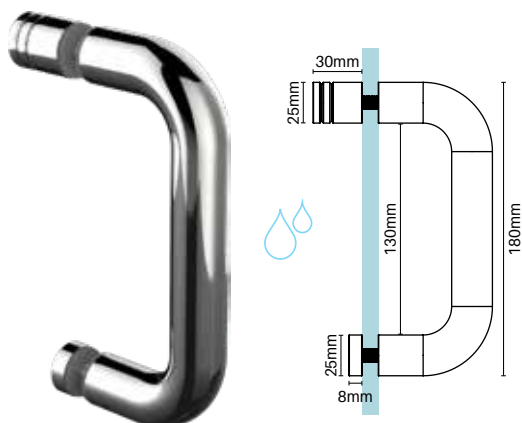

Order Code: **PN-KRR-AA (Nero – Black)**

- Easy gripping with full finger notch
- Double pull knob
- Suits 8mm, 10mm and 12mm thick glass
- Premium alloy with precision CNC machining
- Superior corrosion resistance

PURITY HANDLES

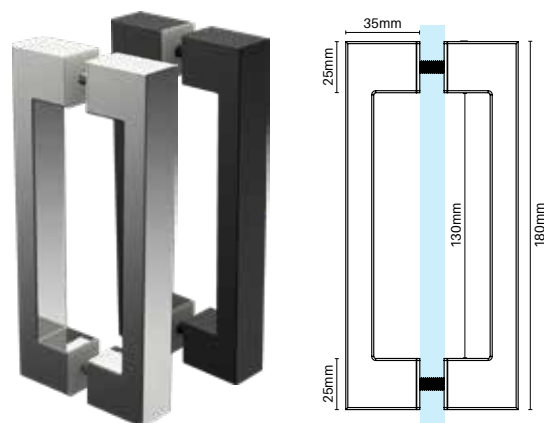

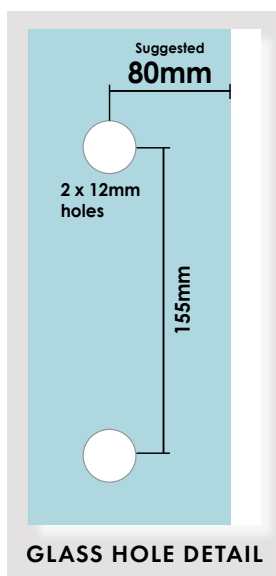

Purity Showerscreens® round D handle with internal knob

Polish SS304 – 180mm long

Order Code: **P-HANDLE-180 (180mm long)**

- Pull knob on inside of door panel with external D handle; Ø25mm
- Suits 8mm, 10mm and 12mm glass
- Manufactured in SS304; Polish finish
- Nylon spacers and gaskets included to prevent glass touching metal
- 180mm handle suits holes in modular Purity doors

Purity Showerscreens® Square D handle

Polish SS304 or matt black finish

Order Code: **P-HD (Bianco – Chrome)**

PN-HD (Nero – Black)

- Back to back pull handle; suits 8mm, 10mm and 12mm glass
- Manufactured in SS304; Polish or matt black finish
- Nylon spacers and gaskets included to prevent glass touching metal
- Suits holes in modular purity doors

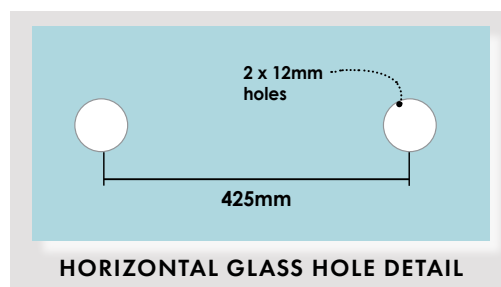

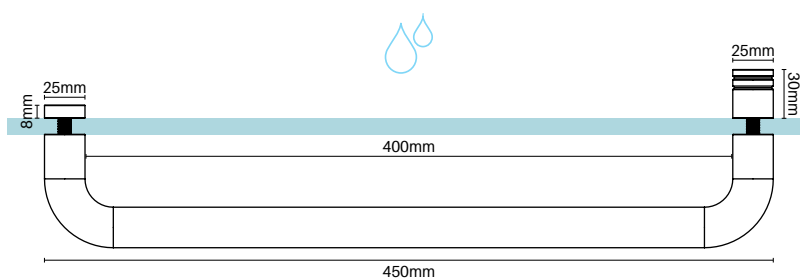

Purity Showerscreens® 450mm round D handle with internal knob

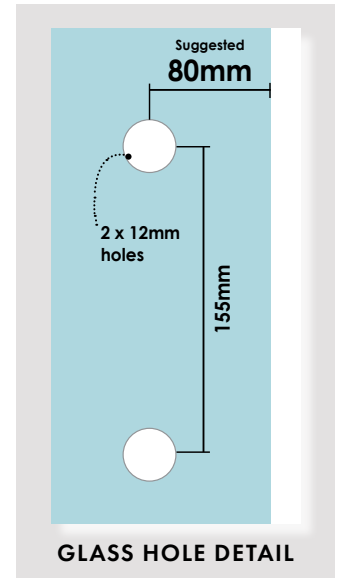

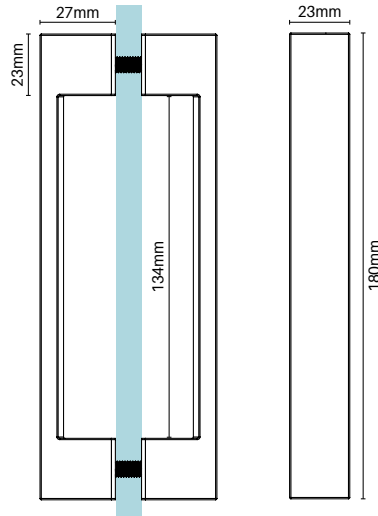

Polish SS304 – 450mm long

Order Code: **P-HANDLE-450 (450mm long)**

- Pull knob on inside of door panel with external D handle; Ø25mm
- Suits 8mm, 10mm and 12mm glass
- Manufactured in SS304; Polish finish
- Nylon spacers and gaskets included to prevent glass touching metal
- 450mm handle commonly installed horizontally with external D handle to be used as a towel rail – suits 425mm hole to hole centres
- May also be installed vertically (with holes in glass as required)
- Does not suit installation with modular glass door panels. Custom made glass is required

ZÜRICH HANDLES

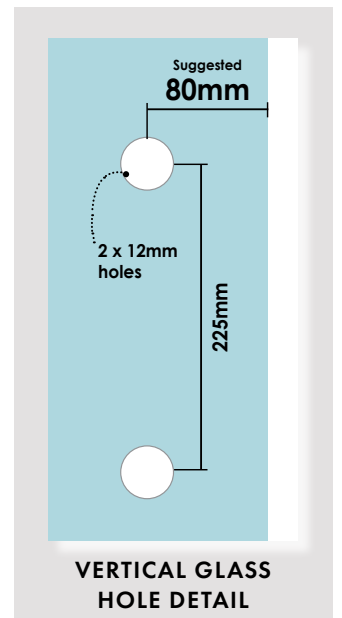

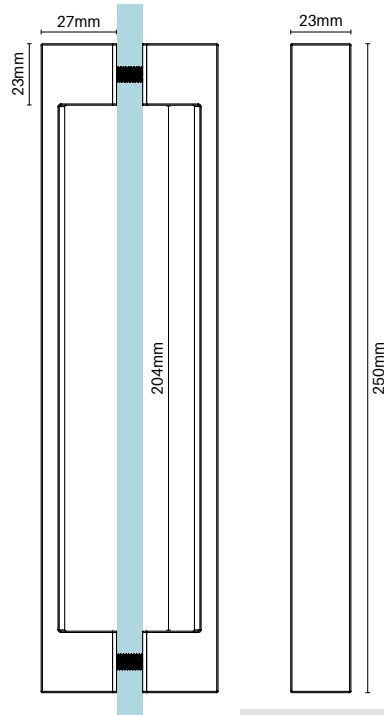

Zürich Square D handle – 180mm long

Chrome plated or pearl satin finish

Order Code: ZUR-HD (Chrome)

ZUR-PEARL-HD (Pearl satin)

- Latest European design with slimline square profile with inner rounded handle for easy gripping
- Back to back pull handle; suits 8mm, 10mm and 12mm glass
- Polish or pearl satin chrome finish
- Nylon spacers and gaskets included to prevent glass touching metal
- Suits holes in modular Purity doors

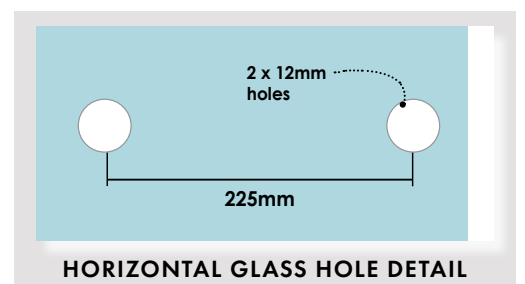

Zürich Square D handle – 250mm long

Chrome plated or pearl satin finish

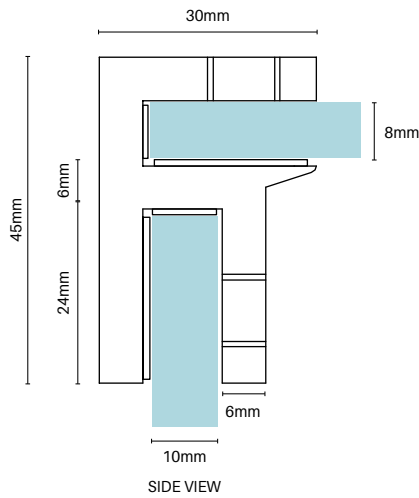

Order Code: ZUR-HD-250 (Chrome)

ZUR-PEARL-HD-250 (Pearl satin)

- Latest European design with slimline square profile with inner rounded handle for easy gripping
- Back to back pull handle; suits 8mm, 10mm and 12mm glass
- Polish or pearl satin chrome
- Nylon spacers and gaskets included to prevent glass touching metal
- Install vertically or horizontally – horizontal rail may be used as a towel rail
- Does not suit installation with modular glass door panels. Custom made glass is required

500ML BOTTLES**
Covers up to 32sqm
Order Code: ENDURO-GC-500

REPELS WATER

WARRANTY

The world's leading glass treatment now available & applied

Ultimate protection

Optically clear, UV stable, chemical resistant, water and oil repellent

Reduces maintenance costs

EnduroShield keeps glass visibly cleaner for longer and reduces the frequency between cleans

Highly durable

Permanently bonds to the glass and comes with a true 10 year performance warranty*

Suits all glass ranges

From balustrading to pool fencing, high rise and domestic glazing, shower screens and insulated glass units, EnduroShield is the smart choice for glass

We will expertly coat your glass shower screen panels in our branches*

*Enduroshield is not available on Trilogy & Linea ranges.

**A permanent*
coating that is
both water and
oil repellent**

Silicone based coating

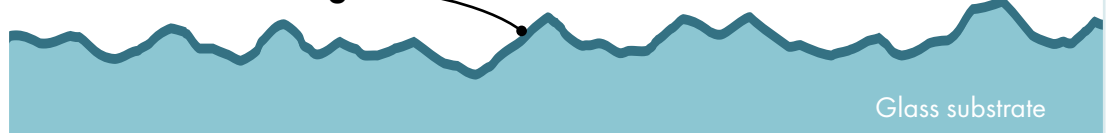

Competitor products fill in hills & valleys of the glass

Glass substrate

EnduroShield coating

EnduroShield follows hills & valleys of the glass

Glass substrate

Silicone based sealers sit on top of the glass surface and can quickly wear off, leaving the surface unprotected. EnduroShield follows the hills and valleys of the glass, forming a strong, permanent* bond that does not flake or peel.

Testing and certification

*EnduroShield's performance has been independently tested by one of the leading global testing and certification houses, TÜV Rheinland in Germany for durability, easy-clean functionality, safety and quality. Testing was carried out to simulate a lifetime of 10 years on glass for both interior and exterior use, and EnduroShield passed all test.

- Easy to clean
- Durability tested

*Contact us for warranty info and terms and conditions

U CHANNELS

Purity Showerscreens®

Aluminium U channel

Chrome plated, matt black, brushed brass/gold, matt white, gunmetal, brushed nickel & pearl satin finishes

Order Code: P-U-2100 (Bianco – Polish)

PN-U-2100 (Nero – Black)

P-ORO-U-2100 (Oro Brushed Brass/Gold)

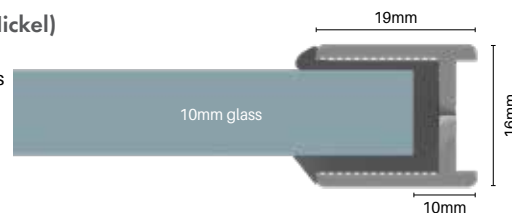

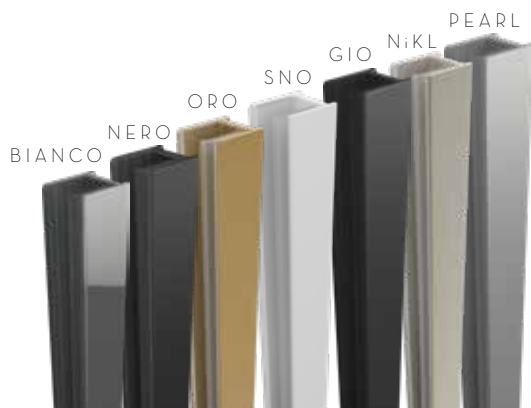

P-SNO-U-2100 (Sno – White)

P-GIO-U-2100 (Gio – Gunmetal)

P-NIKL-U-2100 (Nikl – Brushed Nickel)

P-PEARL-U-2100 (Pearl satin)

- Slimline dry glaze system – no need for silicone on glass
- Fast installation
- Suitable for 10mm clear glass
- Consider using when wall is out of square (up to 6mm)
- Internal ribs hold secure 2 part clear glazing PVC
- U channel and 2 part clear glazing PVC included
- 2100mm long – easy to cut shorter if required
- Positions glass edge 10mm from wall

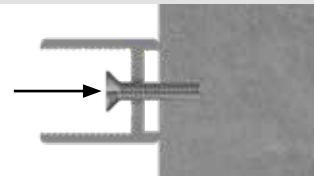

2100mm long

After cutting the U channel to size:

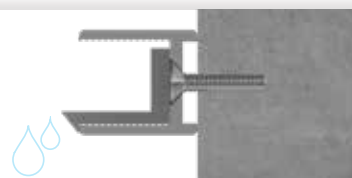

1

Screw the aluminium U channel to wall using counter sunk screws.
(Ensure wall plugs are used if an internal stud cannot be located)
Recommended minimum 3x screw fixings per channel evenly distributed
from top to bottom of U channel
(Fixings not supplied – source own fixings depending on substrate)

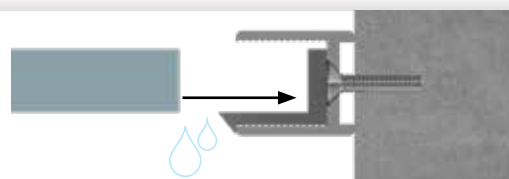

2

Run the L shaped rubber wedge inside the U channel with 'fin' facing
inside the shower.
If need be, consider making a hole in PVC where screws are placed
to stop PVC bulging out. Screw head must not penetrate past PVC if
hole is made.

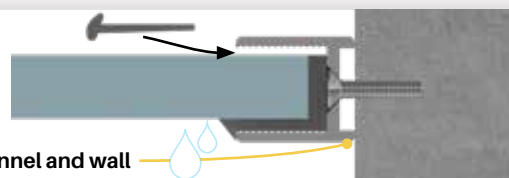

3

Insert 10mm glass panels

4

With a square offcut of soft pine timber & a rubber mallet, tap in the
clear plastic wedge on the outside of the showerscreen, working from
the bottom up.

Apply silicone seal between U channel and wall

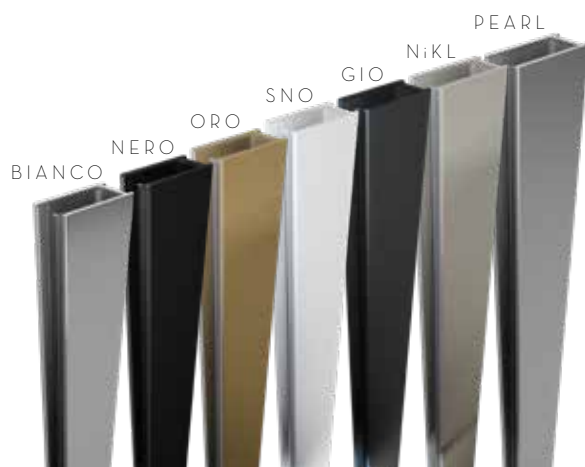

WE STOCK A RANGE OF
SILICONES & ACCESSORIES

U CHANNELS

Extended U channel – dry glaze, no silicone required

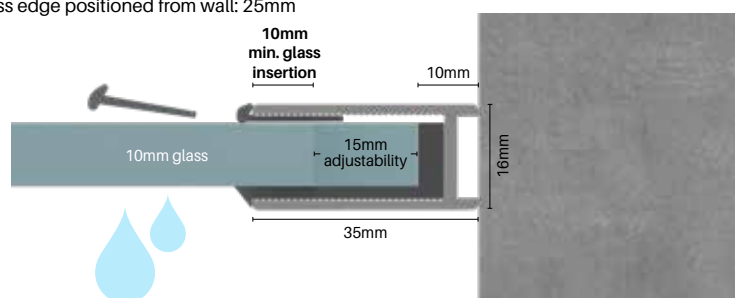

EXTENDED Aluminium U channel

Chrome plated, matt black, brushed brass/gold, matt white, gunmetal, brushed nickel & pearl satin finishes

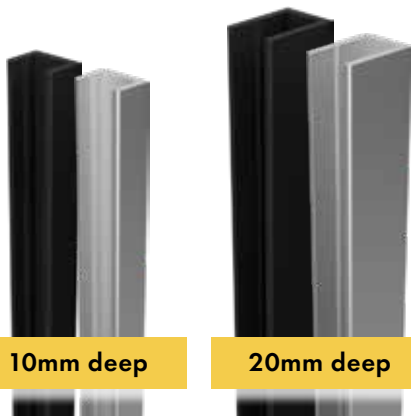

Order Codes: P-U-2100-EXT (Bianco – Polish)
PN-U-2100-EXT (Nero – Black)
P-ORO-U-2100-EXT (Oro Brushed Brass/Gold)
P-SNO-U-2100-EXT (Sno – White)
P-GIO-U-2100-EXT (Gio – Gunmetal)
P-NIKL-U-2100-EXT (Nikl – Brushed Nickel)
P-PEARL-U-2100-EXT (Pearl satin)

- Extended U channel dry glaze system
- Ideal for use when walls are out of square to a large degree
- Provides extra width if required when installing glass panels
- Allows up to 15mm of width adjustment inside U channel
- *Min. distance glass edge positioned from wall: 10mm
- *Max. distance glass edge positioned from wall: 25mm

TRADE TIP: Temporarily hold the L-shape rubber in place with tape to assist with glazing the 10mm glass panel.

Wet glaze – silicone required

10mm deep

20mm deep

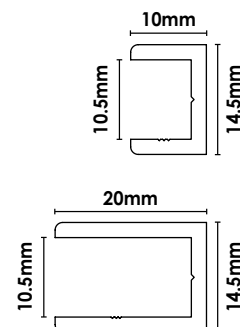

10mm anodised U channel (wet glaze)

Order Code: P-UWET-2500-10MM (2500mm)
PN-UWET-2500-10MM (2500mm)

20mm anodised U channel (wet glaze)

Order Code: P-UWET-2500-20MM (2500mm)
PN-UWET-2500-20MM (2500mm)

- Wet glaze U channel system – silicone required
- 2500mm long – adjust length by easily cutting channel
- Suits 8 & 10mm glass
- 2 finishes: Aluminium clear/satin anodise and black anodise
- 2 channel depths: 10mm or 20mm deep
- U channel can be used to secure panels to wall, ceiling or floor
- Commonly used as recess fit into tiles/wall

WATER SEALS

PVC hinge gap water seal

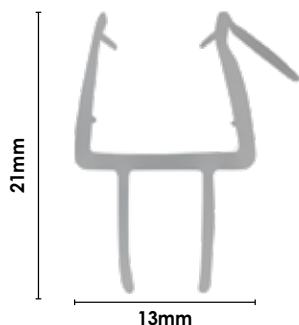

Order Code: P-SH10-2100 (2100mm)

- Water seal between hinge panel and door
- Suits 10mm thick glass
- U section – rigid PVC
- Single leg – 6mm flexible PVC
- Anti-mould additives included in PVC
- Simply snap onto hinge panel
- Available in 2100mm lengths

IF NO WATER BAR REQUIRED

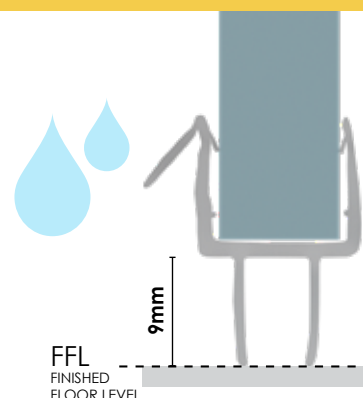

OPTION
1

9mm PVC under door water seal

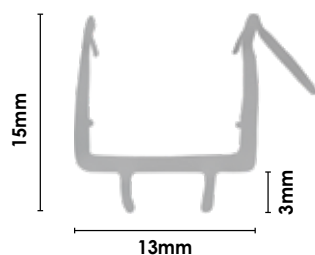

Order Code: P-SD10-0600-09F (600mm)
P-SD10-2100-09F (2100mm)

- Water seal under glass door with 9mm wipes
- Suits 10mm thick glass
- U section – rigid PVC
- 2x vertical leg wipes – 9mm flexible PVC
- 45 degree angle drip rail incorporated
- Anti-mould additives included in PVC
- Simply snap under glass door panel
- Available in 600mm and 2100mm lengths

IF USING A ROUND WATER BAR AND UNDER DOOR SEAL

OPTION
2

3mm PVC under door water seal

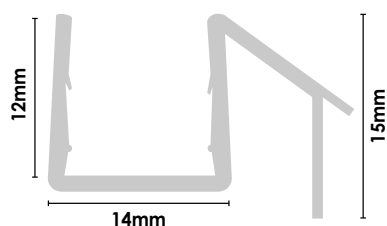

Order Code: P-SD10-0600-03F (600mm)
P-SD10-2100-03F (2100mm)

- Water seal under glass door with 3mm wipes
- Suits 10mm thick glass
- U section – rigid PVC
- 2x vertical leg wipes – 3mm flexible PVC
- 45 degree angle drip rail incorporated
- Anti-mould additives included in PVC
- Simply snap under glass door panel
- Available in 600mm and 2100mm lengths
- Use in conjunction with our anodised aluminium or clear acrylic water bars

Refer option 2A, 2B, 2C
on following page for
use with water bars

IF USING A RECTANGULAR WATER BAR AND UNDER DOOR SEAL

OPTION
3

Slimline PVC under door water seal

Order Code: P-SD10-2100-SLIM

- Slimline water seal designed for minimal clearance under door
- Suits 10mm thick glass
- Anti-mould additives included in PVC
- Simply snap under glass door panel
- Designed to be used in conjunction with 9mm high rectangular water bar
- Available 2100mm long

Refer option 3 on p51

Soudal kitchen/ bathroom silicone

TRANSLUCENT – 300mL
Order Code: **SODU-KBS-TRANS**

- Translucent finish
- High quality, neutral cure silicone
- Easy to smooth & finish
- For sealing, waterproofing and bonding applications
- Contains mould & mildew inhibitors
- Colourfast and UV resistant
- Strong adhesion to glass, tile, ceramics, aluminium, metals (including powder-coated & anodised), painted surfaces, fibreglass, stainless steel
- Use standard caulking gun

Soudal kitchen/ bathroom silicone

WHITE – 300mL
Order Code: **SODU-KBS-W**

- White finish
- High quality, neutral cure silicone
- Easy to smooth & finish
- For sealing, waterproofing and bonding applications
- Contains mould & mildew inhibitors
- Colourfast and UV resistant
- Strong adhesion to glass, tile, ceramics, aluminium, metals (including powder-coated & anodised), painted surfaces, fibreglass, stainless steel
- Use standard caulking gun

Soudal all purpose silicone

300mL
Order Code: **SODU-APS-B**

- Black finish
- High quality, neutral cure silicone
- Ultimate all rounder silicone (roof/gutter, kitchen/bathroom, glass/glazing)
- For sealing, waterproofing & bonding applications
- Strong adhesion to ceramics, glass, aluminium (including powder coated & anodised), PVC, stainless steel, zinc & galvanised coated surfaces, timber, concrete, fibreglass, laminate, painted surfaces, etc
- UV resistant with very good mould resistance (biocide with fungicidal action)
- Water potable & food safe
- Use standard caulking gun

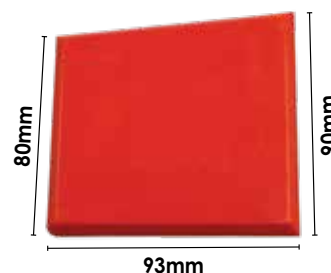

Bostik 6S

300G – TRANSLUCENT
Order Code: **P-S-6S**

- Translucent finish
- High performance neutral cure silicone sealant
- Contains a mould and mildew inhibitor
- Seals water tight – UV and weather resistant
- Designed for use in showers, baths, sinks and laundries

Compatible substrates:

- Glass
- Ceramic tiles
- Grout
- Aluminium
- Steel
- Masonry
- Most plastics

Purity silicone spatula

MEDIUM FLEXIBILITY

Order Code: **P-SS**

- Handy tool for glazing panels with silicone
- Made from thermoplastic polyurethane – good elasticity and resistant to oils, grease & abrasion
- 1 x corner features radius (R4) for neat silicone finishing

Purity clear setting blocks

1.5mm or 3mm x 12mm x 50mm

Order Code:

P-SB-1.5MM-20PK (1.5mm thick)

P-SB-3MM-20PK (3mm thick)

- Position under glass panels to separate bottom edge of glass from floor
- Available in 1.5mm or 3mm thick

Glass gloves – pair of 2

ONE SIZE FITS ALL

NOT FOR USE WHEN WET

Order Code: **GLOVE**

Ultraloc Threadlocker 3242 compound

10ML BOTTLE

Order Code:

ULTRALOC-3242

- Medium strength removable grade threadlocking compound for metal screws, nuts and fasteners from 6mm to 20mm in diameter

EXTRAS & ACCESSORIES

Tile drill bit

Tungsten carbide bit

Order Code: **P-BIT-6MM** (6mm)

P-BIT-7MM (7mm)

P-BIT-8MM (8mm)

- Available in 6mm, 7mm or 8mm diameter
- For smooth drilling into ceramic tiles, brick, fibreglass & plastics
- Tungsten carbide bit with copper brazing
- Diamond facet spear point for precision penetration
- Bits fit into standard drills

THE PERFECT FINISH EVERYTIME.

Our new hardware swatches allow clients to select the perfect finish everytime. Compact & portable for meetings or for your showroom display.

Contact us for more info

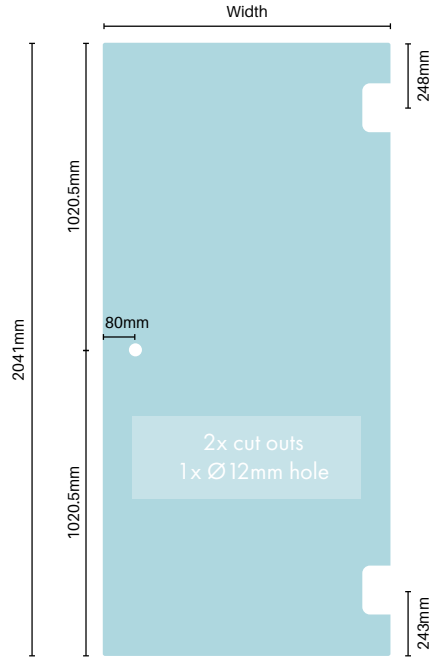

Swatch Set

Order Code: **P-SWATCH**

- Swatch set in white carry bag
- 50mm diameter swatches of 7 x finishes: Chrome; Pearl satin; Gio gun metal; Nikl brushed nickel; Oro brushed brass/ gold; Sno white; Nero black
- Ideal for showing hardware colour finish options available

Wall bracket options

1 Purity wall bracket
Bianco, Nero, Oro, Sno, Gio, Pearl Satin & Brushed Nickel

2 Purity offset wall bracket
Bianco, Nero, Oro, Sno, Gio, Pearl Satin & Brushed Nickel

3 Purity round wall bracket
Bianco or Nero

Dry glass U Channel options

Dry glass extended U Channel options

DOOR & FIXED PANEL CONFIGURATIONS

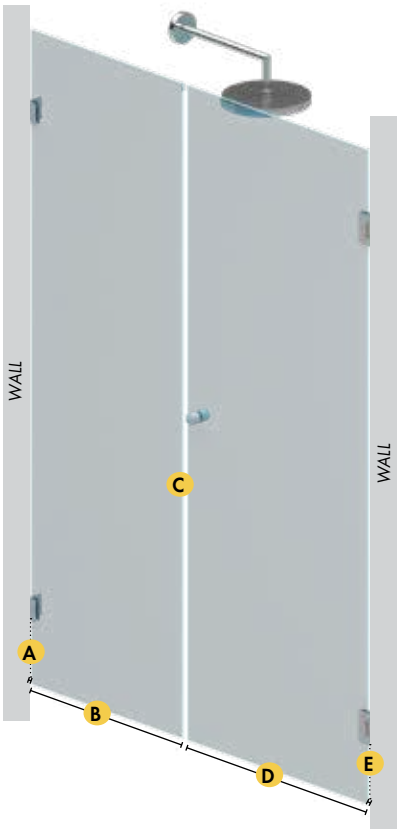

Overview

A fixed panel with a hinged door is ideal for wider inline shower openings.

This guide outlines the sizes available when using our range of fixed panels and shower doors.

- 10mm thick clear toughened
- 1 mm radius corners
- Individually boxed panels
- Flat polished edges

- A** BRACKET GAP (MM)
***if channel used, gap variance changes – refer last 2 columns for OVERALL WIDTH calculation*
- B** GLASS FIXED PANEL WIDTH (MM)
- C** GAP (MM)
- D** GLASS DOOR PANEL WIDTH (MM)
- E** HINGE GAP (MM)

HINGE & DOOR PANEL WITH INFILL PANEL

Overview

Purity hinged door with adjacent infill panel

An INFILL/FIXED panel next to a door is another popular configuration.

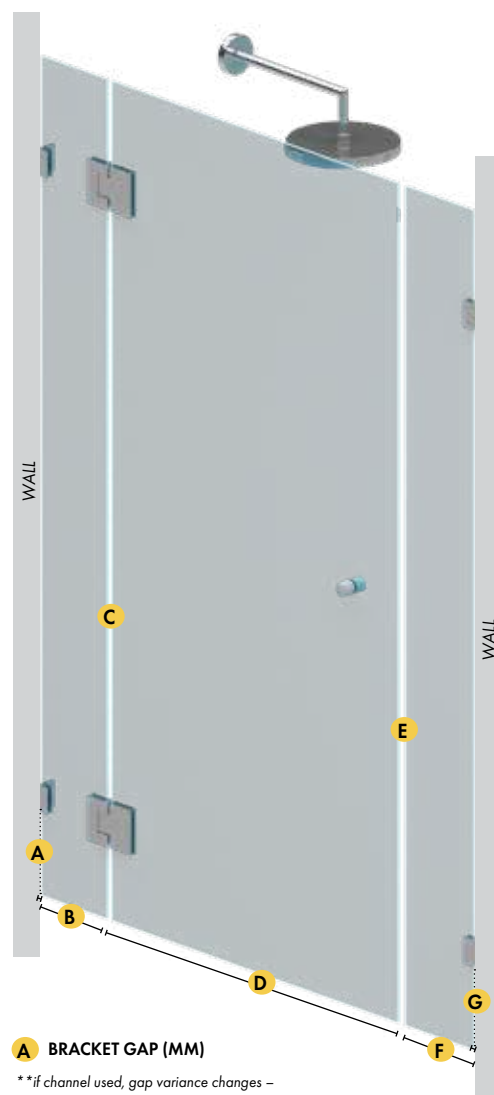

This guide outlines sizes available for in line configuration featuring a hinge panel with door and infill/fixed panel.

10mm thick clear toughened

1mm radius corners

Individually boxed panels

Flat polished edges

A BRACKET GAP (MM)

***if channel used, gap variance changes – refer last 2 columns for OVERALL WIDTH calculation*

B GLASS HINGE PANEL WIDTH (MM)

C HINGE GAP (MM)

D GLASS DOOR PANEL WIDTH (MM)

E GAP (MM)

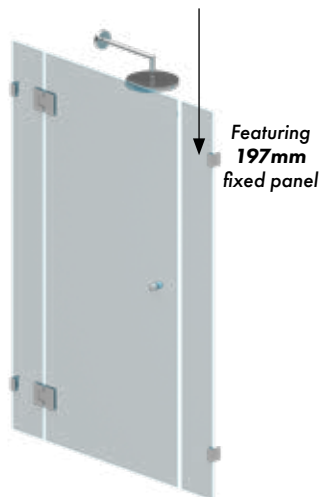

F GLASS FIXED PANEL WIDTH (MM)

G BRACKET GAP (MM)

*NOTE: These tables show configurations possible using up to 897mm wide fixed panels (Column F). Larger spans are possible by using wider fixed panels. Refer p56 for wider fixed panels available.

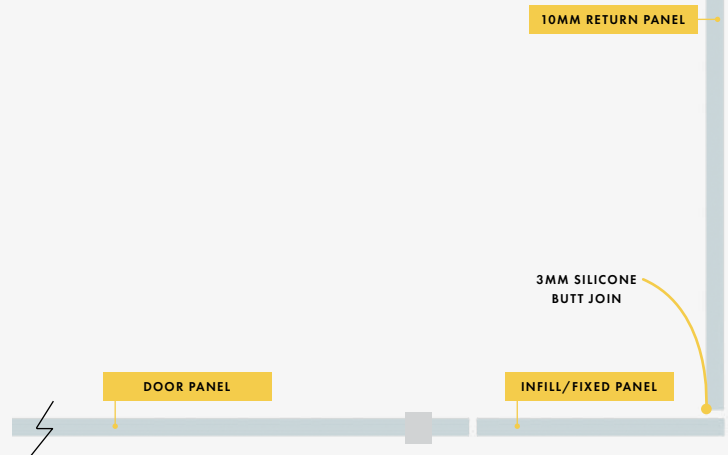

A configuration with a door leading into a fixed/infill panel can be installed with a return panel.

Below diagrams illustrate 2 ways a return panel may be installed.

In both instances a silicone butt joint is required which can be a technically challenging undertaking and should only be attempted by experienced glaziers.

PURITY CORNER CONFIGURATIONS

Overview

The classic corner shower offers many possible size configurations with our hinge panels, door panels and return panels.

This guide outlines the sizes achievable with our range of shower doors, hinge panels and return panels.

- 10mm thick clear toughened
- 1 mm radius corners
- Individually boxed panels
- Flat polished edges

- A** BRACKET GAP (MM)
**if channel used, gap variance changes – refer last 2 columns for OVERALL WIDTH calculation
- B** GLASS HINGE PANEL WIDTH (MM)
- C** HINGE GAP (MM)
- D** GLASS DOOR PANEL WIDTH (MM)
- E** GAP (MM)
- F** THICKNESS OF RETURN PANEL GLASS (MM)
- H** BRACKET OR CHANNEL GAP (MM)
- I** GLASS RETURN PANEL WIDTH (MM)

For the return/fixed panel, refer to table below.

RETURN/FIXED PANEL:		USING WALL BRACKET	USING DRY GLAZE U CHANNEL	USING EXTENDED DRY GLAZE U CHANNEL
H BRACKET GAP (MM)	I GLASS FIXED PANEL WIDTH (MM)	OVERALL RETURN WIDTH (MM)	If using dry glaze U channel instead of wall brackets, OVERALL WIDTH becomes	If using "EXTENDED" dry glaze U channel instead of wall brackets, OVERALL WIDTH range becomes

LINEA
FULLY FRAMED KITS

In bathroom design, the trend of minimalism continues to grow in popularity.

Linea complete kits are available for fast and easy framing of 6mm glass with a stylish 25x15mm profile (in bright polish or matt black). A slimline U channel ensures ease of install to walls even if out of square.

An optional horizontal support arm is available which can be width adjusted if required.

Kits include all aluminium extrusions, glazing rubbers, joiners and screws – simply arrange 6mm toughened glass to required size and assemble the frame to the glass. Linea shower screens can be made up to 2450mm high x 1450mm wide.

Contact us for a simple to use cutting list and glass size specifier.

Cost effective, simple and stylish – Linea kits are an ideal bath or shower screen solution.

KITS IN A BOX FOR CUSTOM MADE SIZES

Purchase a complete kit in a box for simple fabrication to suit custom sized glass. Everything required for a Linea frame is in the kit! Simply order 6mm custom glass separately.

Contact us for cutting list & glass size specifier

Linea complete frame kit in a box

BRIGHT POLISH FINISH

Order Code: **LINEA-KIT-P (Bright polish)**

Makes frame up to 2450mm x 1450mm

(Suits 6mm glass – not included)

Includes:

- 1 x 2450mm long Wall U Channel – Bright polish aluminium 6463-T5
- 2 x 2450mm long Vertical Side Frame – Bright polish aluminium 6463-T5
- 2 x 1450mm long Top/Bottom Frame – Bright polish aluminium 6463-T5
- 2 x 2450mm long glazing rubber – PVC
- 2 x 1450mm long glazing rubber – PVC
- 4 x Internal Corner stakes – rigid PVC
- 6 x 6mm diameter x 29mm wall plugs – PVC
- 6 x ST4x30 pan head wall screws – SS3304
- 6 x ST4x10 CSK fixing screws – SS304
- 6 x Screw covers – PVC

Linea complete frame kit in a box

MATT BLACK POWDER COATED FINISH

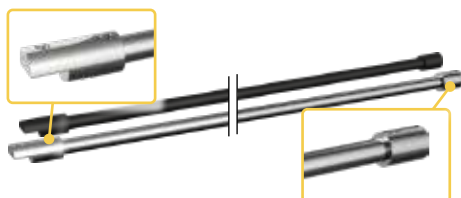

Order Code: **LINEA-KIT-B (Matt black)**

Makes frame up to 2450mm x 1450mm

(Suits 6mm glass – not included)

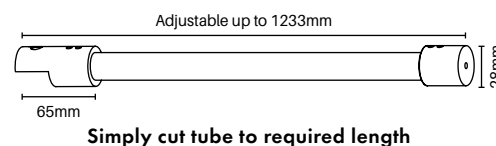

Includes:

- 1 x 2450mm long Wall U Channel – Matt black powder coated aluminium 6463-T5
- 2 x 2450mm long Vertical Side Frame – Matt black powder coated aluminium 6463-T5
- 2 x 1450mm long Top/Bottom Frame – Matt black powder coated aluminium 6463-T5
- 2 x 2450mm long glazing rubber – PVC
- 2 x 1450mm long glazing rubber – PVC
- 4 x Internal Corner stakes – rigid PVC
- 6 x 6mm diameter x 29mm wall plugs – PVC
- 6 x ST4x30 pan head wall screws – SS3304
- 6 x ST4x10 CSK fixing screws – SS304
- 6 x Screw covers – PVC

STAL SLIDING SHOWER SCREENS

STÄL

ARCHITECTURAL FRAMELESS SLIDING SHOWER SCREEN

A beautiful, frameless sliding showerscreen system designed to stand out from the rest, with only the best fittings used.

The STÄL system is ideal for wide openings and can be used in both inline and 90° applications.

Achieve any installation size between 1200mm wide to 1940mm wide with modular panels or custom made glass.

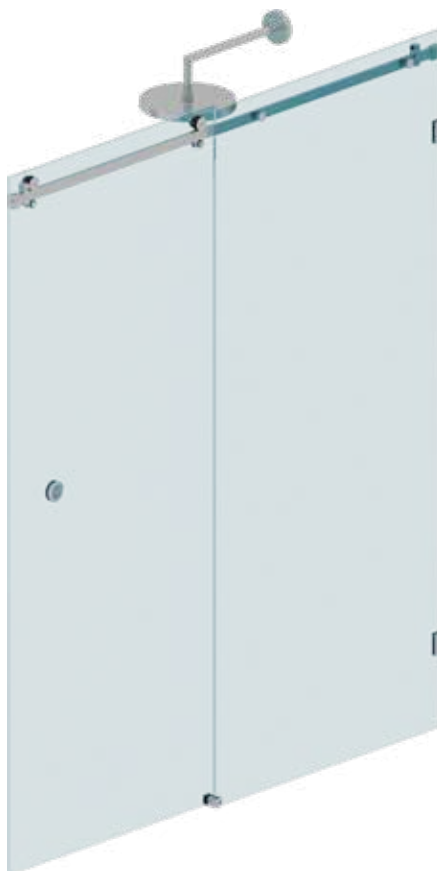

Hardware available in high polish, matt black, brushed nickel or brushed gold finish.

IDEAL FOR WIDE OPENINGS

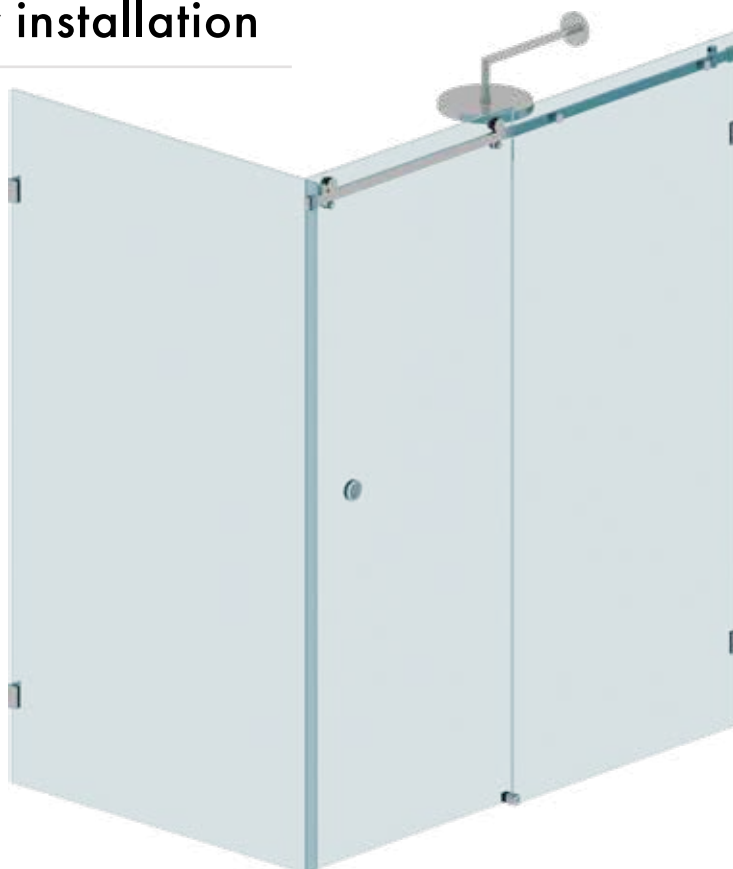

STAL CONFIGURATIONS

STAL HARDWARE GUIDE – POLISH FINISH

SELECT HARDWARE OPTIONS

Stål kit **in 90°**

POLISH FINISH / SS304

Order Code: STAL-KIT (Polish)

Kit includes:

1 x Recessed Round Handle; 2 x Door Upper Rollers;
2 x Door Stabiliser Guides; 2 x Fixed Panel Rail Connectors;
2 x Stoppers; 1 x Floor Guide; 2 x Rail Wall Brackets;
3 x Hex/Allen Keys

1 x Recessed Round Handle

2x Door upper rollers

2x Door stabiliser guides
offset screws allow height adjustment of guides

2x Fixed panel rail connectors

2x Stoppers

1x floor guide

2x rail wall brackets

IMPORTANT!

Use Loctite 242 or Ultraloc 3242 threadlocker with screws

SELECT RAIL

Pre-drilled rail **in 90°**

POLISH FINISH – SS304

Order codes:

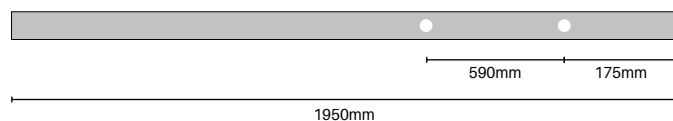

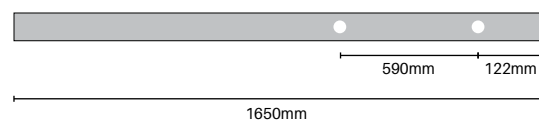

STAL-RAIL-1650 (1650mm long)

STAL-RAIL-1950 (1950mm long)

Rail dimensions: 30mm high x 10mm wide

Pre-drilled rail is ready to install with modular panels. Pre-drilled holes align with the 4x modular glass fixed panel holes.

Simply cut down rail ends to desired overall width and install rail and glass panels.

OR

Blank rail **in 90°**

POLISH FINISH – SS304

Order codes:

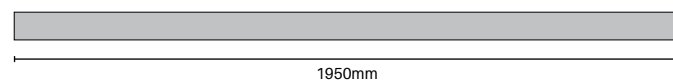

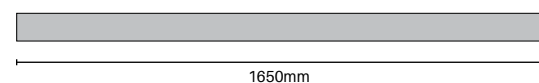

STAL-RBLANK-1650 (1650mm long)

STAL-RBLANK-1950 (1950mm long)

Rail dimensions: 30mm high x 10mm wide

Custom drilling of rail holes enables flexibility for unique install situations where pre-drilled rails do not suit.

Enables drilling for configurations such as PANEL > DOOR > PANEL

STAL HARDWARE GUIDE – POLISH FINISH

WALL BRACKET OPTIONS

in 90° **Wall bracket**
CHROME PLATED
 Order code: **P-WB**
 Wall bracket - Use to install fixed glass panels to wall

OR

in 90° **Offset wall Bracket**
CHROME PLATED
 Order code: **P-WB-O**
 Install fixed glass panels to wall

in 90° **Slimline rail wall Bracket**
POLISH FINISH SS304
 Order code: **STAL-RWBS**
 Only required if using a 650mm wide modular fixed glass panel

SEALS, BUMPERS & WATER BARS

in 90° **Door bumper Stopper**
PVC – 2130MM L
 Order code: **STAL-D10-2130**
 Suits 10mm glass
 10mm bulb
 Prevents contact between glass door & wall

in 90° **OPTIONAL Water seal**
PVC – 2130MM L
 Order code: **STAL-FP10-2130**
 Suits 10mm glass – 26mm L
 Flexible PVC fin - Reduce water escape between door & fixed panel

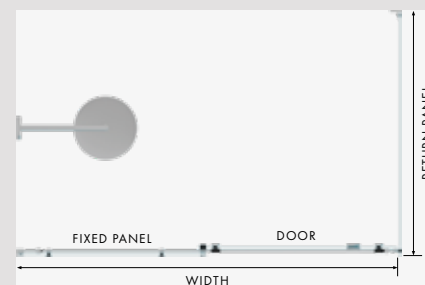

in 90° **OPTIONAL Water bar**
POLISHED ALUMINIUM
 Order code:
P-BAR12-2000-PA (round); or
P-BAR10SQ-2000-PA (square)
Round dimension:
 6mmH x 12mmW x 2000mmL
Square dimension:
 9mmH x 10mmW x 2000mmL

OPTIONAL EXTRAS

90° **90° bracket**
POLISH FINISH – SS304
 Order code: **STAL-90J**
 Required when installing with a glass return panel
 2 x modular glass return panel sizes available or custom make glass as needed

Return panel measuring tips

- Return panel width measured from wall to front face of front/fixed inline panel
- If using a wall bracket to affix return panel to wall, a deduction needs to be made to the glass return panel width to allow for bracket gap (commonly 3 to 5mm)
- When measuring width of fixed panel and door panel when using a return panel, width is measured from wall to inside edge of 10mm thick return panel

Rail connector
POLISH FINISH – SS304
 Order code: **STAL-RC**

Used for extra fixings to stainless steel rail.
 Example: If fabricating a 3 panel set up
 FIXED PANEL > DOOR > FIXED PANEL

STAL CUSTOM GLASS

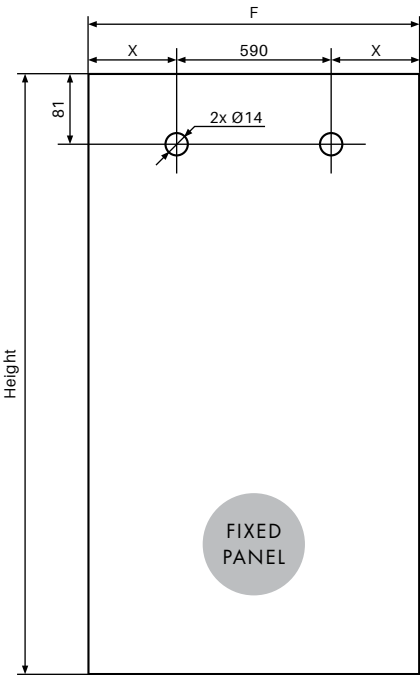

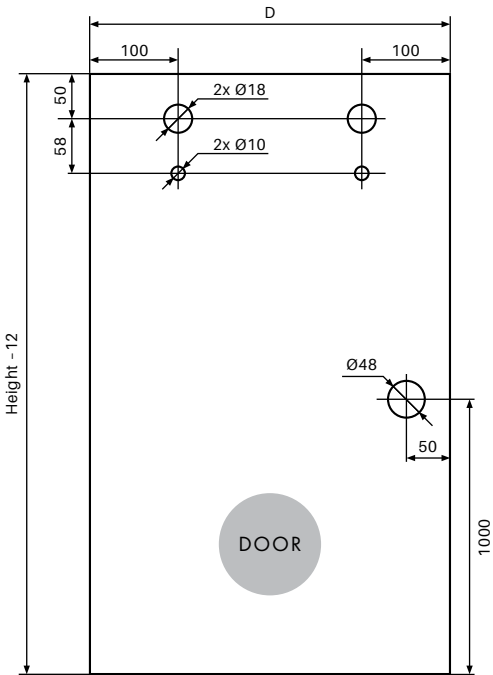

Our modular STÄL range of glass provides solutions for most installation situations.
If modular glass is not suitable for your job, the STÄL hardware can be used with custom made 10mm toughened glass.
The specifications below provide guidance for ordering custom made glass panels.

INLINE APPLICATION

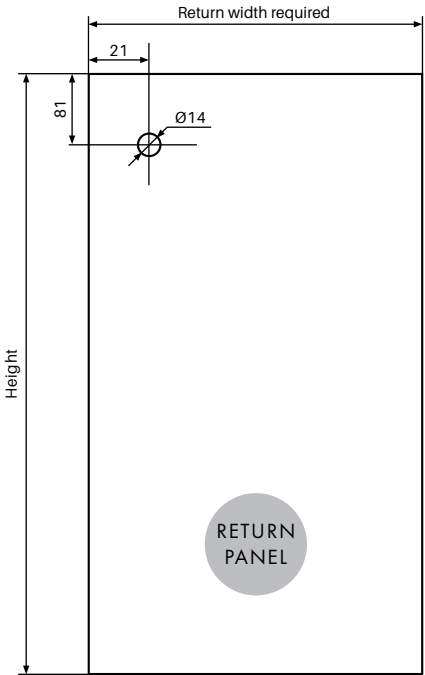

W: WIDTH*
F: FIXED PANEL
D: DOOR
W= 1200 to 1940mm
F= (W÷2)+40mm
D= W÷2

*Width is commonly the smallest overall opening size between 2 walls

$X = (F - 590) \div 2$

STAL SLIDING SHOWER SYSTEM

With our range of modular glass panels and hardware, installing the STÄL system into widths from 1200mm wide up to 1940mm wide is easy.

The STÄL system of hardware and glass allows a complete system install at a huge cost saving to custom made glass.

The following pages provide detailed guidance on the modular panels available and exact overlaps of the door and fixed panels as well as entry widths into the shower opening. This detailed information gives you the confidence to know all details prior to commencing an installation.

The below table provides a quick guide as to opening widths and highlights in black what hardware and glass is required.

**NOTE: Table below lists polished product codes as a guide only*

CODE	OVERALL WIDTH (mm)

SEE PAGES 100-107 FOR ACCURATE GLASS MEASUREMENT LAYOUTS

IMPORTANT

Apply UltraLoc 3242 or equivalent to screw thread and allow 24 hours for full cure.

Do not use shower during this time.

UltraLoc 3242 aids in prevention of the chance of screw loosening resulting in glass door dropping.

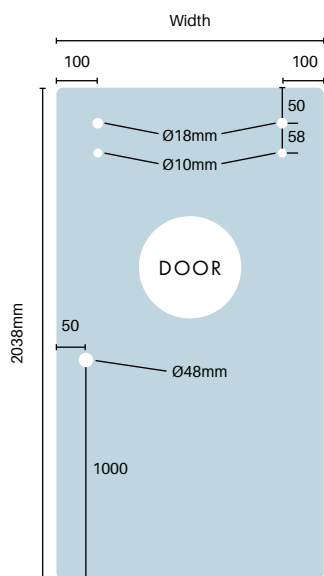

STAL MODULAR GLASS PANELS

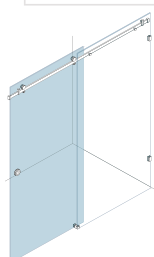

10mm clear toughened glass; 2mm radius corners

Every panel individually packed in cardboard with pre-drilled holes; ready for installation

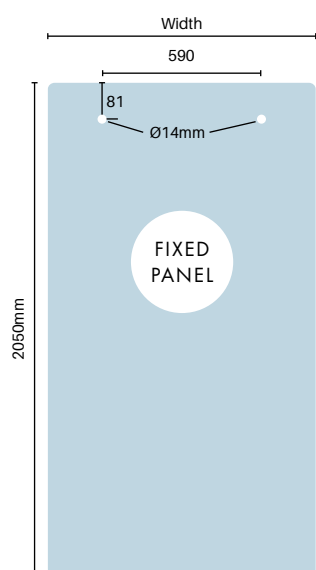

DOOR PANELS

Order Code	Width	Height	Thickness	Sqm	Weight
STAL-D-0600	600mm	2038mm	10mm	1.22	31kg
STAL-D-0700	700mm	2038mm	10mm	1.42	36kg
STAL-D-0800	800mm	2038mm	10mm	1.63	41kg
STAL-D-0900	900mm	2038mm	10mm	1.83	46kg
STAL-D-1000	1000mm	2038mm	10mm	2.04	51kg

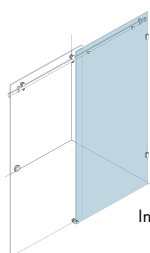

Interchangeable – left or right side

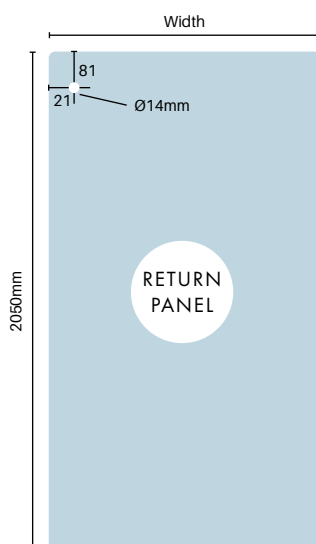

FIXED PANELS

Order Code	Width	Height	Thickness	Sqm	Weight
STAL-F-0650	650mm	2050mm	10mm	1.33	33kg
STAL-F-0750	750mm	2050mm	10mm	1.54	38kg
STAL-F-0850	850mm	2050mm	10mm	1.74	44kg
STAL-F-0950	950mm	2050mm	10mm	1.95	49kg

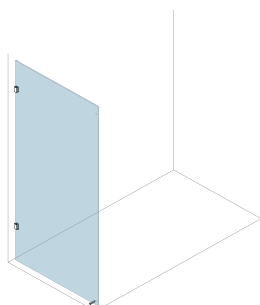

Interchangeable – left or right side

RETURN PANELS

Order Code	Width	Height	Thickness	Sqm	Weight
STAL-R-0897	897mm	2050mm	10mm	1.84	46kg
STAL-R-1197	1197mm	2050mm	10mm	2.45	61kg

Interchangeable – left or right side

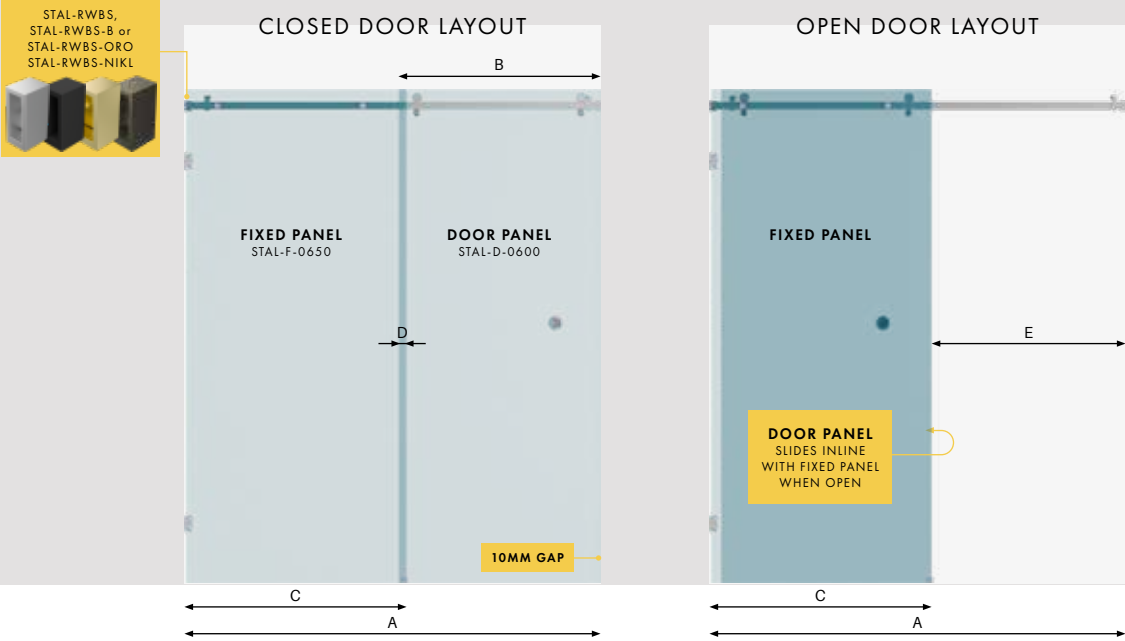

Achieve any installation size from
1200mm wide to 1940mm wide
with modular panels or
custom made glass

Mix and match system!
5x modular door panels
4x modular fixed panels
2x modular return panels

**Superior
quality**
glass & hardware

DOOR SMALLER THAN FIXED PANEL

A Overall Width	B Door Width	C Fixed Panel Width	D Overlap With Closed Door	E Opening
1200mm	600mm	650mm	- 63mm	547mm
1205mm	600mm	650mm	- 58mm	552mm
1210mm	600mm	650mm	- 53mm	557mm
1215mm	600mm	650mm	- 48mm	562mm
1220mm	600mm	650mm	- 43mm	567mm
1225mm	600mm	650mm	- 38mm	572mm
1230mm	600mm	650mm	- 33mm	577mm
1235mm	600mm	650mm	- 28mm	582mm
1240mm	600mm	650mm	- 23mm	587mm

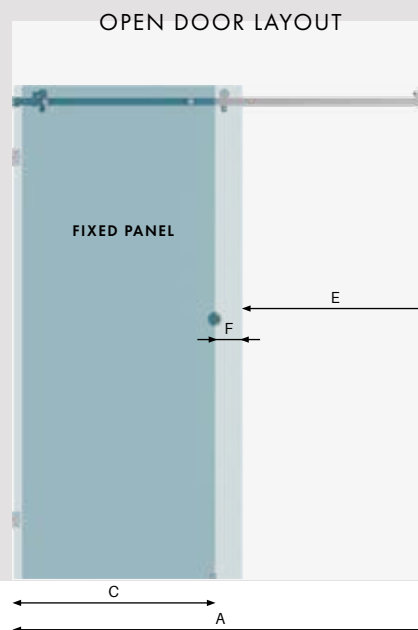

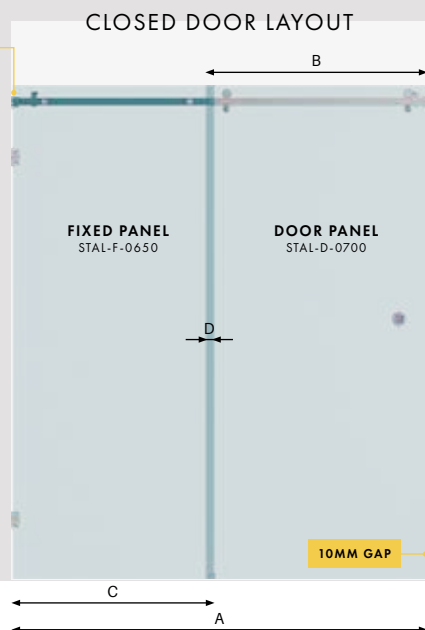

SPACINGS BASED ON THESE ASSUMPTIONS:

1. Fixed panel installed with Purity wall brackets which produces a 3mm silicone join gap. If wall channel is used, specified opening sizes overlaps, etc will change.
2. Edge of glass door must remain 10mm from wall. 10mm door bulb recommended to use for buffering or if not used, 10mm safety margin gap required.
3. When door is open, minimum 15mm gap is required from wall (for safety margin buffering).

***When using a 650mm wide fixed panel, it is important to purchase 1x slimline wall bracket separately (STAL-RWBS/STAL-RWBS-B/STAL-RWBS-ORO/STAL-RWBS-NIKL) due to space restrictions between the rail fixing bracket and the wall.**

3. When door is open, minimum 15mm gap is required from wall (for safety margin buffering).

STÄL INSTALLATION GUIDE

TOOLS REQUIRED

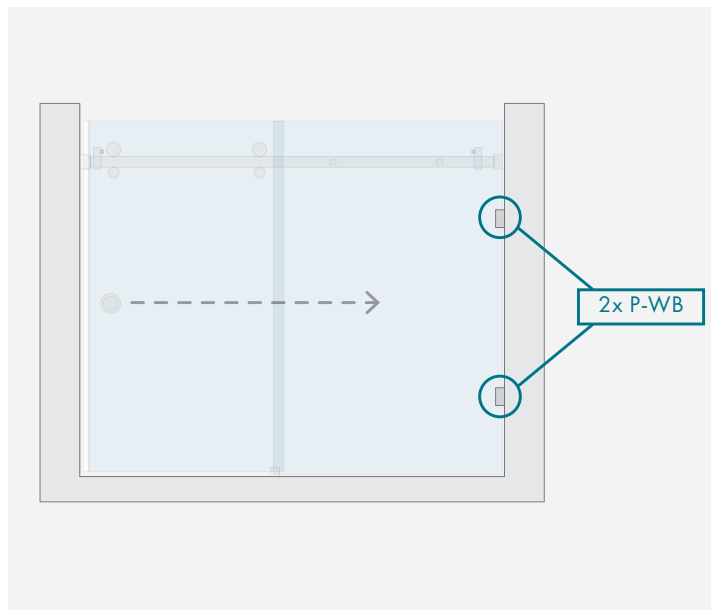

- Cordless drill
- Ø8mm masonry drill bit
- Hacksaw
- Screwdriver
- Pencil
- Tape measure
- Level
- Silicone gun

! CAUTION

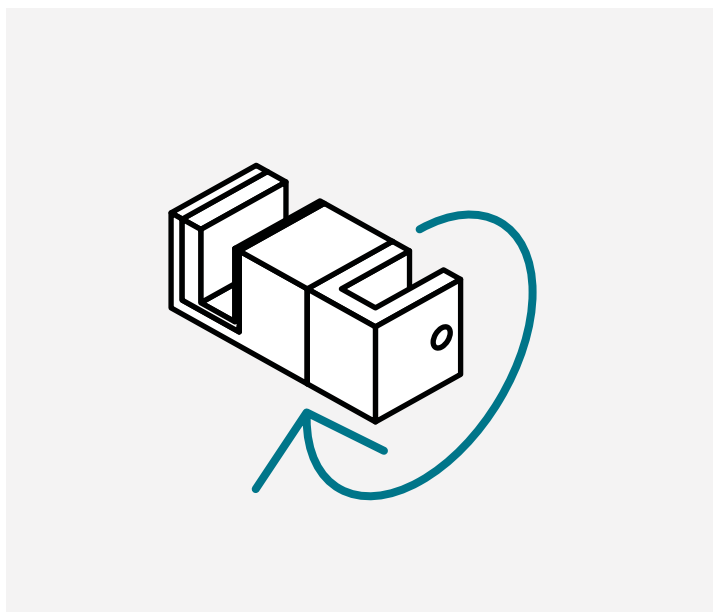

STEP 1

Select left or right handing of door panel.

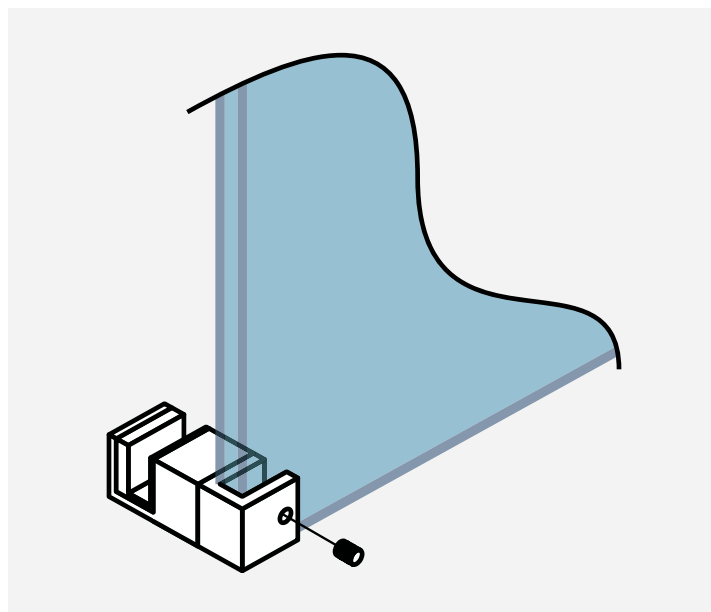

STEP 2

Fit the two fixed panel wall brackets (P-WB) to the opposite wall to the door opening.

STEP 3

Rotate the floor guide to suit left or right handing door opening.

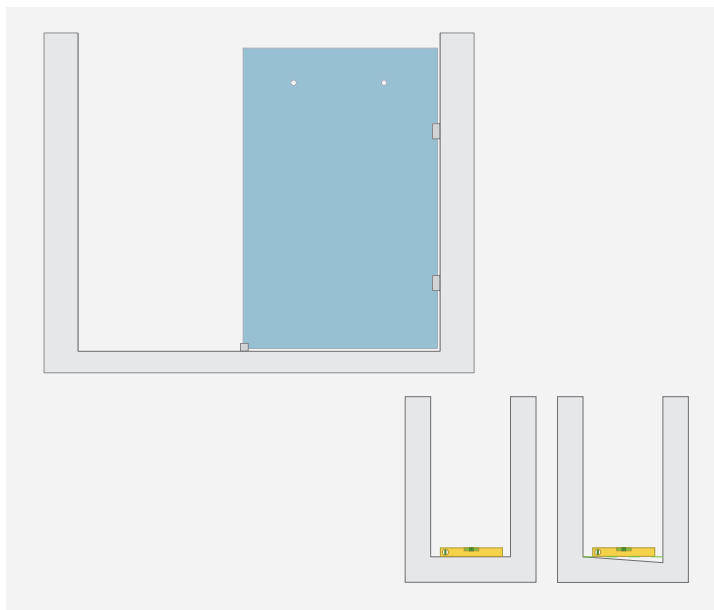

STEP 4

Using the grub screw, attach the floor guide to the bottom leading corner of the fixed panel.

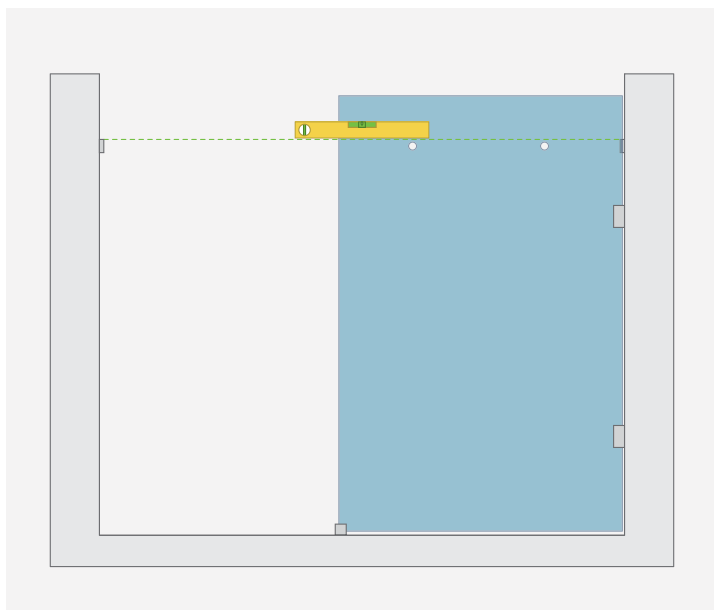

STÄL INSTALLATION GUIDE

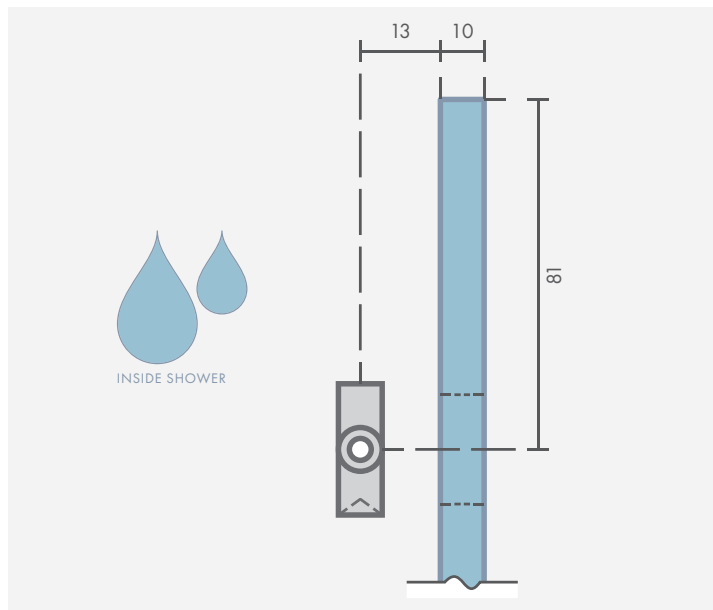

STEP 5

Fit fixed panel to wall brackets. NOTE: Check floor level. If floor is not level, fit glass ensuring it is level to the highest side.

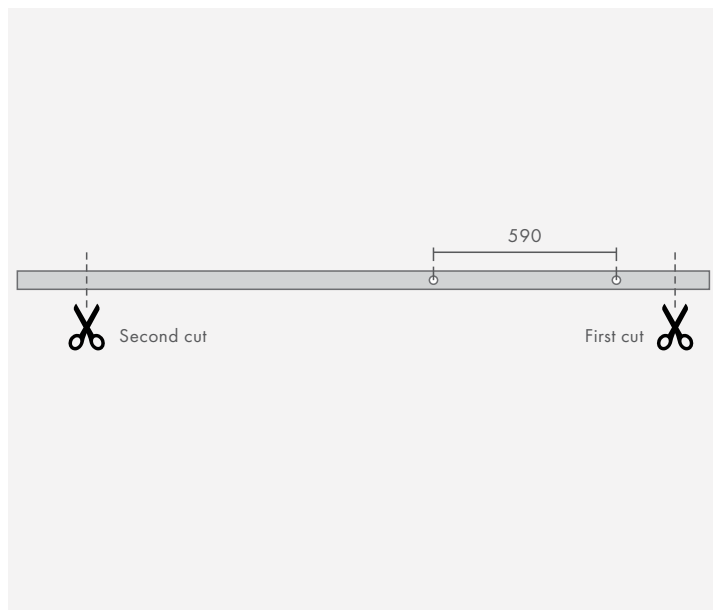

STEP 7

Fit the internal block of the second wall bracket to opposite wall ensuring it is level with the first block.

STEP 6

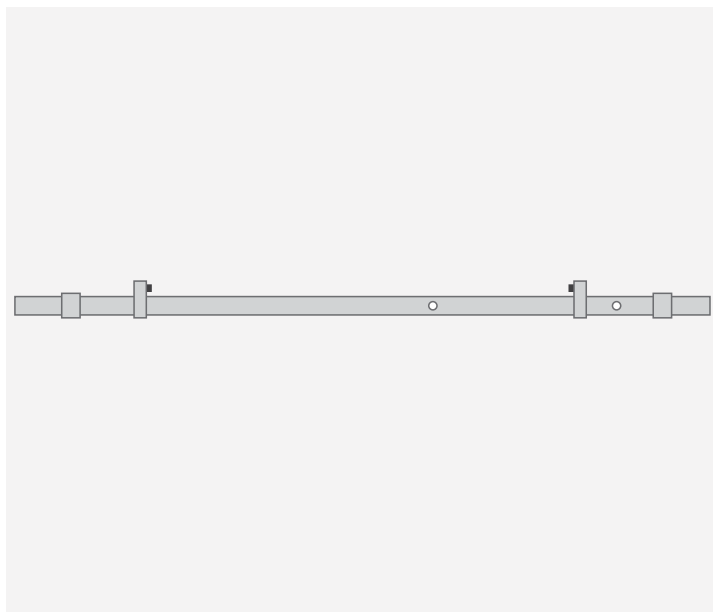

Fit the internal block of the first wall bracket inline with the fixed panel top holes.

STEP 8

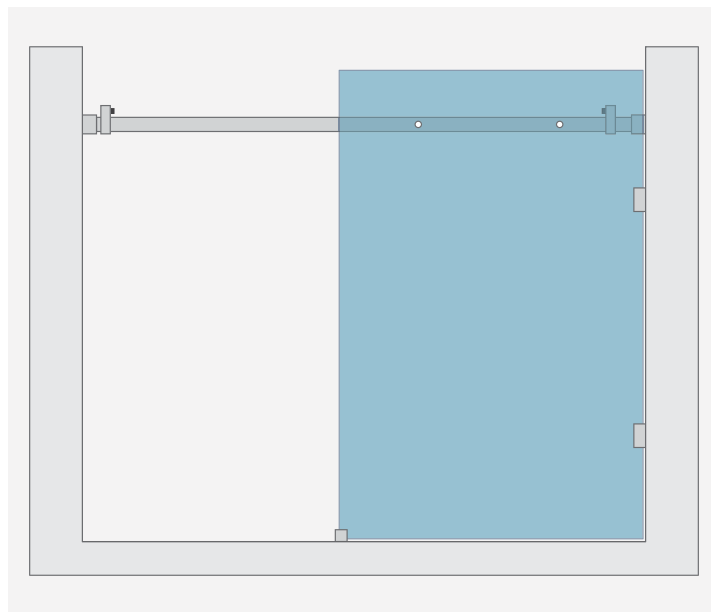

Cut both ends of rail to suit width between wall bracket blocks. NOTE: Cut fixed panel end first ensuring the holes in rail line up with the holes in glass fixed panel.

STÄL INSTALLATION GUIDE

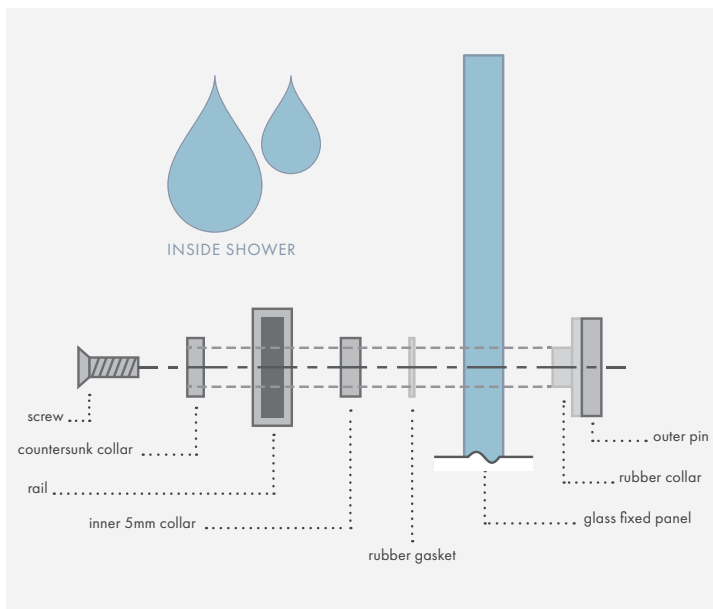

STEP 9

Slide 2x stoppers and 2x wall bracket sleeves onto rail before fitting to blocks. NOTE: Select the slimline rail wall bracket on the fixed panel side if using a 650mm W fixed panel.

STEP 10

Attach rail to wall brackets by sliding wall bracket outer sleeves over the wall blocks and secure with grub screws.

STEP 11

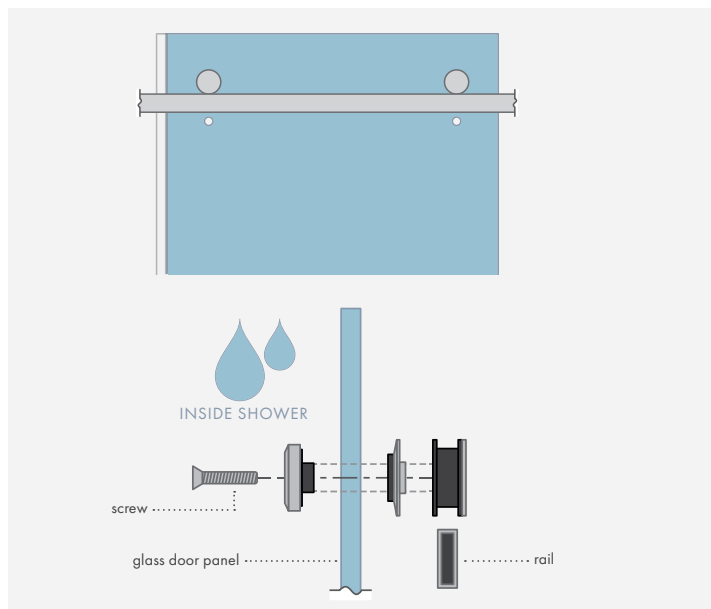

Attach fixed rail connectors to connect rail to fixed glass panel.

IMPORTANT

Apply *Ultraloc 3242* or equivalent to screw thread and allow 24 hours for full cure.

Do not use shower during this time.

Ultraloc 3242 aids in prevention of the chance of screw loosening resulting in rail and glass door dropping.

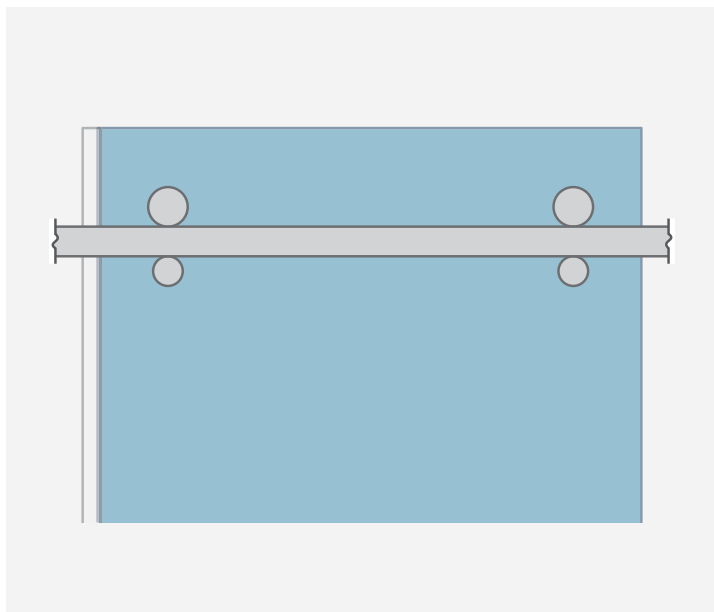

STEP 12

Fit 2x rollers to door facing out. Fit door bumper to leading door edge. Hang door on rail while fitting bottom edge into floor guide and adjust level.

IMPORTANT

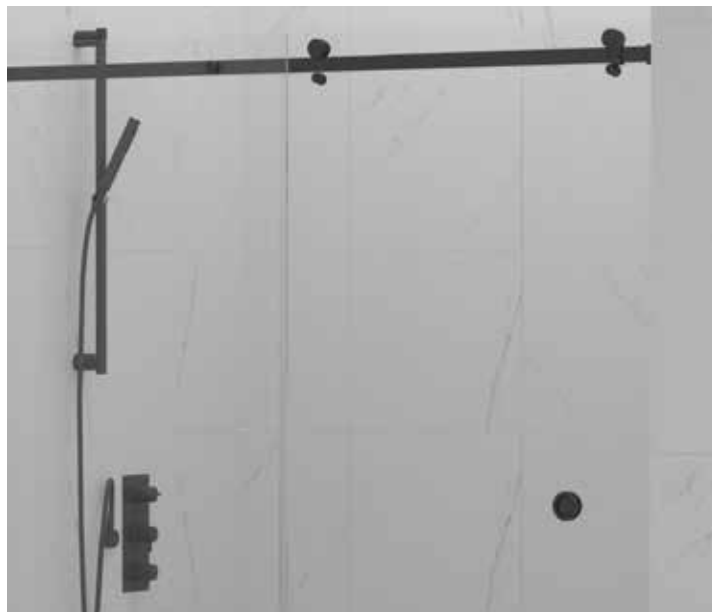

Apply *Ultraloc 3242* or equivalent to screw thread and allow 24 hours for full cure. Do not use shower during this time. *Ultraloc 3242* aids in prevention of the chance of screw loosening resulting in glass door dropping.

STÄL INSTALLATION GUIDE

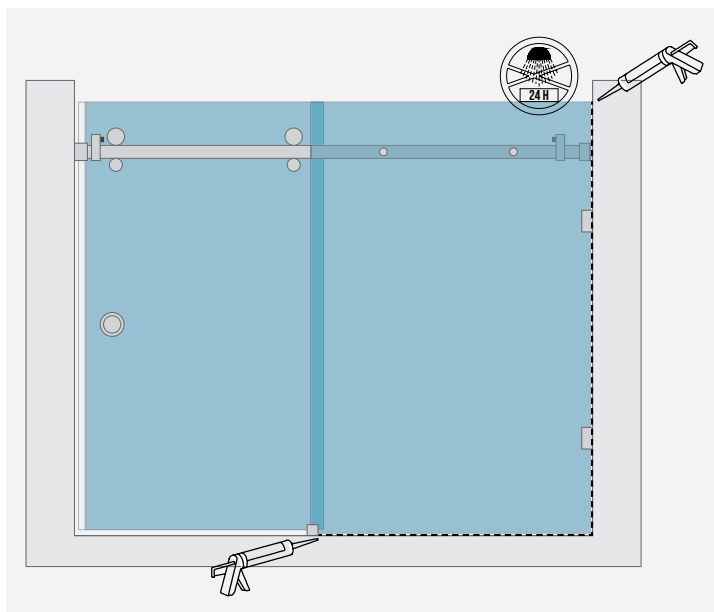

STEP 13

Fit door stabiliser guides to door and adjust to prevent door from lifting off rail.

STEP 14

Fit recessed handle to door.

STEP 15

Silicone fixed panel into place.

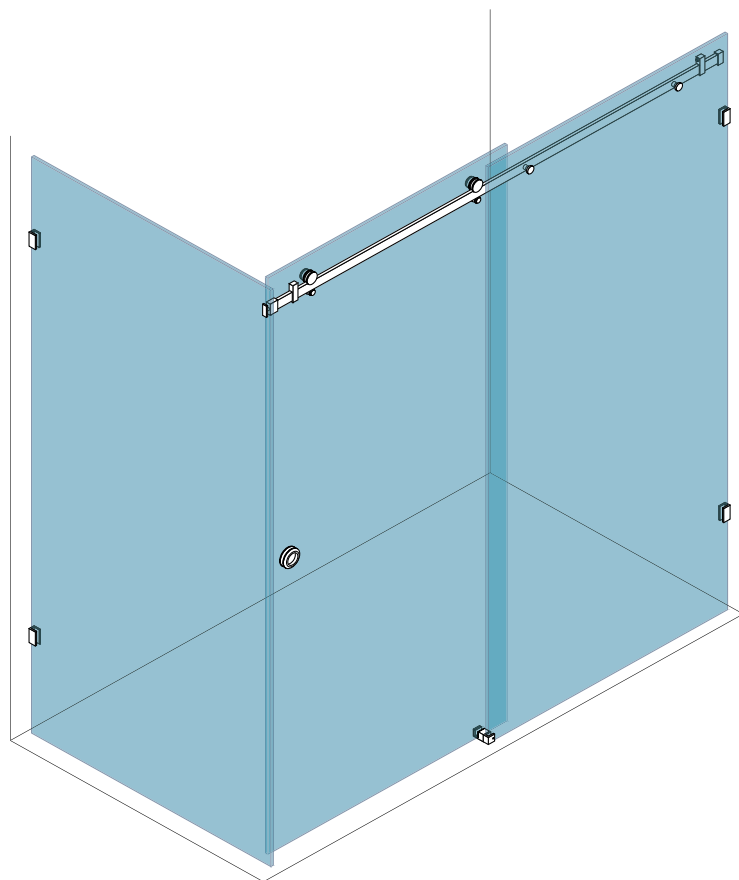

ONGOING MAINTENANCE & CARE

Periodic checks (quarterly) must be undertaken to check the installation integrity. Ensure glass door continues to run true and is not touching the ground or wall. Check fixing screws through rollers are tight. In high use applications particularly, ongoing maintenance and review is critical.

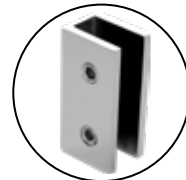

STÄL INSTALLATION GUIDE: 90° RETURN

RETURN COMPONENTS (IF APPLICABLE)

WALL BRACKET x2

- Chrome plated solid brass
 - Use to install fixed glass panels to wall
- Code: P-WB

90° GLASS BRACKET x1

- Polish finish SS304
 - Required when installing with a glass return panel
- Code: STAL-90J

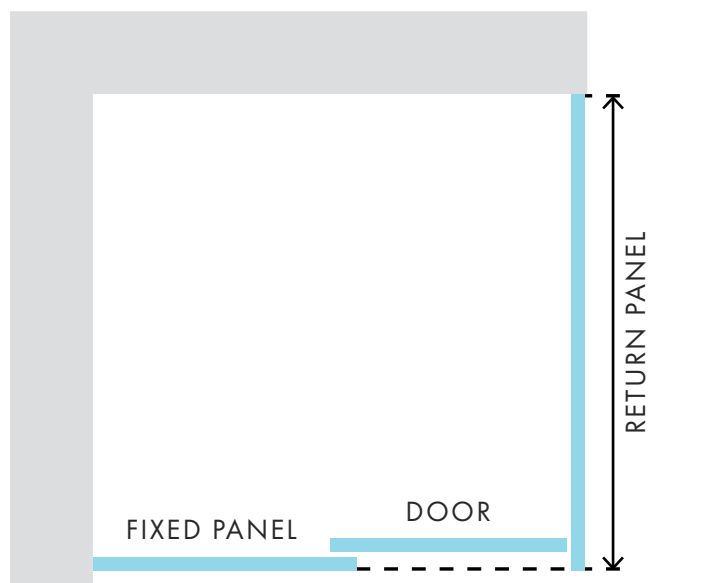

BOSTIK 6S SILICONE

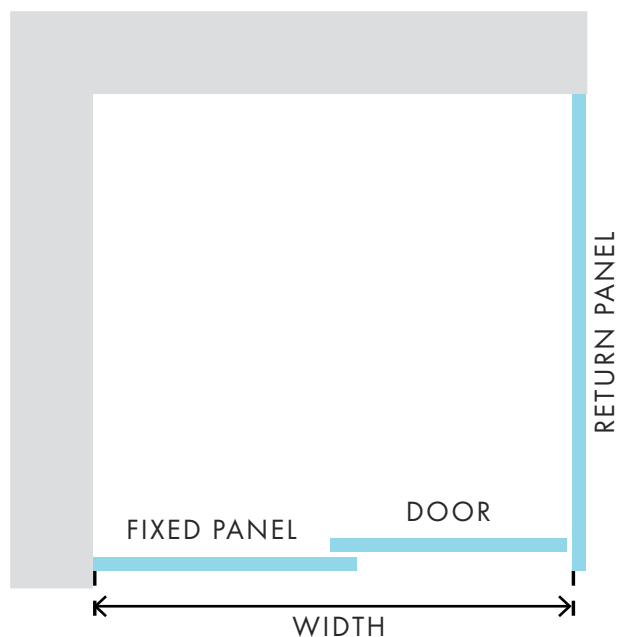

- 300g tube
 - Translucent finish
 - High performance neutral cure silicone sealant with mould inhibitor
- Code: P-S-6S

RETURN PANEL MEASURING TIPS

- Return panel width measured from wall to front face of front/fixed inline panel
- If using a wall bracket to affix return panel to wall, a deduction needs to be made to the glass return panel width to allow for bracket gap (commonly 3mm to 5mm)

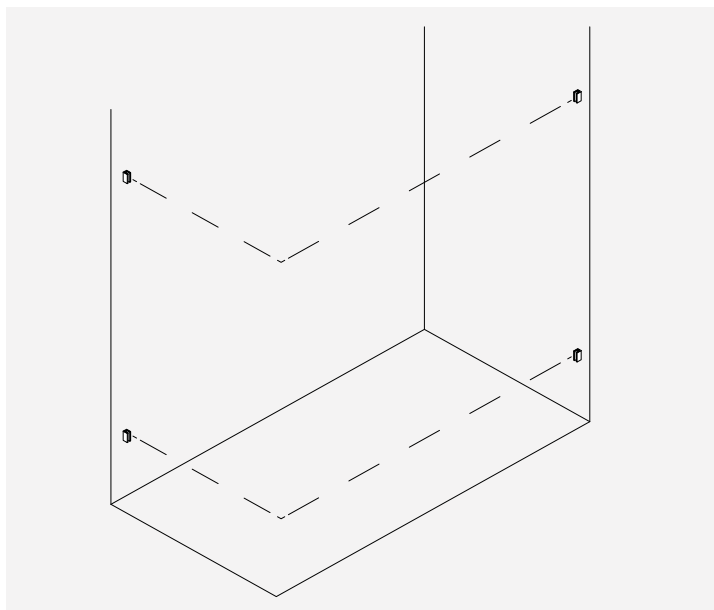

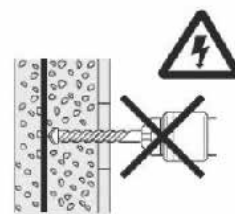

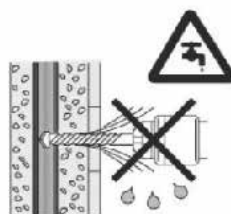

- When measuring "W" for a configuration with a return panel, width is measured from wall to inside edge of 10mm thick return panel

STÄL INSTALLATION GUIDE: 90° RETURN

TOOLS REQUIRED

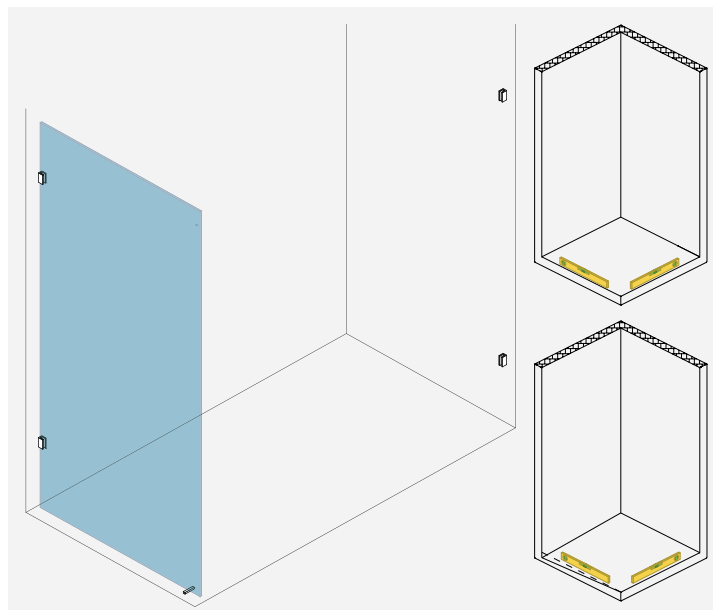

- Cordless drill
- Ø8mm masonry drill bit
- Hacksaw
- Screwdriver
- Pencil
- Tape measure
- Level
- Silicone gun

! CAUTION

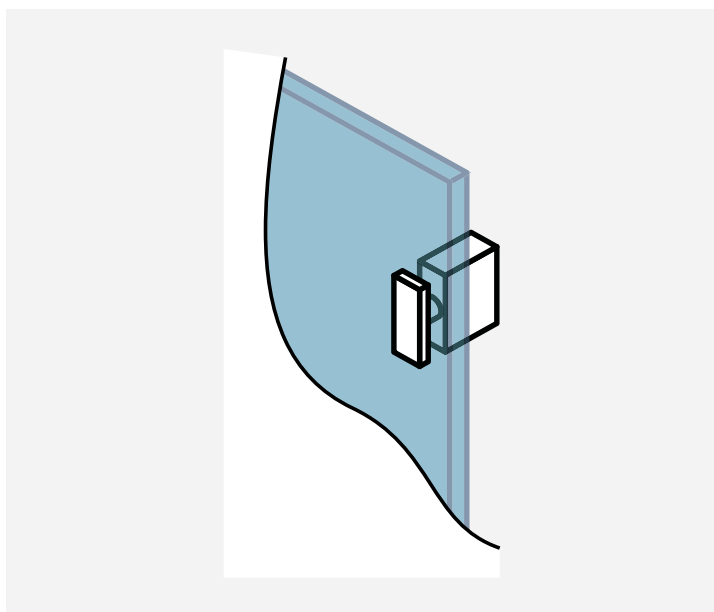

STEP 1

Fit return panel wall brackets at the same height as fixed panel wall brackets.

STEP 2

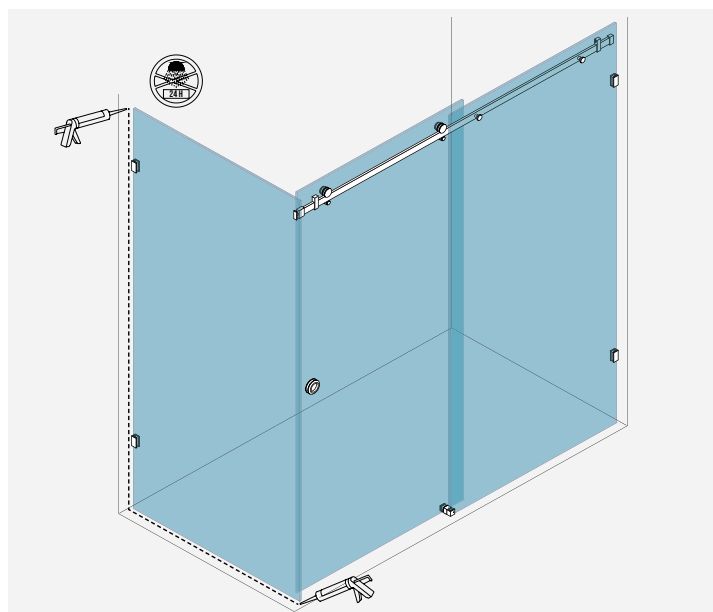

Fit return panel to wall brackets and pack leading edge to avoid glass on tile. NOTE: Check floor level. If floor is not level, fit glass ensuring it is level to the highest side.

STEP 3

Fit 90° bracket to return panel.

See inline installation steps 1-14

STEP 4

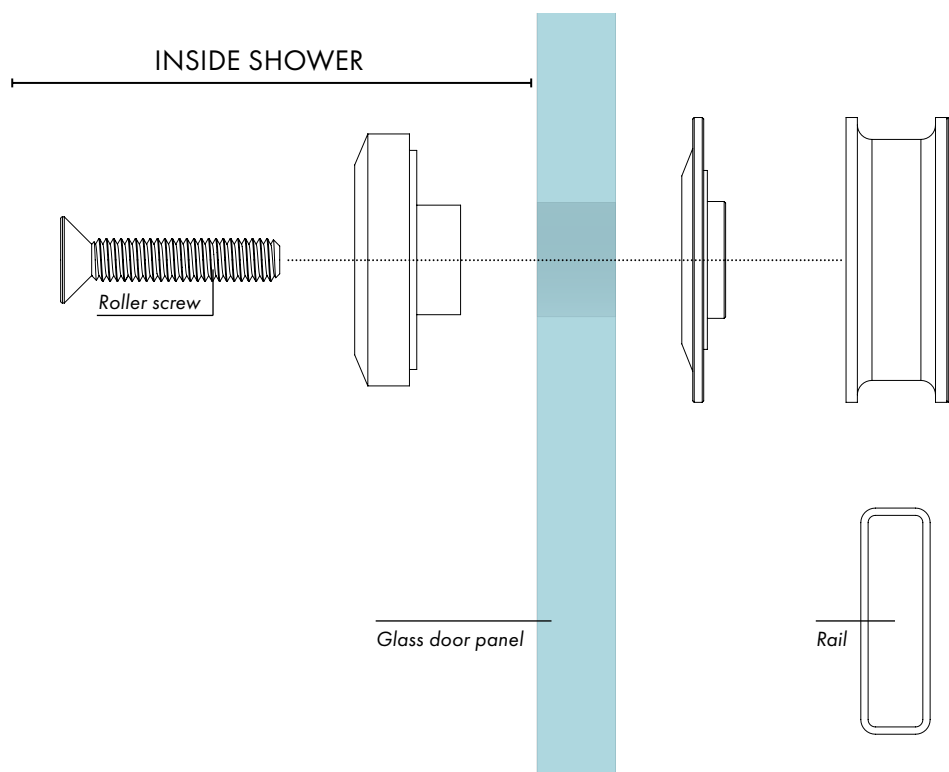

Silicone return panel.

STÄL INSTALLATION IMPORTANT NOTE

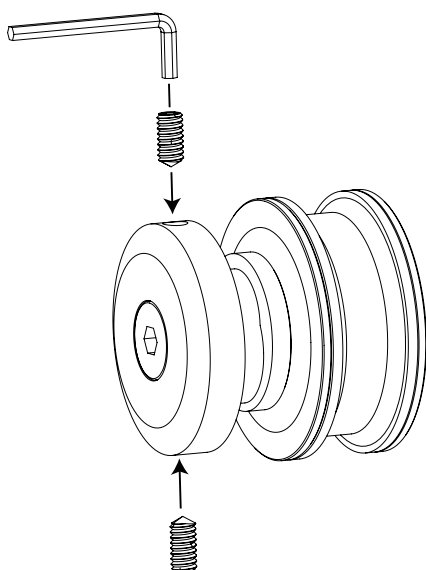

IMPORTANT INSTALLATION NOTE – DOOR ROLLERS

Door rollers are assembled as per below configuration

IMPORTANT

Screw must be tightly affixed. We also recommend use of Ultraloc 3242 or equivalent on roller screw thread.

ADDED FEATURE TO ENSURE SCREW REMAINS SECURELY TIGHTENED

Once Roller Screw is secured tight, use allen key provided and tighten the 2 x grub screws located in the cap.

NOTE: grub screws are already in the cap and simply require tightening – drawing for illustration purposes only.

TRILOGY

AUSTRALIA'S LEADING PIVOT DOOR SHOWER SCREEN SYSTEM

EXTREMELY COST EFFECTIVE | HUGE WIDTH ADJUSTABILITY | LARGE RANGE OF SIZES | EASY TO INSTALL

TRILOGY SERIES OVERVIEW

The TRILOGY showerscreen system, available in bright polish or matt black frame finish, is a stylish and affordable semi-frameless solution for any bathroom. The overlapping pivot door system enables incredible width adjustability. This flexibility of installation does not compromise quality or aesthetic appeal.

Adjustability having regard to both width and wall squareness is the key to the TRILOGY Series allowing ease of install and overcomes the traditional problem of exact sizes needed for a specific shower openings.

KEY FEATURES

- Cost effective
- Bright polish or matt black frame finish
- Inline and return panels are pre-assembled for fast installation
- 1950mm high
- Achieve widths from 795mm to 1550mm with Inline range* (ie fixed panel and pivot door)
- Return panels in 3 popular widths (or frame extrusion kits available to make any width)
- U channel installation against walls overcome out of square issues
- Robust pivot door system featuring superior water leakage prevention with "L" shape bottom rail and magnetic door close

* Cannot achieve between 1370mm and 1400mm for inline configurations

* Cannot achieve between 1382mm and 1388mm for inline front & return panel configurations

The Trilogy system is a robust, easy to install pivot door showerscreen that is stylish while providing superior protection against water escape.

FACTORY FEATURES

We are committed to supplying the trade with the finest quality goods at Australia's most competitive prices. Production of the TRILOGY series is undertaken at a world leading production facility utilising detailed quality control procedures. Examples of control measures in place:

Comprehensive internal carton packing to minimise transport and storage damage

Carton cardboard tested for strength and breakage points. Thick cardboard is used for long term storage safety

In-house salt spray testing - tests aluminium extrusion for durability of coating

TRILOGY SERIES SYSTEM OVERVIEW

1 Grade 'A' toughened glass - AS/NZS2208 compliant

Door & return panel 6mm clear toughened; fixed panel 5mm clear toughened - Silk screen compliance logo on glass

2 Pivot hinges - High quality

Stylish square shape; smooth function and minimal friction for ease of operation

Pivot door allows for overlap of fixed panel = water seal

3 Magnetic closure & water seals

Full length magnetic door seal for rattle free closure and provides enhanced water seal

Bottom door seals also included

4 Frameless door with round knob

Modern frameless 6mm clear toughened door

Solid door knob for durability (not chromed plastic)

5 Slimline strong aluminium frame

Frame with minimalist low profile framing system

'L' shape extrusion profile at door base minimises water escape potential

6 Fully reversible door - left or right opening

Simply flip and rotate pre-assembled fixed panel with door to suit left or right opening - so easy!

7 U channels allow flexibility for installation

Slimline profile U channels allow installation for out of square wall situations

Additionally U channels allow 20mm extra width adjustment

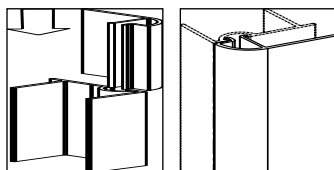

8 Install on tiles or showerbases

9 Return panel install is so easy

Simply slide the innovative 90 degree adapter into inline panel

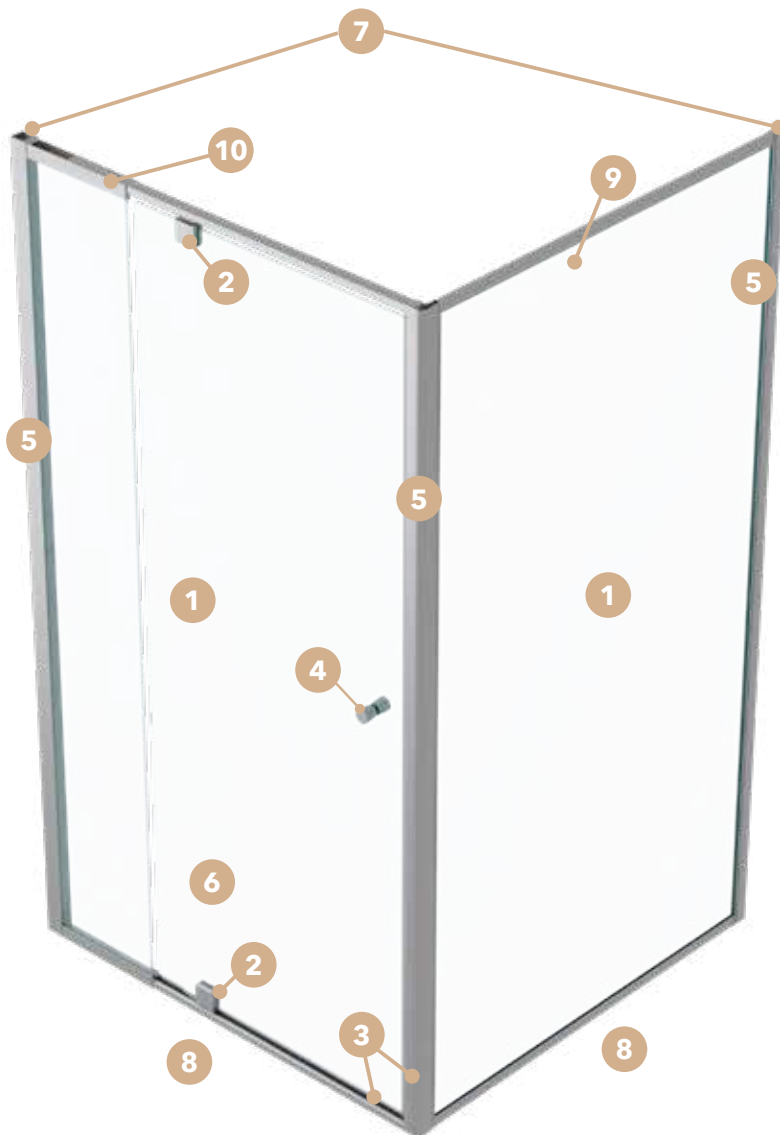

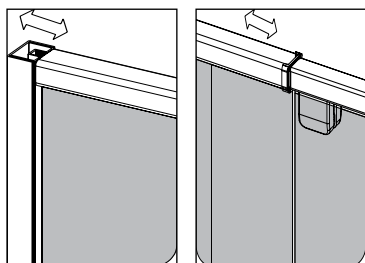

Then insert return panel to complete!

Adapter provided with every return panel

10 Easy telescopic adjustment: WIDTH ADJUSTABLE

Innovative design allows extrusion to telescopically move in & out for door width adjustment

TRILOGY SERIES INLINE CONFIGURATION

INLINE CONFIGURATION

IDEAL BETWEEN WALL OPENINGS

7 Sizes available:

800mm wide x 1950mm high
850mm wide x 1950mm high
900mm wide x 1950mm high
1050mm wide x 1950mm high
1200mm wide x 1950mm high
1350mm wide x 1950mm high
1500mm wide x 1950mm high

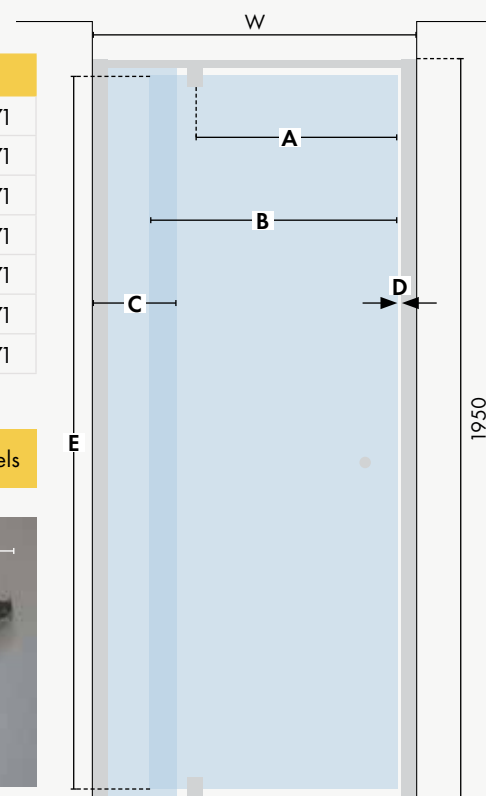

Complete kit consists of:

- 1x door panel - 6mm clear toughened glass
- 1x fixed semi-framed panel - 5mm clear toughened glass
- (Pivot door and fixed panel pre-assembled with bright silver or matt black aluminium slimline frame)

TRILOGY SERIES RETURN KITS

For custom sized RETURN panels, complete kits are available in bright polish or matt black with all items except the 6mm toughened glass panels (or 6.38mm laminated glass). The complete kit avoids the requirement to purchase long lengths of extrusions, glazing rubber and accessories separately. The kits are packed in sturdy cardboard cartons for ease of storage and handling. Contact us for easy to use Excel calculator which specifies cut lengths of aluminium and make size of glass.

Simply input return panel width and height required and the Excel document provides the specifications and you can easily assemble the frame kit to the glass.

PILLAR

A collection of modern shower fixtures arranged on a light gray background. The fixtures include a long brass bar at the top, a black vertical panel on the left, a white horizontal bar, a brass horizontal bar, a white horizontal bar, a black horizontal bar, and various shower heads and handles in brass, white, and black finishes. The word "PILLAR" is written in large, orange, sans-serif capital letters at the top.

NEW RELEASE

**We are excited to
introduce our latest
innovation: drainlab®**

Offering a perfect blend of form and function,
seamlessly integrating into any space while
efficiently managing water drainage. The sleek
design enhances the aesthetic appeal, while
ensuring practicality and durability.

Launching mid 2024.

drainlab

Errors and omissions excepted. Measurements and drawings are provided as a guide only and should not be relied upon solely for installation purposes.

Product codes, products and prices may change at GO's discretion as systems are constantly reviewed and updated. Please contact GO if you require clarification of product codes, pricing or product stocking.

Due to each installation situation being different, it is the installer's responsibility to seek engineering compliance and/or certification should it be required as part of a project, regulatory or statutory requirement.

Colours are indicative and should be used as a guide only. All products should adhere to a suitable care and maintenance schedule.
