

AQUA-IONIZER DELUXE

Hydrogen Stick Owner's Manual

Specifications

Size	2.5 cm x 18.5 cm
Water to be used	Tap water, 41-104 °F, TDS10-100
Charging	Wireless (Inductive) charging base

Instructions:

1. Power button: ON/OFF
2. When the blue indicator is blinking the hydrogen stick is starting to produce hydrogen into the water.
3. When the blue indicator stops blinking, indicates the hydrogen stick is in the standby mode.
4. In standby mode the hydrogen stick will work intermittently.
5. The blue indicator is off, indicates the hydrogen stick needs recharging.

The LED Status Indicator

Blue LED Blinking	Working
Blue LED Not Blinking	Standby
Blue LED OFF	Needs Recharging
Red LED ON	Charging
Green LED	The Battery is Full

Notes:

1. Keep the charging socket dry. Use tissue or paper towel to dry stick before placing in charger base.
2. Use vinegar or citric acid to clean the hydrogen stick by soaking for 10 minutes.
3. Please contact Real Spirit USA if the hydrogen stick is not working.
