EXTERIOR SIDING

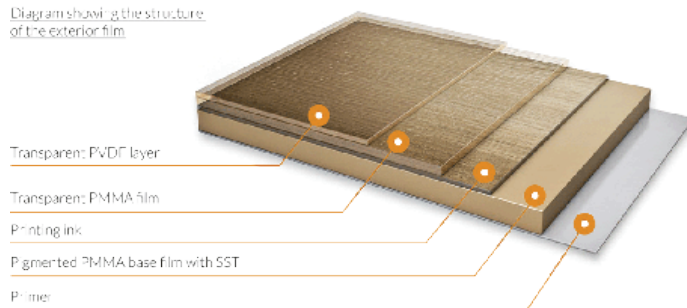

Born in 1994, SAGIPER emerged into the European market and revolutionized the construction and renovation industry by introducing its high quality PVC product lines. Since then SAGIPER has continued its relentless pursuit in maintaining and developing its products to provide aesthetically pleasing, maintenance free, and modern finishing solutions for all of its end users around the world. Our product lines are designed specifically for your contemporary residential and commercial projects offering the natural look of wood, metallic, aluminum and RAL finishes.

## SOLAR SHIELD TECHNOLOGY

Infrared radiation from the sun is simply reflected by SST to provide protection against excessive heat build-up resulting in cooler profiles. With SST, profiles retain their dimensional stability so that panels and trims remain secure. SST acts as a protective shield. Its reflective property safeguards the film itself, the adhesive and the profile. SST provides protection for SAGIPER's exterior film, with dark colours and wood décors enjoying the most significant benefits. SST slows down the ageing process and prolongs the life of the PVC core and construction components.

Diagram showing the structure of the exterior film

SAGIPER is very proud to present its green initiative in PVC and vinyl material recycling. All PVC cutting debris, spare cuts and production line excess, is collected, melted down and formed into reusable gardening stakes, or as we like to call them, SAGISTAKES. This ensures that no PVC, or vinyl wrap in our factory ever goes to waste or thrown out.

Why? 

## BENEFITS:

- Impervious to water
- Impenetrable to insects
- Maintenance-free
- UV Protected
- 50 year warranty (15-year non-prorated)
- Impact and Scratch resistant
- Class A - Fire Rating
- R-Value of 2.41 (SAGIWALL)

CELEBRATING 25 YEARS  
IN MANUFACTURING

## TESTING / CERTIFICATIONS:

CCMC 14043-R  
 CAN/ULC S134  
 ASTM D635-14  
 ASTM D696  
 ASTM D1435  
 ASTM E330/E330M-14  
 CAN/ULC S102  
 NFPA 285  
 CAN/CGSB-41.24-95
