

The lamp was designed and inspired by one of the sculptures of a world-renowned artist, Anish Kapoor - ISHI'S LIGHT.

The original artwork design of Ishi's Light is a large, floor-standing sculpture, which rises to a height of over three metres. Its ground plan is crescent-shaped, and its form is an ovoid: a massive, incomplete eggshell cut off horizontally and, therefore, open at the base and top.

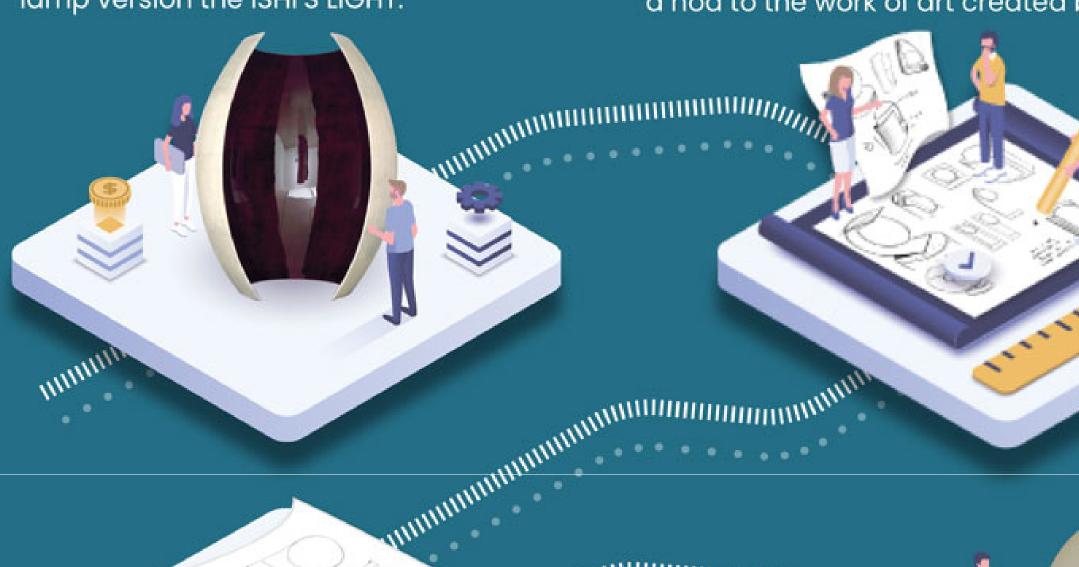

About Space Lighting and ACMI collaborated in designing this unique table lamp version of the famous sculpture of Anish Kapoor that you can have in your home or office.

COLLABORATION OF ARTWORK

About Space & ACMI, inspired by world-renowned artist Anish Kapoor, collaborated in designing this unique table lamp version the ISHI'S LIGHT. INSPIRED BY THE ORIGINAL ARTWORK OF ISHI'S LIGHT

About Space's design team, in collaboration with ACMI, set out next to create several concepts, inspired by the unique shape, and use of light in Ishi's light. Our common goal was to design a unique piece, that gives a nod to the work of art created by Anish.

DESIGN SCOPE

working closely with ACMI team.

LAUNCH

Our team designed and developed, honouring the conceptual design,

Introducing our collaboration, like Kapoor, many artists around the world continue to develop works exploring the medium of light. Visit ACMI today, to see Light Works from the Tate's Collection, discover traditional and contemporary works that explore the power and presence of light as a constant source of inspiration.
