

Elite 501 Soy Based Wood Stain

NaturalKote™ Soy-Based Wood Stain Elite 501 is a premium version of soy based wood stain. It has good penetration, yet is breathable, allowing any moisture trapped underneath to escape. And like all NaturalKote™ products it has almost no odor, which greatly improves any work environment.

Elite 501 is an excellent choice for staining fences, decks, log cabins, barns, sheds, gazebos, outdoor furniture, raw wood siding or anything that requires a premium long lasting finish.

Elite 501 is also very easy for anyone to maintain, as no stripping is required before re-coats. The soy oil technology in the stain allows it to slowly wear by erosion rather than flaking or peeling.

All colors shown approximate actual stain colors as accurately as possible. Colors will be influenced by lighting, texture, grain porosity, species of wood and when refinishing previously stained surfaces. A trial area is suggested before proceeding with your entire job. **BEFORE STAINING....always test on the natural wood for color.**

available in 1^{QT}, 1^{GAL}, 5^{GAL}, 55^{GAL} drum & 275^{GAL} tote.

Application Instructions

When staining smooth planed wood surfaces, light sanding is recommended to open the wood pores, which results in better penetration and more uniform color overall. Apply one good coat putting on enough so that the wood gets all that it can soak up. Take care to avoid puddling.

When staining rough sawed wood surfaces, two good coats are recommended. Back brushing to achieve maximum penetration.

NaturalKote™ Soy-Based Wood Stain is also great for decorative concrete.
