

DocolEletric Concealed Wall Lavatory Tap

00471116

DESCRIPTION

Faucet with horizontal entry for installation in wall and automatic activation of water flow through the approximation of hands in the field detection sensor.

TECHNOLOGY AND CHARACTERISTICS

DocoSensor WaveSci DocolEletric Aerator Bi-nickelChrome

ADVANTAGES

The concealed products are robust and versatile, besides providing more hygiene and safety.

The water flow is automatically activated when the hands approach the detection field of the sensor and turned off when the hands are away or after 60 seconds of continuous flow.

These products are also available in taps and urinals, they are ideal for areas where large numbers of people circulate, such as airports, shopping centers, bars, restaurants, and other similar locations.

DocoSensor: Automatic activation of the water flow just by hands approaching the sensor detection field.

WaveSci: Exclusive intelligence system that inhibits the activation by variations of ambient light;

DocolEletric: equipped with a universal input power source ranging from 90 V to 240 V and 50/60 Hz supplying a constant output of 12 V.

The built-in aerator, besides providing guaranteed savings on water, it is more comfortable to handle and avoids splashing, making the visual appearance of the spout cleaner.

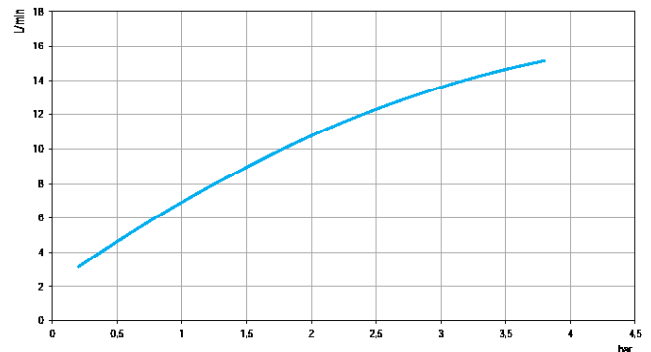

Acabamento cromado biníquel de alta resistência à corrosão, conservando a beleza do produto por muito mais tempo.
