

## Now there is a better way - **Stretch Drain**

Stretch Drain is more flexible than traditional corrugated pipe allowing it to bend around any obstacle and retain its shape during installation.

- **Fast and easy to install**
- **Saves time and money**
- **Complete range of accessories**
- **Compact design for easy transport**
- **Fits all popular drainage pipes and systems**

**Bends around anything!**

**Expands up to 4 times longer!**

**Connect 2 or more pipes!**

**Connects to other RELN drainage!**

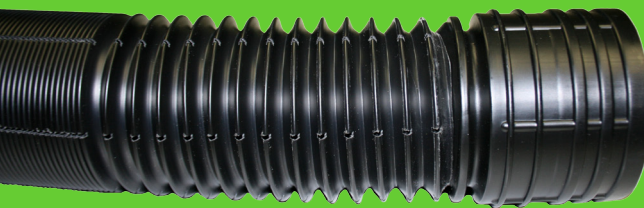

## Drain Pipe Options

### Solid Stretch Drain

Available in 8 and 16 metre lengths

This solid drainpipe is perfect for diverting water from one point to another.

### Slotted Stretch Drain

Available in 16 metre lengths

This slotted drainpipe has closely spaced slits to allow water ingress or dispersal. Slotted Stretch Drain is perfect for groundwater drainage such as controlled flow of stormwater into ground or french drains to capture groundwater. To prevent clogging of the slots, this pipe should be used with a surrounding base of gravel or rock.

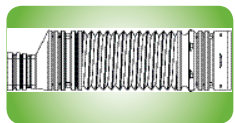

### Slotted Stretch Drain with Sock

Available in 8 and 16 metre lengths

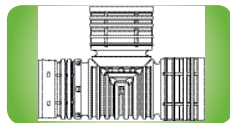

This slotted drainpipe has closely spaced slits to allow water ingress or dispersal, and also covered by polyester sock. Slotted Stretch Drain is perfect for groundwater drainage such as controlled flow of stormwater into ground or french drains to capture groundwater. Polyester sock prevents clogging of the slots, to allow use in areas where soil or sand require filtration.

## Components

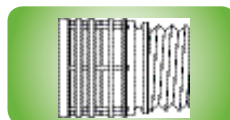

### Flexible Downpipe Adaptor

- Connects gutter downpipe to drainpipe
- Flexible design allows easier and more versatile connection than rigid adaptors
- Fits:
  - 90mm PVC Pipe
  - 100 x 50mm PVC gutter downpipe
  - 100 x 50mm Steel gutter downpipe
- Expands up to 390mm long

### Tee Piece

- Connects multiple drain pipes
- Flexible design allows easier and more versatile connection than rigid adaptors
- Fits Stretch Drain 100mm

### Stretch Drain End Coupling Socket

- For Connecting Stretch Drain pipe sections
- Connects to Socket End

### Coupling for RELN Drain Outlets

- Connects Stretch Drain to RELN surfacewater drainage system 90mm outlets

### End Cap

- Seals drain pipe end

### Stretch Drain End Coupling Spigot

- For connecting Stretch Drain pipe section
- Connects to Stretch Drain Socket End
- Also connects to:
  - 90mm PVC pipe
  - 100mm Draincoil
  - 100mm PVC pipe
