

Mini Spill Berm

The Mini Spill Berm is the smallest type of berm, and it is commonly used as a spill tray, secondary containment, storage pallet, and a spill response tool. It's perfect to hold small tanks and drums that have the possibility of leaking. The berm is also great for temporarily holding items that need to be in a contained area.

This Mini Berm is made of strong flexible material and sides held up by fiberglass rods. These features make the berm easy to deploy and roll back up into small size for storage. The mini berm is one of the best options for secondary containment on a small scale with easy accessibility.

Applications:

- Secondary Containment For:
 - Transformers, generators, pumps
- Storage For:
 - Small Tanks, Drums, Chemical Cans
- Rapid Response
- Temporary Part Storage
- Spill and Rupture Containment
- Small Equipment Decontamination

Typical Mini Spill Berm Specifications

Mini Spill Berm

Mini Spill Berm Specifications

Our [Mini Spill Berms](#) are **manufactured from first grade materials** And, all are provided with a Certificate of Fitness upon request. Our berms are certified for storage of fuel and chemicals. An MSDS may be required to ensure complete compatibility.

Fabric : 18 oz. or 22 oz. PVC, Elvaloy or Urethane . The 18 oz PVC can only be used for the smallest size berm.

Fittings: The mini spill berms can have drain fittings installed upon request.

Berm Liner: We recommend the use of berm liners, rub pads or ground cloths to ensure the berm's longevity. HDPE underlayment is also available.

Optional: When ordering a berm also ordering heavy duty tread pads, repair kits, ground covers and underlayment, drain fittings, and a storage bag or crate can be beneficial.

Mini Spill Berm Typical Sizing

Material	Capacity	Dimensions
22 oz. PVC	9.9 gal. (37.4L)	2' (0.6 m) x 2' (0.6 m) x 4" (.01 m)
Elvaloy	39 gal. (150L)	4' (1.2 m) x 4' (1.2 m) x 4" (.01 m)
Urethane	62 gal. (234L)	5' (1.5 m) x 5' (1.5 m) x 4" (.01 m)

Note: 18 oz PVC is available only for 2'x 2' mini berm
