

MAXIM 3000

The most outstanding features of the Maxim 3000™ are its ultra-smooth walls and spacious interior. With no ledges to collect dust, debris or waste, the Maxim 3000 can maintain a clean appearance long after a service call. Inside, the rounded corners create more open space, and a uniquely contoured tank provides end-users a more comfortable sitting position. Along with its beautiful appearance, the Maxim 3000 is also incredibly strong. By utilizing industry leading technology to create twin-panel walls and a blow-molded front, the cabana is almost indestructible. The cabana is also strengthened by interlocking corners, a fitted base, and an overlapping roof design.
