## Owner's Manual

# AQUA-IONIZER

## ANTIOXIDANT PUCK

### Specifications

Size	6 cm x 6 cm
Water to be used	Tap water, 5-140 °F, TDS10-100
Charging	Wireless inductive charging base

### Instructions:

1. Power button: ON/OFF
2. The first time the unit powers on it will run for 5 minutes. After the initial cycle the unit will power on for 2 minutes once an hour until turned off.
3. When the blue indicator blinks, this indicates the unit is producing antioxidants.
4. In standby mode the unit will turn on for 2 minutes each hour.
5. When the blue indicator is off, this indicates the unit needs recharging.

**ADDITIONAL HELP CALL 1-888-601-5886**

### The LED Status Indicator

Blue LED Blinking / Vibrate	Working
Blue LED Constant	Standby
Blue LED OFF	Needs Recharging
Red LED Blinking	Charging
Green LED	The Battery is Full

### Notes:

1. Keep the charging station dry. Use tissue or a paper towel to dry the puck before placing it on the charging base.
2. Use vinegar or citric acid to clean the antioxidant puck by soaking it for 10 minutes.
3. Please contact Real Spirit USA if the antioxidant puck is not working.
