

FLAGPOLES (FIBERGLASS)

Fiberglass flagpoles are engineered to be strong and resilient. Their high-quality clear coat finish yields a pristine appearance for the life of the pole. Stationary trucks are standard, with revolving trucks available. Flagpole heights range from 15-100ft, & average wind ratings while flagged are 80-90mph.

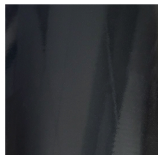

- Aliphatic Polyurea coating system provides extended UV protection and weatherability
- Lightweight and easier to install in most cases
- Much quieter than aluminum or steel poles
- Non-conductive by nature

Things To Consider...

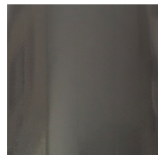

- Stationary trucks are standard
- Fiberglass poles can show slight mildew after years of weathering
- Sways and flexes in high wind, but retains shape
- Pole can be fitted with a yardarm and/or gaff
- Fiberglass comes in five standard colors (below), but can also be ordered in custom colors!

White

Black

Bronze

Faux-Luminum

Dynamic Bronze

Most flagpoles can also be ordered in either INTERNAL or EXTERNAL configurations. Internal systems provide a clean look while also preventing vandalism, whereas external systems are the most traditional and economical option.

Let us help you choose the right flagpole for your individual needs and style!

External (w/ Cleat)

Internal (w/ Lock Box)
