

### HD2700M+ At A Glance

The HD2700M+ is our exclusive HD industrial grade, seamless auto looping DVD player and digital media player (all in one) unit that plays content from either a DVD, USB or SD card. The HD2700M+ is designed to automatically power on, auto play, auto loop and seamlessly auto repeat content without manual interaction. The HD2700M+ has a built in scheduler that allows you to time various content throughout the day. It can also become an interactive signage player by adding LED push buttons, motion sensors or proximity sensors for solutions that desire human engagement to trigger specific content. Estimated life span of 6+ years without failure even with 24/7 playback. The HD2700M+ is the most reliable, durable DVD and digital media player on the market. Displays full native 1080p HD video and upscales traditional 480p DVDs. The HD2700M+ is ideal for any project looking for a reliable, simple to use, cost effective digital signage solution to advertise, engage, inform and educate any audience. The HD2700M+ may easily convert to an interactive digital signage display coupled with any of our LED push buttons, motion sensors, proximity sensors or weight sensors to uniquely trigger content with any of the following:

Push      Move      Wave      Elevate      Sense

### Advantages & Benefits

- Exclusive Manufacturer - 40+ years industry experience
- Estimated reliability of 6+ years, continuous play 24/7/365
- Plays content from a DVD, USB or SD card
- Automatically powers up, plays and seamlessly repeats
