Introducing Mater's first sofa series, Legacy is a premium lounge collection characterised by its beautiful solid oak frame supporting the upholstery. The wide armrests are making the furniture interesting from every angle and ideal as a freestanding piece of furniture.

"Legacy marks a milestone in Mater's history as it completes our collection of small furniture such as side tables, rugs and lighting", says Henrik Marstrand, founder and CEO of Mater.

Legacy is designed for larger modern spaces with cushioning engineered from CMHR foam, fixed in a bent veneer frame for comfortable support, and complies with flammability requirements of the 'Crib 5' test, making it suitable for commercial use. Upholstered with Sørensen Royal Nubuck made from the best European raw hides or with 100 % un-dyed wool by Kvadrat produced without the use of chemicals and complies with EU Ecolabel "The Flower". The chrome-free aniline leather has a high breathability, which gives an amazing seating comfort and will become smoother and shiny in use. The Legacy series is available as a two-seat sofa and an armchair.

About the Designer

PEDERJESSEN is a Danish design studio established in 2015 by Søren Pedersen and Lasse Jessen, both with a background as industrial design engineers from University of Southern Denmark. Within furniture and lighting they are known for having a holistic approach to product development, always looking to experiment with new technologies and materials. The main ambition is to design functional and aesthetically durable products – on the basis of a combined traditionally and contemporary approach.

Sadly, Søren Pedersen passed away right before the launch in Milan after a sudden heart attack. The collection was given the name Legacy to honour Søren and his work.

About Mater

Mater was established in 2006 in Denmark by Henrik Marstrand, who had a vision to create iconic and beautiful design, based on an ethical business strategy. Through collaborations with an external network of established and fresh talent, Mater combines high-end furniture and lighting, constructed with methods that support people, local craft traditions and the environment.
