

HYGIENIC

Is the GROHE Sensia® Arena easy to maintain?

Yes, very. It is quicker and easier to clean than a conventional toilet thanks to the self-cleaning mechanism, the rimless bowl and the AquaClean antibacterial

What material is the Sensia Arena® shower toilet's lid and seat made of?

The seat and lid are made of Duroplast

How does the Sensia Arena® shower toilet bowl stay clean?

The Sensia Arena® shower toilet uses two different hygiene technologies on its ceramic surfaces. HyperClean is an anti-bacterial glazing which prevents the growth of bacteria. And AquaCeramics is an anti-stick and scaling coating

What does the Sensia Arena® shower toilet's SIAA certification mean?

The SIAA certificate is a "measurement of antibacterial activity". Only products which have a measurement of antibacterial activity greater than 99.9% can

Why does the Sensia Arena® shower toilet have two nozzles?

One nozzle is for the Rear Spray, the other is for the feminine Shower. Our competitors' products mostly rely on one nozzle for both. We believe that from a woman's point of view having a dedicated feminine Shower is more hygienic.

How do the Sensia Arena® shower toilet nozzles self-clean?

The nozzles self-clean using pure water. When you choose one of the spray functions the automatic nozzle cleaning starts immediately – water comes out of the spray and in doing so rinses the nozzle. After you have finished using the spray, the automatic cleaning programme will run. The nozzle is also made

What materials are the Sensia Arena® shower toilet's nozzles made of?

The nozzles are made of antibacterial plastic.

Can you replace the nozzles on the Sensia Arena® shower toilet?

Yes, the nozzles are replaceable and are listed as spare parts: 14928000 for the Rear Spray; 14929000 for the feminine Shower.
