

## Designer's Notes:

1. Special-order sizes available on request.
2. Maximum size mirror available, 96 " $\times 72^{\prime \prime}(244 \times 183 \mathrm{~cm})$; minimum size, $12^{\prime \prime} \times 12^{\prime \prime}(30 \times 30 \mathrm{~cm})$.
3. All Bobrick framed mirrors are manufactured to overall width and height dimensions. EXAMPLE: A $24 " \times 36 "$ ( $61 \times 91 \mathrm{~cm}$ ) mirror will be furnished 24 " x 36" ( $61 \times 91 \mathrm{~cm}$ ) outside-of-frame to outside-of-frame.
4. To specify special sizes use Series Number followed by width $x$ height in inches. EXAMPLE: B-165 2024 20" x 24" (51 x. 61cm)
5. Bobrick framed mirrors are manufactured to a tolerance $1 / 8$ " $(3.2 \mathrm{~mm})$.
6. For sufficient space to lift mirror onto wall hanger(s), provide 1" ( 25 mm ) minimum clearance above top of mirror frame.
7. Provide $1 / 2^{\prime \prime}(12.7 \mathrm{~mm})$ minimum clearance on each side.

- for all other mirrors up to a width of 36"

Note: Mirrors greater than 36 " in width will have multiple hanger brackets with a typical 8" off each edge.

MATERIALS:
Frame - Type- 430 stainless steel, $1 / 2^{\prime \prime} \times 1 / 2^{\prime \prime} \times 3 / 8^{\prime \prime}\left(13 \times 13 \times 9.5 \mathrm{~mm}\right.$ ) channel with $1 / 4^{\prime \prime}$ ( 6 mm ) return at rear for Snap Locking Design; $1 / 2^{\prime \prime} \times 1 / 2^{\prime \prime} \times 1 / 2^{\prime \prime}(13 \times 13 \times 13 \mathrm{~mm})$ channel for Lock Tab Design, with bright polished finish. One piece frame with 90 degree mitered corners. Galvanized steel back has integral horizontal hanging brackets near the top for hanging the mirror and near the bottom to prevent the bottom of the mirror from pulling away from the wall.
Mirror — No. 1 quality, $1 / 4^{\prime \prime}(6 \mathrm{~mm})$ select float glass: selected for silvering, electrolytically copper-plated by the galvanic process, and guaranteed for 15 years against silver spoilage. Back is protected by full-size, shock-absorbing, water-resistant, nonabrasive, polyethylene padding.

Concealed Wall Hanger - For snap locking design: Heavy gauge steel construction. Incorporates upper and lower members, which engage backplate louvers to keep mirror against the wall. For "2S"-Tab design: Incorporates upper bracket engaging in upper louver and double sided tape below the bottom louver securing mirror to concealed wall hanger.

## INSTALLATION:

Mount wall hanger on wall with screws (not furnished) at points indicated by an $S$. For plaster or dry wall construction, provide backing to comply with local building codes, then secure wall hanger with screws (not furnished). When providing a concealed backing, allow backing to cover minimum range of mounting hole locations shown on drawing. For other wall surfaces, provide fiber plugs or expansion shields for use with screws (not furnished), or provide $1 / 8^{\prime \prime}(3 \mathrm{~mm})$ toggle bolts or expansion bolts.

Snap Locking Design: Hang mirror on wall hanger with all four backplate louvers engaged behind horizontal wall hanger members. To do this, mirror must be centered in front of the wall hanger horizontally, pressed flat against the wall approximately $1^{\prime \prime}(25 \mathrm{~mm})$ above final position and then lowered into final position.
"2S" Tab Design: Comprises of two brackets, while the bottom one is furnished with double side tape. Bottom hanger bracket's mounting holes must be $1^{\prime \prime}-11 / 2^{\prime \prime}$ above mirror's bottom edge. Note: Bottom hanger bracket is not supposed to engage with louvers of mirror's backplate. Hang mirror on wall top hanger bracket with the top two louvers engaged behind top wall hanger bracket.To do this, mirror must be centered in front of the wall hanger horizontally, pressed only at the top against the wall approx. $1^{\prime \prime}(25 \mathrm{~mm})$ above final position an then lowered into final position. When lowering, pull mirror's bottom edge off the wall by preventing bottom bracket from engaging. Once lowered, mirror must be pressed against wall to engage with double sided tape of lower wall hangar bracket.

Snap Locking Design - Locking devices automatically secure mirror to concealed wall hanger when it is lowered into final position (see figure 3). Locking devices may be unlocked by inserting two flat blade screwdrivers behind each side of mirror near the bottom or under the bottom of the mirror and pulling mirror bottom forward and then up.
"2S" Tab Design - Secure mirror to concealed wall hanger by pressing mirror against double sided tape of lower hanger once it is lowered into final position (see figure 4).
