

AXION Shapes are sealed pneumatic objects suitable for events and promotion. Silent, durable and fully printable, this model comes with a transport bag implemented in a base. It takes up to 10 minutes to setup and break down. Usually they are customized with your company's logo or the customer's artwork. Thanks to higher operational pressure pneumatic objects are able to resist extreme weather conditions. Therefore these objects are the first choice for skiing and extreme sports, as well as car racing and other events where one must be sure that an electrical blackout will not cause an emergency situation. AXION Bottle is a professional inflatable product for indoor and outdoor. It is an air sealed inflatable shape fully realistic dye sublimation printed. Great product for any beverage promotion.
