

Washing Instructions

Never use biological detergents, fabric softeners or dryer sheets.

Never use bleaching agents, enzymes or brighteners.

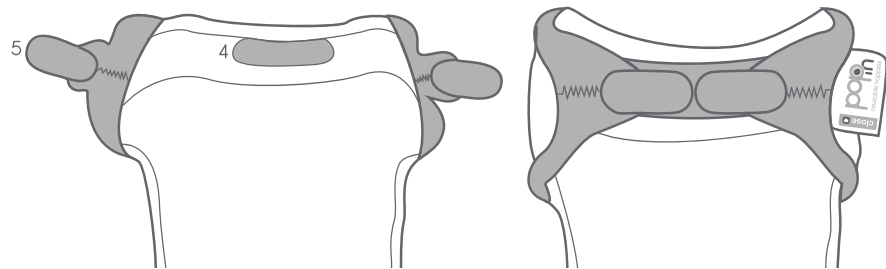

Never use bi-carbonate of soda or products containing vinegar or high quantities of citric acid.

Never wash without closing up your washing tabs

Fasten the velcro tabs [5] onto the specially designed washing tab [4] at the back of the nappy (see below).

Never tumble your outershell [1] or leave it over direct heat.

You can occasionally finish the soaker [2] in the tumble dryer on a low heat, always remember to separate it from the outershell.

Getting started...

Before using...

We recommend that you prewash them twice before use. This can be done at 30/40 degrees centigrade and you only need minimal detergent. There is no need to dry the nappies in between the two pre-washes. A cold rinse before is recommended to stop stains setting.
