### Blue Advance 5 Mil Nitrile Exam Glove

The Blue Advance Nitrile Exam Gloves are heavy-duty nitrile gloves that have been designed to be puncture resistant. The gloves protect the wearer from exposure to unwanted or dangerous chemicals or substances.

They meet a wide variety of uses: medical exam, doctors' office, dentist's office, beauty hair & nail salons, cosmetology, general household cleaning, home food prep, painting, light mechanical, and outdoor maintenance.

The beaded cuff makes the gloves easier to put on and keeps them from rolling up. They are made of nitrile, making them a great alternative for those who are allergic to latex.
