## Micro/Hydrodermabrasion 60 minutes 134.00

This treatment gently & deeply removes unwanted dead skin cells, smoothes the texture of your skin, brightens, lightens the appearance of pigmentation and scarring, and helps to remove congestion lying underneath your skin. The Hydrodermabrasion option will also help in infusing your skin with deeper hydration, to soften fine lines and leave you with a healthy glow!

**Enhance your results with: Add Micro to any Spa Facial ..... 39.00**

## Dermafill Facial 1 treatment 159.00

This treatment uses a special device and method called Electroporation to assist in opening the cells in your skin and transmitting powerful active ingredients deeper down, rather than just applying it on top of your skin. These active ingredients are then locked in, and will therefore help to improve hydration levels, skin firming, brightening, reducing fine lines and enhance overall skin vitality.

## Nanofusion (most popular) 1 treatment 199.00 or with LED 243

Our unique Nanofusion Facial combines microscopic silicone pyramids (even smaller than micro needles used in skin needling) with massage and vibration techniques, to open Nano channels into your skin. This method allows us to deeply penetrate products into your skin and target the exact areas of our skin concerns, whilst also optimizing results with our active formula's.

- What can we help treat & improve?
- Skin Rejuvenation & Collagen
- Synthesis
- Skin Healing & Repairing
- Glycation of Fine Lines & Wrinkles
