**Other how-to books by Renée Ellison in the Teach Faster Series:**

**Teach Phonics Faster** Want to teach phonics in a way that gets your child reading faster? Want to make teaching phonics easier, too? Most phonetic programs are loaded with way too much tedium and far too many bells, whistles and games. In the public school it takes about a year (most of first grade) to conquer the reading skill. Many commercial phonics programs take six to eight months to wade through. However, if you'll proceed with this first step your child should be able to read significantly in a matter of weeks instead of months. This method kaleidoscopes the task down into "bare-bones-speedy-minimums". This translates to more energy for Mom and quicker reading joy for her children. Begin with this first step and then follow with whatever phonics program you currently own. You will zoom through whatever program you have. Why? Because the lion's share is already done. The rest is mop-up work. With this foundation, the child will have already fully grasped the decoding key.

**Teach Grammar Faster** Teach grammar in one afternoon by drawing a geometric shape around each word. This spikes right-brained recall, amazingly. In addition, you will learn fool-proof tips for conquering numerous stubborn grammatical and spelling problems. Smart study skills are also featured here. Learn how to learn in half the time. Get superior academic results with less effort. All of these easy "get-ahead" strategies can be taught from 3rd grade on up. You will be delighted by what you'll learn, as an adult, right along with your child. Oh, that all past schooling could have been this easy!
