

## 6 reasons why *Fast Phonics* is more effective, more fun and more rapidly acquired than traditional phonics methods:

1	<p><i>Fast Phonics</i> gets the child <b>READING RIGHT NOW</b> (details come later). With this revolutionary method you waste no time getting right to the core of the key skill it takes to actually read. <i>Fast Phonics</i> achieves this by teaching only the 26 PHONETIC SOUND/ SYMBOLS first. The teaching of the alphabet NAMES and capital letters is postponed until a child is already reading three-letter words.</p>
2	<p>The “memory hook cartoons” are meticulously crafted to deliver the <b>STRONGEST POSSIBLE RECALL</b> of each visual symbol to its sound.</p> <p>The cartoons are designed to be germane to the <b>INSIDE</b> of the letter itself, not crafted only as novel appendages hanging all over the <b>OUTSIDE</b> of the letter as in other phonics programs.</p>
3	<p><i>Fast Phonics</i> continually requires small <b>choices of discrimination</b>, so the brain <b>HAS</b> to stay alert at all times while doing each lesson.</p> <p>The course uses frequent fun checking/testing. The child himself knows at each stage what he retains and what he does not yet retain. This method <b>jettisons any possibility of having a lazy brain</b> while gaining all of the skills necessary to read.</p>
4	<p><i>Fast Phonics</i> uses <b>both hemispheres of the brain</b> to log in all of the material:</p> <p><b>The visual section:</b> initially with the cartoons—later with the exercises.</p> <p><b>The motor planning/tactile section:</b> initially with the no-pencil tracing (using the pointer finger only) and hand motions, and later with having to manipulate the information within all of the other skills.</p>
5	<p><b>Vowels are taught with exceptional clarity.</b></p> <p>Short vowels are treated as “one of the boys.” They are learned right alongside ordinary consonants as if they were no different. When long vowels are introduced, their conversions from short to long are drilled (nailed) 160 times before those long vowels are ever used in a sentence. Once he begins encountering these two vowel words in any new reading context, the child <b>KNOWS</b> how to decode them instantly.</p>
6	<p><i>Fast Phonics</i> <b>builds HUMOR into the program</b> so that the student's emotions are happily enticed to dive into print with gusto!</p>
