

About Rabbit Air

Founded in 2004 in Los Angeles, California, our company has dedicated its time, energy, and resources to perfecting a product that improves quality of life: the air purifier. Our undivided attention and dedication to air purification is why we have become one of the fastest growing companies in the U.S., ranked as such eight times by *INC*. magazine.

9-Time Inc. 5000 Honoree

Our mission

Our innovative approach to design, product development, and customer service makes us a leader in the air purifying industry. Our air purifiers are respectful of the environment; we take pollutants out and leave nothing but clean air in return.

Our service

While we constantly strive to push the limits of air purification, there's one thing that will never change: our service. Customer happiness and loyalty is what makes our work worth it. Our friendly, knowledgeable, and honest customer service representatives are committed to providing excellent 24-hour care.

Rabbit Air

Advanced filtration

BioGS® HEPA Filter - See the difference

Common allergens* and bacteria** trapped and reduced by the **BioGS HEPA** Filter over time.

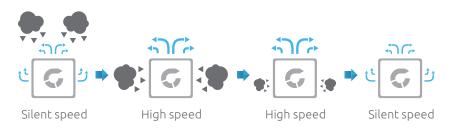

Typical HEPA air purifiers trap allergens and contaminants, which accumulate on the filter and interfere with efficiency. The **BioGS HEPA Filter** traps and reduces common allergens* to support optimum filter efficiency and prolong filter life.

Rabbit Air's BioGS HEPA Filter delivers superior preformance

Typical HEPA filter BioGS HEPA Filter Traps allergen and particles 0.3 microns in size at 99.97% efficiency and over 99% efficiency for particles less than 0.1 microns‡ Reduces common allergens Reduces the growth of bacteria and viruses on the filter** Prolongs optimal filter efficiency Alleviates common household odors

Intelligent purification

Rabbit Air's air purifiers monitor your air quality and adapt to their environment

Rabbit Air products are in a class of air purification all their own. With highly sensitive odor and particle sensors, our advanced air purifiers detect the amount of pollutants in your environment and adjust their speed accordingly to assure the freshest air quality at all times.

Light sensing

Our A3 and MinusA2®'s light sensor automatically cuts back on light pollution by defaulting to a low-energy, dimmed sleep lighting when the room darkens. When daylight returns or light levels increase, the A3 and MinusA2 resume their normal modes.

Reduce light pollution

When the A3 and BioGS® has been idle for five minutes, the user interface lights will disappear to reduce light pollution.

3 | Why Rabbit Air

^{*}Test samples: Aspergillus niger, Penicillium citrinum, Chaetomium globosum.

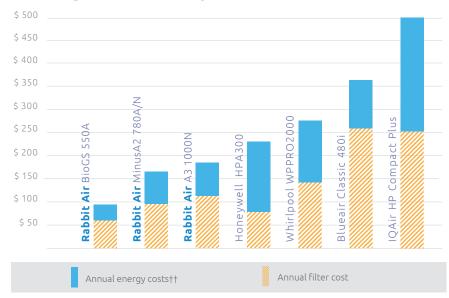

[‡]Test data shows our HEPA filter (brand new or like-new) can trap particles 0.3 microns in size at 99.97% efficiency, and our air purifiers are able to remove 99.9% of 0.1 micron-sized particles from the air. Research data shows True HEPA-rated filters can trap particles less than 0.1 microns in size at higher than 99% efficiency. For more info, see https://www.cdc.gov/-

[†] Photo illustration only and does not represent actual filter performance.

Why Rabbit Air? Smart investment

Annual cost comparison†

Save an average of \$683.84 over 5 years with Rabbit Air‡

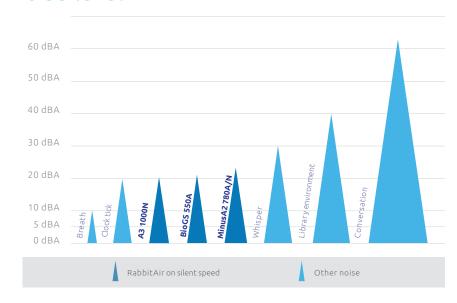

All Rabbit Air products are ENERGY STAR certified, and very conservative in their energy consumption.

†All energy and filter cost calculations are based on 24/7 usage on the highest fan setting. Information of each model is based on the official website of each company on September 2021.

‡Calculations of savings are based on energy consumption and filter replacement costs of the BioGS SPA-550A versus the Honeywell HPA300 with 24/7 usage.

††Source of energy cost: US Energy Information Administration, average retail price of electricity for 2020.

Noise level

The heart of our air purifier is the Brushless Direct Current Motor (BLDC). an innovative motor with inverter control that operates at five different speeds. At its lowest speed, the air purifier's motor barely makes a sound.

BLDC motor

the Brushless Direct Current Motor (BLDC). The absence of motor

5 | Why Rabbit Air

The A3

reddot winner 2021

DESIGN AWARD 2021

Purification with benefits

Ultra quiet

The cutting edge BLDC Motor operates at five different speeds. It's virtually silent at the lowest speed.

Energy efficient

ENERGY STAR certified units will not run up your energy bill.

Thorough

The A3 SPA-1000N air purifier will filter all of the air in a room up to 1,070 sq. ft. twice in an hour on the highest setting.

Adaptable

The A3 is designed to either stand alone or to be mounted on the wall (right side up or upside down).

Chill

Wind down with the LED mood light above the front panel, which can be turned on to produce a soothing spectrum of colors.

Smart

A light sensor that can automatically turn all lights off on the A3 when the room is dark, and returns to its original light settings when the room is bright.

Responsible

A childproof feature pauses air purifier operation when the front panel is removed.

Reliable

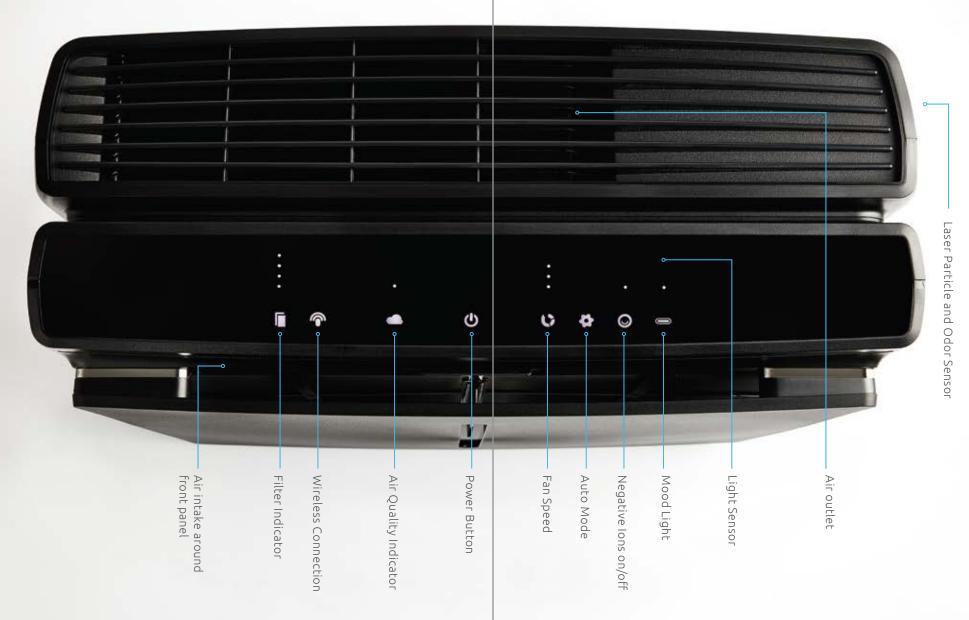

Backed by an industry leading five-year warranty and 24/7 lifetime technical support.

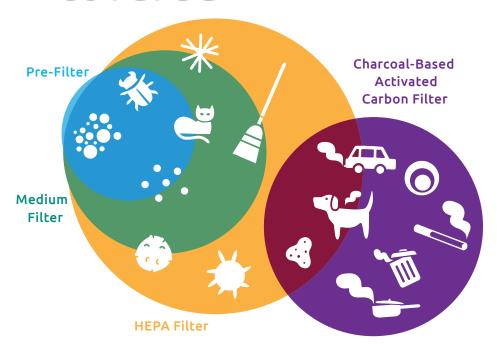

Wireless

The WIFI and Bluetooth-enabled SPA-1000N allows you to control your air purifier remotely.

Six-stage purification & deodorization

Pre-Filter

(washable and permanent)

The Pre-Filter effectively traps and reduces large sized allergens, dust, and particles.

Medium Filter*

The Medium Filter traps and reduces airborne particles larger than 1 microns in size, such as pollen and pet dander allergens.

Charcoal-Based Activated Carbon Filter*

Made of high-grade granular activated carbon, our AC filter is much more effective than typical AC filters, which are coated with a thin layer of activated carbon. Chemicals and common household odors can be effectively reduced.

BioGS HEPA Filter*

The BioGS HEPA filter traps allergens and particles down to less than 0.3 microns in size at 99.97% efficiency, and reduces common allergens to support optimum filter efficiency and prolong filter life.

Customized Filters* (Choose one of the customized filters below)

Germ Defense Filter

Effectively traps and reduces airborne bacteria, mold spores, and particles that carry viruses.

Toxin Absorber Filter Traps and reduces volatile organic compounds (VOCs) and other chemicals.

Pet Allergy Filter Traps and reduces pet dander allergens.

Odor Remover Filter Traps and reduces odors from pets, cigarettes and cigars. cooking, and mildew.

Negative Ion Generator (This feature can be turned on or off)

Produces beneficial negative ions to fortify the air you breathe and freshen your indoor environment.

*Lasts up to two years based on 12 hr/day operation

The MinusA2 13 | The MinusA2 can be wall mounted

Purification with benefits

Ultra quiet

The cutting edge BLDC Motor operates at five different speeds. It's virtually silent at the lowest speed.

Energy efficient

ENERGY STAR certified units will not run up your energy bill.

Thorough

The MinusA2 SPA-780A/N air purifier will filter all of the air in a room up to 815 sq. ft. twice in an hour on the highest setting.

Adaptable

The MinusA2 is designed to either stand alone or to be mounted on the wall.

Chill

Wind down with the LED mood light on the front panel, which can be turned on to produce a soothing spectrum of colors.

Smart

A light sensor will automatically transition the unit to sleep lighting when the MinusA2 is in a dark room, and resumes a more active mode when light levels increase.

Responsible

A childproof feature pauses air purifier operation when the front panel is removed.

Reliable

Backed by an industry leading five-year warranty and 24/7 lifetime technical support.

Wireless

The WIFI enabled SPA-780N allows you to control your air purifier remotely.

Stay connected Breathe Free!

Get acquainted with our brainiest air purifiers yet, the MinusA2 SPA-780N and A3 SPA-1000N. Outfitted with wireless internet capabilities, these units allow you to monitor air quality and control purification in your home whether you're sitting on the couch or away from the house. Enjoy the effortless experience of clean air with these cutting edge machines.

Rabbit Air App Features

Total Control

Manage your air purifier from anywhere while connected to WiFi.

Air Quality Monitor

Keep an eye on the air quality in your house and settings on your device, even when you're away.

You Say When

Set your air purifier to run on a daily schedule.

Maintenance Reminders

Don't worry about keeping track of filter replacement; the machine will remind you.

Preferred Display

Adjust the LED light display, mood light, and air quality indicator to give off more or less light, depending on your preference.

Manage Account

Access your account, order filters, and monitor multiple air purifiers right from your app.
